Toys for the “Peaceful” Syrian Opposition

And while the British have stated, that they would have saved myriads of Syrian civilians in front of a massacre, naturally by the [blockade of the “Alead”](#) with the [three scheduled reconditioned multifunctional helicopters type Mi-25](#) (Mi-24D “Hind”), the journalist [Anhar Kotchneva has published](#) many pictures of a lot of seized weapons of the Terrorist “Free Syrian Army” (FSA) after her trips to the Syrian city of Homs.

There are some interesting items between them:

In the picture below, you can see a M72 LAW from the far Pindostan ([Pindosia, USA](#)).

M72 LAW of the Free Syrian Army / FSA

You were not able to find such a weapon in Syria, until recently; but in the last time, you can see this weapon frequently, e.g. on poser-videos of the armed gangs of the “Free Syrian Army” (FSA) and in clips of the other radical groups of Islamists, criminals and mercenaries.

A sign for the recent and ongoing massive arms smuggling as well as for the “Western” sources of financing.

NATO weapons of the Free Syrian Army / FSA

Explosive SUN 90 made in India

Firearms of the Free Syrian Army / FSA

Ammo of the Free Syrian Army / FSA

Shells of the Free Syrian Army / FSA

[ANNA-News](#) supplements the contributions by several reports about the securing of weapons, which are far more complicated and more expensive than the weapons which could be seen some months ago.

These include thermal imaging devices, tons of ammunition of the caliber .308 (sniper ammo), and the antihemorrhagic compound “QuikClot”, which was developed and is still used by the U.S. military.

On the one hand, these reports testify the tremendous increase in the arming and funding from foreign powers (there are almost no more weapons of Soviet standards represented), on the other hand, they testify the success of the Syrian Arab Army in the curbing of this so-sponsored terrorism:

Land rover in the Syrian city of Homs

A Land rover in the Syrian city of Homs which was converted to an armored supply vehicle of the security forces (in the picture: Anhar Kotchneva).

This vehicle is primarily used by the Syrian police in order to supply the checkpoints, which one can only reach through streets which are observed by snipers of the “Free Syrian Army” (FSA), but these vehicles are also used in order to bring Syrian civilians back to their homes, where the civilians can fetch all the documents and valuables, which they had to left behind in the hurry of the flee.

Anti-aircraft tank – converted for street fights

An armored anti-aircraft vehicle which was retrofitted for the street fight (tracking device removed). It is parked at the stadium of Homs and is the only sure resource against the snipers of the Western-backed “Free Syrian Army” (FSA). (Date of the last two shots: 06/20/2012).
