

Trump's "Operation Warp Speed" for Mass Vaxxing. "Big Bucks for Big Pharma"

By [Stephen Lendman](#)

Big Pharma is poised to cash in big from mass COVID-19 vaxxing — at the expense of human health and welfare.

Author of "Pharma: Greed, Lies, and the Poisoning of America" Gerald Posner explained that drug companies "view Covid-19 as a once-in-a-lifetime business opportunity," adding:

It'll be "a blockbuster for the industry in terms of sales and profits. The worse the pandemic gets, the higher their eventual profit."

In the US, taxpayers are funding COVID-19 vaccine research. According to federal procurement data, the US Biomedical Advanced Research and Development Authority (BARDA) gave Johnson & Johnson's pharmaceutical subsidiary Janssen \$604 million in free money for COVID-19 vaccine and antivirals development.

Regeneron got \$92 million in largely taxpayer provided free money for monoclonal antibody research and development.

Genentech got \$25 million for Actemra development, a potential COVID-19 treatment.

Congress appropriated around \$3.5 billion to hand Big Pharma for drug development, much of it COVID-19 related.

These companies rely on large-scale government handouts to fund research and development, likely much more coming for COVID-19 related work alone — courtesy of US taxpayers without their knowledge or consent.

The Trump regime appointed four-star General Gustave Perna to head Operation Warp Speed.

Since 2016, he served as commander of the US Army Material Command — responsible for its worldwide supply chain.

Former chairman of Big Pharma firm GlaxoSmithKline's vaccines division/current vulture capitalist Moncef Slaoui was appointed as his chief advisor.

On Wednesday, Bloomberg News first reported on their appointments, adding:

The Trump regime project "seeks to produce 300 million doses of a Covid-19 vaccine (for mass vaxxing) by the end of the year, hastening development by simultaneously testing

many different candidates and beginning production before they've completed clinical trials."

The Trump regime aims to begin mass vaxxing Americans by yearend or early 2021 — DJT saying, "we're going to fast-track (development) like you've never seen before," failing to add:

COVID-19 vaccinated individuals will risk potentially serious health hazards.

All vaccines are toxic and hazardous to human health. Development usually takes years.

Anything rushed to market at "warp speed" will likely be especially dangerous.

Among other dangers, inoculated individuals will risk becoming ill from the coronavirus instead of being protected from infection by being vaxxed.

Both right wings of the US one-party state are in cahoots with Wall Street and other corporate favorites, notably Big Pharma.

A bonanza awaits firms that develop and market Big Pharma-controlled/FDA approved COVID-19 vaccines, their potential serious human health hazards to go unreported.

A previous article explained that all vaccines include toxic mercury, aluminum, formaldehyde, phenoxyethanol (antifreeze), and squalene adjuvants that weaken and can destroy the human immune system, making it vulnerable to many annoying to life-threatening illnesses.

It's why vaccines can be more hazardous than diseases they're supposed to protect against.

They cause thousands of unreported adverse reactions, including permanent disabilities and deaths.

Their promoted effectiveness is greatly exaggerated. They often prove an unreliable and dangerous way to prevent illness and disease.

Far more important is following proven good health and fitness practices, notably a healthy diet, proper hygiene, no smoking, limited or no alcohol use, daily exercise of the body and mind, along with other good health practices.

Vaccine effectiveness remains scientifically unproven because no double blind studies have been conducted to provide convincing evidence.

Plenty of documented evidence shows their toxicity and hazards to human health. Many promoted benefits about vaccines were later proved false.

Most infectious diseases are effectively treated without vaccines.

Most polio cases were caused by vaccines developed to prevent the disease.

The Salk vaccine was extremely dangerous. He later admitted that mass inoculations caused most polio cases since 1961.

Information about its hazards was suppressed. Declines in the disease were well underway when mass-inoculations began.

Health hazards from vaccines can develop quickly or later in life.

They include arthritis, diabetes, chronic headaches, rashes, anaphylaxis, non-healing skin lesions, seizures, autism, anemia, multiple sclerosis, hepatitis, ALS, cancer, lupus, polio, osteoporosis, Addison's disease, and many others.

Is getting vaxxed worth the risk?

Inoculation with a rushed to market, untested for safety, COVID-19 vaccine will enrich Big Pharma at the risk of straightaway or later in life onset of degenerative other diseases — including damage to internal organs, disability and pain.

When available, COVID-19 vaccines will likely be hazardous to human life and welfare.

It's why they should be shunned to avoid their potentially catastrophic side effects.

When available, they'll be heavily promoted by federal, state, and local governments, establishment media, and Big Pharma with deceptive television ads.

Ignore the deception to preserve and protect your health and welfare by avoiding coronavirus vaccines virtually sure to be hazardous.
