"Turbo cancer" is a non-medical term that has arisen to describe very aggressive and rapidly progressive cancers following Pfizer or Moderna COVID-19 mRNA vaccination and suppression of the immune system.

I have written 14 substacks about turbo cancers so far:

- turbo cancers in Canadian doctors ([click here](#))
- turbo cancer leukemias ([click here](#)) and children ([click here](#)) and ([click here](#))
- turbo cancer lymphoma ([click here](#))
- turbo brain cancer glioblastomas ([click here](#)) and ([click here](#))
- turbo cervical cancer ([click here](#))
- turbo testicular cancer in athletes ([click here](#))
- turbo cancer of appendix ([click here](#))
- turbo sarcomas ([click here](#))
- turbo colon cancers ([click here](#))
- turbo gastric cancers ([click here](#))
- turbo lung cancers

And today's focus is on turbo breast cancers.

South African Mayor, 42 year old Marlene Vermaak Van Staden had a lump after COVID-19 booster shot, it was a stage 4 turbo breast cancer, she died 10 months later on June 5, 2023

Marlene Vermaak Van Staden

CANCER CONFESSION

Morning to all our residents and followers on my Facebook.

I have a confession to make regarding my diagnosis of breast cancer in 2022:

" I initially discovered a lump in my left breast in April 2022

* I went for an immediate doctor App with Dr Jordaan in Modimolle that immediately send me for a mammogram and sonar.

* The radiologist said its nothing to bother about and he suspected a swollen gland or infection from the Covid Booster

* In Augustus I went back to my Dr and sent the lump is getting bigger and I'm having secondary symphony.

* I was then referred to Dr Johan van Heerden at Cintocare hospital in Pretoria

* Dr van Heerden sent me to Capital Radiology at Groenkloof life for a second opinion and biopsy. A few days later, first week in September, I was diagnosed with Triple Negatief Breast Cancer Stage 4

* I then had 16 chemotherapy sessions over 6 months with the last one on 24 February 2023.

* My hair felt out in September 2022 and I have been wearing a wig since then. My toenails felt out as well

* I had to have a double mastectomy operation as well as a type of reconstruction on 19 April 2023

My recommendation to everyone receiving a positive cancer diagnosis is really to try to stay positive and to believe in the almighty God.

Two weeks ago I heard I have meningitis, possibly a side effect of the cancer, have been in hospital for 11 days already but definitely getting better.

I'm still fighting for you and I won't stop being dedicated, hardworking and passionate about our municipality and our ability to bring positive change.

Our sincere condolences to the family and friends of Mayor Marlene van Staden

It is with immense sadness that we mourn the passing of Mayor Marlene Van Staden of Modimolle-Mookgophong Municipality in Limpopo. Marlene was an incredibly dynamic mayor who lived and breathed the DA's values and principles. She will be missed by many.

42 year old Marlene was Mayor of a town in South Africa. She had a COVID-19 booster shot and shortly after, in April 2022 she discovered a lump in her left breast, which was diagnosed as Stage 4 breast cancer in Sep. 2022. She died on June 5, 2023.

Savannah, GA – 35 year old ObGyn doctor Jessica Mullinix died of breast cancer. She “was forced to end her practice in Nov. 2022 after learning her cancer had metastasized” ([click here](#))

Dr. Jessica Miller Mullinix

Dear Family and Friends,

My beloved wife and soulmate [Yee Vonne](#) has been called home to the Lord today.

Yee Vonne was first diagnosed with Breast Cancer in Jul/Aug 2021--just a few months after the birth of our second son. Since then, we have been fighting an abnormally aggressive form of Breast Cancer for the past 1 year and 9 months.... [See more](#)

Ottawa, ON - 41 yo Ontario Provincial Police Constable Colleen Danielle McGrath died on March 21, 2023. She was diagnosed with breast cancer in Nov. 2021 after her employer illegally mandated COVID-19 mRNA vaccines.

Death of an Active Member:

It is with sorrow that I advise you of the passing of **Provincial Constable Colleen Danielle McGRATH #13139** on **March 21, 2023**.

Colleen began her career with the Ontario Provincial Police on June 9, 2008 as a Cadet at Arnprior Detachment.

On December 31, 2009, Colleen became a Provincial Constable while remaining at Arnprior. On October 2, 2017, Colleen transferred to Lanark County Detachment.

On November 30, 2020, Colleen transferred to Ottawa Detachment.

Provincial Constable Colleen McGrath was 41 years old and had been with the OPP for 14 years when she passed away.

My condolences to the McGrath family, friends and colleagues. May you rest in peace.

I knew someone that got a second dose of Pfizer and died 4 weeks later from stage 4 breast cancer, they'd had a routine Pap smear just weeks prior to the second dose and had no issues, the cancer was extremely aggressive, it's pretty obvious what caused it.

I will never forgive the monsters that push the mrna vaccines on everyone.

We thought my niece had beat breast cancer, biopsies did not detect it in lymph nodes.

Doctors insisted she get vaccines, I think she got 4 of them.

Cancer returned and spread through her lung and brain. Blood clots swelled up her arm.

She is now hospicing with only weeks-months to live. She will leave a grieving husband, children, mother, sister, brother, aunts behind.

Damn the a\$\$holes to hell.

“Spike Protein Is Probably One of the Most Toxic Compounds Human Beings Can Be Exposed to”

The harms of spike protein, per Dr. Paul Marik:

VAERS 2003653 – 36F, 2nd Pfizer, 146 days later Stage 3 Breast cancer

VAERS 2064952 – 40F, 2nd Pfizer, 124 days later two breast cancers

VAERS 2072021 – 50F, 2nd Pfizer, pain under left arm after Pfizer injection, lymph nodes swollen, biopsy showed breast cancer

My Take...

Pfizer and Moderna COVID-19 mRNA vaccines are temporally associated with a significantly increased incidence of breast cancers.

- turbo breast cancers are skewed towards younger women
- turbo breast cancer lesions tend to be bigger in size
- they grow faster and have a more rapid course (although this varies widely)
- turbo breast cancers sometimes present with multiple tumors
- patients who had breast cancer in the past and were in remission, are developing breast cancer recurrences after Pfizer or Moderna, which are much more aggressive and often fatal
- a common turbo breast cancer type seems to be “triple negative breast cancer”

- many breast cancer patients were forced to have Pfizer or Moderna mRNA jabs because oncologists didn't realize mRNA could cause or worsen cancer.

Because breast cancer is so common and the presentation is so variable, it may take a very long time for oncologists to recognize.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
