Here is a report on 72 cases of TURBO CANCER in Ages 18-24 in 2023. This is just a small sample of the thousands of tragic stories that are out there:

[Sep. 5, 2023](#) - Woolwich, ON - 24 year old Spencer Ewen was diagnosed with very rare Desmoplastic Small Round Cell Tumor (Sarcoma).

Spencer Ewen fight against cancer

 **Team fundraiser**

Tina Clark and Tracey Marques are organizing this fundraiser.

Profile:

Spencer aged 24 and the love of his life Tina aged 21 got married on July 22 2023 after a 7 year deep relationship that led to their wonderful marriage. While they were on their honeymoon they rushed home to go to the ER due to stomach pains. The pains were thought to be maybe indigestion or perhaps just drinking a bit too much at the wedding festivities. It was less than a week later when they were given a possible Lymphoma diagnosis...but his symptoms just weren't looking like Lymphoma as only a short time passed by. **The young couple met with the oncologist at Grand River Hospital to find out that Spencer has a very rare type of Cancer called Desmoplastic Small Round Cell Tumour.** Because of the rarity of this type of Cancer, there are not many doctors that know about this Sarcoma so the prognosis is hard to determine there is no cure. This beautiful couple

[Sep. 3, 2023](#) – Biloxi, MS – 21 year old Alesia Lockhard is in the US National Guard Reserve and was diagnosed with Stage 3 Rhabdomyosarcoma (rare and aggressive).

21 Year Old Battling Stage 3 Cancer

Alesia Lockhart is organizing this fundraiser.

She was a young woman on her way to a productive life and at this young age she very well should have been. Directly after graduating high school, she enlisted in the U.S. National Guard Reserve where she has now been placed on medical leave.

In May 2023 after weeks of suffering from chronic migraines, severe nausea and whole body pain she was diagnosed with Rhabdomyosarcoma. Rhabdomyosarcoma is a rare type of cancer that forms in soft tissue or sometimes hollow organs. It can occur at any age, but it mostly affects children. Soon after, she started intense chemotherapy at Ochsner Pediatric Cancer Center of New Orleans, Louisiana. After rounds and weeks of treatment,

[Aug. 30, 2023](#) – San Clemente, CA – 22 year old Hailey Pressnell was diagnosed with Stage 3B melanoma.

Help 22 yr old Hailey overcome cancer

Hailey Pressnell is organizing this fundraiser.

Hello,

I'm a 22-year-old who was on the cusp of an exciting new chapter before life took an unexpected turn. This summer was meant to be the culmination of my master's degree journey, and I had exciting plans to move to New Zealand in September 2023 to embark on a new adventure. A job at a geotechnical engineering firm awaited me, promising a future full of possibilities.

Then came August, a month that changed everything. I was confronted with a diagnosis that none of us ever anticipates – **malignant melanoma (skin cancer)**. Immediate surgery was required, leading to two wide excision surgeries on my back and a sentinel lymph node biopsy, during which two of my lymph nodes were removed. The results were not what I had hoped for – one of those lymph nodes tested positive for melanoma, indicating that the cancer had already begun to spread.

At the moment, I'm facing the challenges of Stage 3B skin cancer, a reality that has put a pause on life. Instead of gearing up for exciting endeavors, I find myself navigating the complexities of treatments, uncertainty, and medical bills.

[Aug. 29, 2023](#) – 20 year old UK University student DylanLamb has died. Dylan was told he was in remission from leukemia on July 5, 2022. He had a stem cell transplant Sep. 22, 2022. But his leukemia returned and he was told he had weeks to live.

Mirror

Student told he has weeks to live after going to A&E with lower back pain

University student Dylan Lamb, 20, thought he had pulled a muscle when he complained of back pain, but was later told he had just weeks to live

A student has been told he has weeks to live after going to A&E suffering lower back pain.

Dylan Lamb, 20, first noticed the problems in April last year but thought he had just pulled a muscle.

After getting pain killers from his GP, he went to A&E with his mum, Kim, at the end of the month after the pain became "unbearable".

Days later, he was having chemotherapy after being diagnosed with Precursor T-Cell Acute Lymphoblastic Leukaemia.

Dylan's girlfriend, Phoebe Cole, said: "He had this lower back pain that could have been multiple different things, he thought he had pulled a muscle. We were coming home for Easter and it got progressively worse, he lost his appetite and was being sick.

Following a change in chemotherapy, Dylan was told he was in remission on July 5, 2022. A donor was found and Dylan underwent a stem cell transplant on September 22 and 23 before being discharged on October 6.

Soon after, Dylan began feeling "normal again" and returned to university. But in June this year he started to feel the pain in his lower back once again.

"Literally two weeks ago the lower back pain came back and he said he knows this pain and it felt familiar," Phoebe explained.

"He went back to his doctors at Nottingham City Hospital and asked them to check him over.

"A blood test showed nothing and he went home. He admitted himself into hospital as he wanted an MRI, it showed nothing, and he had another blood test on June 29 which showed his blood cells were inclined.

"He was told the Leukaemia has come back and he has weeks or months left to live. It was a massive shock to the system, especially as we had been told he was fine, not fine and fine again.

"His family are amazing and are supporting him. He is keeping his sense of humour and is being really up beat, but I know deep down he must be scared."

Dylan's only option for life-saving treatment is a clinical trial in America which would involve CAR T Therapy and Base Editing where the DNA of T cells are taken from the donor and re-engineered so they attack only the Leukaemia and not each other.

[Aug. 28, 2023](#) – Meadowbrook, AL – 23 year old Lauren Beck graduated University of Alabama at Birmingham and was diagnosed with AML leukemia and now needs an urgent bone marrow transplant.

Lauren Beck's Leukemia & Bone Marrow Tra

Samantha Shebib is organizing this fundraiser on behalf of Michael Beck.

Created September 13th, 2023 •  Medical

Hi, my name is Dr. Samantha Shebib and I'm a professor in communication at The University of Alabama at Birmingham. Lauren was a previous student of mine, where she took 3 classes of mine within the first 2 years of my employment at UAB. Lauren graduated in the Spring semester of 2023. On August 27th, 2023, Lauren was experiencing some symptoms and went to emergency room in Tuscaloosa, Alabama (where her family resides). By Monday, August 28th she was transferred to UAB hospital. After having a bone marrow biopsy, Lauren was diagnosed with acute myeloid leukemia. She has started 24/7 chemotherapy treatment to see how aggressive the blood cancer is.

[Aug. 27, 2023](#) - Chicago, IL - 19 year old Tyler Fenlon was diagnosed with a very rare Stage 4 Primary Bone DLBCL (with spleen and bone marrow involvement, lytic lesions, extension of soft tissue into spinal canal, etc).

Helping Tyler Fight Stage 4 Primary Bone DLBCL

 Vince Hernandez is organizing this fundraiser on behalf of Veronique Fenlon.

A cancer diagnosis is a life-altering event for anyone, especially for a young adult who is just starting to reinvent himself.

Hello, my name is Vince, and I am creating this fundraiser for my friend Veronique and her son Tyler who was recently diagnosed with stage 4 cancer. Tyler is 19 years old, and he graduated high school in 2022. In September, he moved to Connecticut to continue his

After a week of daily blood work, MRI and CAT scans, biopsies, and waiting. Tyler was transferred to *Smilow Cancer Hospital at Yale New Haven*. Where the bone marrow, bone biopsy, and PET scan results were returned, he was diagnosed with **Stage 4 Primary Bone DLBCL with spleen and bone marrow involvement (diffuse bone metastasis, lytic lesions, an extension of hypermetabolic soft tissue into spinal canal C7-C3)**. The treatment plan is called DA-EPOCH + Rituximab (R-EPOCH). It's 6 to 8, 21-day cycles. Rituximab to start the cycle, then the next four days (96 hours) continuous infusion of Doxorubicin, Etoposide, and Vincristine on the 5th day Cyclophosphamide for 2 hours, and a shot of Neulasta to boost WBC. Then rest and recover. Tyler will check in twice weekly for blood work until the next cycle starts.

[Aug. 26, 2023](#) – Chattanooga, TN – 22 year old Jada Nowell was diagnosed with a brain tumor (Glioblastoma). After several surgeries and treatment failure (tumor is growing again) she is now in the ICU.

Jada Beating Glio

Tiffany Douglas is organizing this fundraiser.

Hello Family, Friends, and kind-hearted individuals who extend their compassion.

We are reaching out to you with heavy hearts but also with hope, for the life of Jada Nowell.

On May 17th, Jada got some really tough news - she found out she had a brain tumor. Just two weeks before that, she started having really bad headaches and couldn't keep any food down. She went to the emergency room, but they thought it was just a bad case of the flu. Even though she kept feeling awful, the doctors initially thought it wasn't anything serious. But when her symptoms didn't get better, she went back to the ER.

On June 8, 2023, she had the surgery, and just a week later, she got more tough news - the tumor was a type called glioblastoma. It's a really serious kind of brain cancer. While Jada was trying to get back to her normal routine of walking and enjoying life, those nasty headaches came back. While she was waiting for a chance to be part of a clinical trial at Duke, which is one of the best hospitals for treating brain cancer, she got even more devastating news - the tumor was starting to grow back.

And then, on August 24th, Jada had to go through another surgery. Right now, she's in the ICU, fighting hard. Let me tell you, Jada is one of the strongest young ladies I've ever known. She's not giving up, and her whole family is right there with her, supporting her every step of the way. That's where you come in.

[Aug. 22, 2023](#) - Melville, NY - 19 year old Kenneth Reidenbach, a 2023 high school graduate with plans to go to College was diagnosed with a large brain cancer (he needed two urgent surgeries lasting more than 6 hours each).

Support Kenneth in his Fight Against Brain Cancer

Laurie Nordby is organizing this fundraiser.

Dear Friends, Family, and Supporters,

We are reaching out to you today with heavy hearts and a deep sense of urgency. Our beloved student, **Kenneth Reidenbach, a 2023 high school graduate, has recently been diagnosed with brain cancer**, and his journey towards recovery has been nothing short of a roller coaster. We are rallying together to support Kenneth and his family during this incredibly challenging time.

Kenneth's diagnosis came as a shock to all of us. The doctors discovered a significant mass on his brain that required immediate attention. He underwent not one, but two grueling surgeries, each lasting more than 6 hours. Thankfully, the skilled medical team was able to remove approximately 95% of the tumor, but the battle is far from over.

We got results we wasn't expecting he got diagnose with
Hodgkin's Lymphoma cancer stage 3 to 4 we are here for him and trying to help him with all
we can. Please share and help with anythung posible. Prayers also. Thanks

My 19 year old son Javon has been diagnose with a mass in his spine they are trying to
determine if it cancer or not he has been in alot of pain. has been admited to the hospital on
8/12/2023 still there waiting to get transfered to see and uncology in a hospital that they
can do the biopsy Unfortunayrly he has no insurance and bills are raking up. Please any help
will help thanks.

[Aug. 13, 2023](#) - 21 year old Hannah Crow is a student at St.Lawrence University in upstate
NY on scholarship. She was diagnosed with Stage 4 Hodgkin Lymphoma.

Help Hannah Beat Cancer!

Hannah Crow is organizing this fundraiser.

Many of our friends and family know that in February 2023, Hannah was diagnosed with an aggressive form of stage 4 Hodgkin's Lymphoma at 21. We wanted to share her story in hopes of some financial help for her medical bills if it's something you are able to.

A little bit about Hannah is that she is an undergraduate student at St. Lawrence University (SLU) located in upstate NY with a full-ride as a Monumentum Scholar. She loves to learn and is on track to graduate Magna Cum Laude (majoring in philosophy and double minoring in education and gender/sexuality studies). Despite challenges, Hannah has thrived at SLU, and during her time there, she's served as an Education Office Aide, Community Mentor, 3-year Orientation Leader, Newspaper Staff Writer, Class 2023 President, and, recently, as the University's Student Body President. To our surprise, Hannah was doing this all while

[Aug. 10, 2023](#) - Jamesville, NY - 24 year old Mya Maloof was attending Nazareth College in Speech Pathology when she was diagnosed with Stage 4 Melanoma. Her mother also has Stage 4 cancer. Mya has died.

Mother (43) Daughter (23) Fighting Stage 4

Celine Antoniou is organizing this fundraiser.

UPDATE:

Thank you everyone for your very generous donations to the Maloof family GoFundMe. It is with very heavy hearts that we share that sweet Mya has lost her battle with cancer, after a very courageous fight. <https://www.catoredcreek.com/obituary/mya-maloof> Please keep the Maloof family in your thoughts, and your prayers coming for her mother Maria, as she continues to find strength and courage to keep fighting this terrible disease.

Our dear sweet friend, Maria Maloof, and her beautiful daughter, Mya, are both fighting their own cancer diagnoses. Besides lots of Prayers, we'd like to help out their family

[Aug. 8, 2023](#) - Portland, OR - 21 year old Dani Franek, a College student studying Optometry, was diagnosed with extensive cervical cancer over 4 areas.

Support for Dani's health recovery

Megan Franek is organizing this fundraiser.

Hi guys I wanted to shed some light on my younger sister Dani's situation. In February of 2023 she was diagnosed with **Cervical Cancer that has spread over 4 large areas of her cervix. Dani is a full-time college student seeking out Optometry,** a dog mom of three, employee to an amazing eye doctor, a girlfriend, and full-time family member. My goal for my sister is to be able to fight through these ongoing surgeries and treatment plan without drowning in hospital bills and risking denial of further treatment she needs due to lack of funding. This is never easy for anyone to ask for help but we do believe in community and the strength that will bring her to beat this cancer. This is a time for fighting, healing and grieving as Dani has been stripped of making some big decision for herself and her future. Getting support for her medical bills, upcoming surgeries and treatment is crucial to her quality of life. Thank you for the genuine love, prayers and support it is invaluable as she is

[Aug. 6, 2023](#) - Chillicothe, OH - 19 year old Dalton Black is a Huntington High School graduate who is starting his first year at Capital University, who was just diagnosed with Stage 3 Classical Hodgkin's lymphoma.

Dalton Blacks battle against Hodgkin's lymph

Sherry Carroll is organizing this fundraiser on behalf of Karen Black.

Hello, my name is Katie and I am fundraising to help cover Dalton Black's medical expenses as he undergoes treatment. Dalton was diagnosed with Stage 3 Classical Hodgkins Lymphoma on July 19th. He will be starting chemotherapy on August 23rd, continuing every other week for 6 months as well as the continued testing. He is a 2023 Huntington High School Graduate who is headed to college to start his freshman year at Capital University. Dalton is committed to the football team at Capital as well but will have to be medically sidelined due to his recent diagnosis. All donations will go towards transportation and the medical bills that aren't covered by insurance.

Please keep Dalton in your prayers as his new journey begins.

[Aug. 5, 2023](#) - Milford, MA - 21 year old Angel Ramirez UConn student who just completed his Junior year majoring in Communication was diagnosed with Stage 4 brain cancer glioblastoma.

Help Angel Ramirez's Fight Against Glioblastoma

Joe Jolicoeur is organizing this fundraiser.

Meet Angel Ramirez, a courageous 21-year-old UConn student, who has just completed his Junior year majoring in Communication and being a member of the SAE fraternity. Angel's journey has been filled with determination and passion, evident from his past experiences as a track runner during high school and his freshman year at UConn.

However, life took an unexpected turn for Angel when he was diagnosed with a brain tumor on June 2nd. Despite the challenging diagnosis of Glioblastoma, he underwent surgery on June 7th to tackle the tumor head-on. Glioblastoma (GBM), also referred to as a grade IV astrocytoma, is a fast-growing and aggressive brain tumor.

Created 1 day ago •  [Medical](#)

Dear friends, family, and compassionate souls,

My name is Noorline Zareh, I am 24 years old. I am overwhelmed by the love and support that surrounds me during this challenging chapter of my life. On June 7th, 2022, I received a life-altering diagnosis of stage 4 gastric signet ring cell adenocarcinoma, which set me on a path of resilience and strength. Since then, I have undergone multiple cycles of chemotherapy, immunotherapy, and extensive surgical procedures, including a

[July 27, 2023](#) - Dover, NH - 22 year old Michael Leger was diagnosed with Lymphoma, he is a University student at UNH in his senior year.

Michael Leger's Fight Against Lymphoma

Lisa Edmonds is organizing this fundraiser.

Created 4 days ago •  [Medical](#)

Hello Everyone,

Our nephew, Michael Leger has been very sick and was recently diagnosed with Lymphoma. Michael is a smart, funny and incredibly focused young man who was supposed to be looking forward to his senior year at UNH. Instead, he will be spending the better part of his senior year enduring chemotherapy to battle this horrible disease.

[July 25, 2023](#) - Burt, MI - 18 year old Allison Flint was diagnosed with 10cm lymphoma tumor between her lungs.

With medical expenses for Allison

Hannah Flint is organizing this fundraiser.

Created 2 days ago •  Medical

My name is Hannah, as many of you may know my sister Allison was diagnosed with lymphoma this past Tuesday, July 25th. She has a 10 cm tumor between her lungs and many affected lymph nodes around her chest. She was sent to CS Mott's Children's Hospital at U of M Ann Arbor and we have been here since undergoing many tests and procedures. Although we are still awaiting an exact diagnosis, they are expecting to start chemotherapy treatment early this upcoming week. As much as my family did not want

[July 20, 2023](#) - Stony Brook, NY - 20 year old Caleb Bowser was diagnosed with Lymphoma, two tennis sized masses in his chest, left thigh. Also has fluid around his heart.

Caleb Bowser's lymphoma treatment

 **Team fundraiser**

Ryan Bertsch and Seth Bowser are organizing this fundraiser.

Created 3 days ago •  Medical

The Brothers of Lambda Chi Alpha are raising money for our brother, Caleb Bowser, who was recently diagnosed with Lymphoma. We are hoping for a quick and easy recovery for our brother Caleb as he is in our thoughts and prayers.

Seth Bowser (Caleb's brother) - First, from my family and I, we would like to extend a large thank you to Brothers of Lambda Chi Alpha for arranging this go fund me on Caleb's behalf. What started as a bacterial infection in Caleb's throat quickly escalated into a larger situation. Wednesday July 19th, Caleb was diagnosed with Large B-Cell Non-Hodgkins lymphoma. He has two tennis size masses in his chest/lung region and cancerous activity in both the abdomen and left thigh area. Additionally there is abnormal levels of fluid surrounding his heart. We are blessed with the detailed care from the Holy Cross Medical Facility. We are treating this aggressive type of cancer with aggressive in hospital chemotherapy treatments. Caleb is a high character, high quality, caring individual. As a brother, son, mentor and friend; he's always willing to lend a helping hand. Caleb is in positive spirits and we are proud of how he is handling this so far. With six specialists and departments working on this case, medical expenses and other fees are and will add up. All donations are highly appreciated, whether \$1, 5, 10, 20 or more. I hope to personally thank each one of you one day. Positive spirits, prayers and smiles sent are way also make a huge difference ! Caleb is not only my brother, but he's my best friend. I am not going to leave his side through this journey. We will get through this together. I could not sum this up and agree any better than the words from Caleb, "F*** cancer, but this isn't stopping me". Big thank you to everyone

[July 19, 2023](#) – Irish football star 18 year old Pauric Brady died suddenly on July 19, 2023.

“after a short battle with cancer” he was diagnosed with in Dec. 2022. Diagnosis to death in 6 months.

Tributes pour in after the passing of Wicklow teen Pauric Brady (18)

The late Pauric Brady (centre right) pictured with his father Martin, mother Avril and brother Ronan.

Eoin Mac Raghnaill

Wicklow People

Fri 21 Jul 2023 at 02:33

The tightly-knit community of Baltinglass was plunged into sadness this week when news broke that popular local teenager Pauric Brady died on Wednesday night aged just 18, after a short battle with cancer.

The son of Avril and Martin Brady, and older brother of Ronan, Pauric was deeply engrained in the Baltinglass community, leaving an indelible mark on students and faculty at his former school Scoil Chonglais, as well as Baltinglass GAA and BaltinglassTown AFC - with whom Pauric had been a player, coach and cherished friend.

The Bradys's world was flipped upside down last December when they were informed that Pauric, who turned 18 last November, had been diagnosed with a rare form of cancer. After further tests, the devastated family were told that the cancer had spread and was terminal.

[See all](#)

Aidan's cancer story:

It came out of nowhere, or so it seemed. The few symptoms he had up until this point were so minute that they raised no major red flags. Nothing that would prepare us for... this. It was three short weeks ago, June 24th to be exact, when I accompanied Aidan to the ER for what we thought was a kidney infection, or stones, or something to that effect. The world basically stopped moving when those CT results came back conclusive and we heard that dreaded word "cancer". They found a very large mass over Aidan's right kidney. It shocked the ER doctors, and us of course, that Aidan was in so little pain at that point and had so few symptoms. The hospital then referred us to Urology. From there we learned the cancer had spread to his IVC vein and surrounding lymph node. At the same time, Aidan's pain started setting in so the doctor ordered a bone scan. That's when things started taking a turn for the worse and became really scary. They found cancer in all of his bones... unbelievably meaning Aidan is in stage 4. It's been an absolute whirlwind ever since. All the symptoms are now hitting him at once. He's been in extreme pain, experiencing nausea and some vomiting, has little appetite and was losing weight rather rapidly. Just a really sick guy overall recently. He's currently inpatient at Children's hospital as they run a battery of tests and scans and try to get his pain down to a manageable level. It's been a really rough few weeks for Aidan and his family; however, we all remain optimistic and positive that Aidan can and will beat this. We do know we have a long, hard road ahead of us, but Aidan is who I call my "overcomer". This kid has been through so much in his 19 years and has used every obstacle and every setback along the way to only better himself. Aidan's birth mom wasn't in the picture much when he was younger due to drug abuse and now sadly, has passed away in 2017. His father has been rather absent and negligent himself the past several years also due to drug abuse. Despite having to grow up fast and with little guidance from his birth parents, Aidan has grown into the most amazing young man. He has this huge heart and is always quick to help those in need around him. He's a gifted student, making honor roll in high school and now excelling in college his first year at Mount Saint Joseph University, despite having to work 30 hours a week at the same time to support himself fully. He's responsible and independent, signing his first lease a few weeks ago with a buddy of his to get their first apartment. He was in his element and absolutely thriving.

[July 8, 2023](#) – England – 21 year old Sophie White was diagnosed with brain cancer Glioblastoma and has been given 1 year to live.

Sophie & Remi - Adventure fund

Chloé Mitchell is organizing this fundraiser on behalf of Sophie White.

My name is Chloé and I'm looking to fundraise for my 21 year old best-friend Sophie and her 14 month old little boy Remi.

On the 8th of June 2023, Sophie had a seizure which no longer than 24 hours later was confirmed to be a cancerous brain tumor. On the 23rd of June she had major brain surgery removing 95% of her tumor. Sophie has almost fully recovered, **only to be told that she has a grade 4 glioblastoma and a one year life expectancy**. Sophie will have intensive treatment which will hopefully shrink the remaining 5%. This type of cancer is not curable, but is treatable which could help prolong her life.

[July 7, 2023](#) – Manassas, VA – 24 year old Christian battled a late stage germ cell cancer (testicular cancer) that invaded his organs within weeks, leading to his death.

Christian's Funeral Expenses

Brenda Padilla is organizing this fundraiser.

Hi everyone, it is with extreme sadness and resignation that we are making a GoFundMe page for my nephew, Christian. He passed away July 7th, 2023 at Inova Fairfax hospital after fighting a tough battle against late stage germ cell cancer. Christian was 24 years old and in a matter of weeks the cancer invaded his organs. Christian had a whole life ahead of him and it was cut short—leaving us all heartbroken. Although Christian was always reserved and quiet, he enjoyed the small things in life. He enjoyed the beach, pizza,

More than a fundraiser, it is my most sincere wish that one day people in our country can seek and receive medical care without the fear of not having health insurance and the cost associated. Testicular cancer has a 97% rate of treatment success. Our Christian fell into the unfortunate 3%. We hope other families, particularly young males ages 15- 34 educate themselves on this type of cancer, speak up early and get checked to avoid the same fate.

[July 7, 2023](#) - Pittsburg, TX - 21 year old Emily Duncan was diagnosed with Stage 4 Colon Cancer. Emily's family was given the grave news July 3rd that they would need to bring Emily home for end of life care. Emily was discharged on July 4th and is currently under Hospice.

Emily Duncan

Friends of Emily Duncan is organizing this fundraiser on behalf of Curtis Duncan.

Emily Duncan, 21, was diagnosed with Stage 4 Colon Cancer on May 22, 2023, and has spent the last month at MD Anderson in Houston. As we all have prayed and continue to pray for healing and a bright outcome to prevail, Emily's family was given the grave news July 3rd that they would need to bring Emily home for end of life care. Emily was discharged on July 4th and is currently under Hospice.

While Emily's time is very limited, her spirit will forever endure in the hearts of those who have been touched by her remarkable presence. Her kind heart will be cherished and remembered as a beacon of hope, love, and a testimony of unwaveringly faith.

Help Peyton Kick Cancer in the Balls!

Kate Riley is organizing this fundraiser on behalf of Peyton Rowe-Gamez.

Hi everyone, my name is Kate Riley. Peyton Rowe-Gamez is my boyfriend of 5 years and a friend to many. In late May 2023, Peyton was very unexpectedly diagnosed with **Stage 3c Testicular Cancer** after an ER visit for what we thought was appendicitis. It has spread to his **lymph nodes, spine, and lungs**. Peyton had his primary tumor as well as his appendix removed in early June.

[July 6, 2023](#) - Manchester, TN - 21 year old Brianna Stacey was diagnosed with Hodgkin Lymphoma.

Bri's Battle with Hodgekins Lymphoma

Team fundraiser

Brianna Stacey and Kimberly Stacey are organizing this fundraiser.

Hello. My name is Brianna Stacey and I am 21 years old. I was diagnosed with Hodgekins Lymphoma 7/6/23 after spending a week in the hospital and having one of my Lymph Nodes in my neck surgically removed for biopsy. I am creating this GoFundMe to help support travel expenses and bill expenses as my family is here for me. I'm a fulltime student at love beauty school in my town and that dream is on hold right now as I navigate this illness. My treatment will be an hour away each time I have to go and that gas adds up very quickly. Every little bit helps as myself and my family go through this extremely rough time. Thank you so much and have a very blessed day.

[July 6, 2023](#) - Potomac, MD, 22 year old Andrei (boyfriend of Gabriela Novoa) is a philosophy student in University, was diagnosed with Stage 3 Classical Hodgkin Lymphoma. PET scan he had at the end of chemo showed he had NEW cancerous tumors created during the treatment process!

Help Andrei beat Cancer

Gabriela Novoa is organizing this fundraiser.

Hello, my name is Gabi. Many of you know Andrei, my boyfriend. Who I take care of on a daily basis, he is 22 years old philosophy student, we work in restaurants to pay for our university expenses and daily living

On September 15, 2022, he was diagnosed with cancer, stage III classical Hodgkin lymphoma. Throughout these six months we have put our lives on pause, including education, to complete 12 sessions of chemotherapy. Unfortunately, the positron emission tomography (PET) scan he had at the end of that treatment showed that new cancerous tumors were created in the treatment process. This makes his case much more complicated and his new diagnosis is primary refractory Hodgkin lymphoma.

[July 6, 2023](#) - Lakeland, FL - 19 year old Ali Cardenas was diagnosed with ALL leukemia.

Fighting Against Cancer !

Ali Cardenas is organizing this fundraiser.

hi i am ali cardenas i'm 19 years old, a happy playful person, and if many of you don't know i have been in the hospital since june 30th 2023 & diagnosed with TALL ACUTE LEUKEMIA, please don't feel sorry for me, because i know there is nothing the lord can't heal, during may 31st i lost insurance & then june 4th i went to the hospital for a shortness of breath & headaches, they just gave me medication & let me go home, then may 7th i seen a few concerns on my body like bruises & red spots, it went on for a few weeks because i didn't

[July 3, 2023](#) - Jackson, NJ - 24 year old Jillian Cillo was diagnosed with triple negative breast cancer and needed an aggressive treatment plan.

Jillian's fight against breast cancer

Team fundraiser

Justine Samson and 2 others are organizing this fundraiser on behalf of Jillian Cillo.

Hi, my name is Justine, and my sister Jessica and I are fundraising for our younger sister, Jillian.

Jillian was diagnosed with triple-negative breast cancer in March 2023 at 24 years old and has started an aggressive treatment plan. Since being diagnosed, she has already had surgery for her chest port and has started weekly chemotherapy for the last ten weeks. Once she completes 12 rounds of her first chemo regimen, she will continue with another round every three weeks for four treatments, completing 16 rounds of chemo before undergoing major surgery!

[July 3, 2023](#) - Worcester, MA - 22 year old Josiah Begor goes Clark University in Worcester MA was diagnosed with an unknown cancer that spread faster than oncologists expected.

[July 2, 2023](#) - Osprey, FL - 20 year old Ciara Tomlinson, a junior at Florida State University was diagnosed with a 3.5cm brain tumor Diffuse intrinsic Pontine Glioma and was given 6-9 months to live!

Help Support Ciara In Her Fight Against Cancer

\$53

788

June Tran is organizing this fundraiser on behalf of Ciara Tomlinson.

On June 16th, 2023, 20 year old, Ciara Tomlinson's life would be changed forever. Ciara is a rising junior at Florida State University. She has been on the Deans list since attendance of college and a sister of Pi Beta Phi.

Ciara Tomlinson had been a perfectly healthy and joyous child growing up, until the end of 2022. She first started experiencing dizzy spells, followed by constant nausea, throwing up bile every morning, double-vision, slurred speech, and recently, partial facial paralysis and weakness of voice. We sought help from doctors for 7 months. We pleaded for tests to be ran and scans be done. Bloodwork was conducted on multiple occasions and a ct scan was performed during Ciara's spring break. All in which was found to be cleared and normal. She was thought to have vertigo to which an ENT specialist said what she has is not vertigo. Thereafter, doctors diagnosed Ciara with anxiety and depression as everything else was normal. Months went by and the symptoms did not improve. Ciara finally started having partial facial paralysis. Upon further advocacy and pushing for answers we demanded a MRI be performed.

June 16th Ciara received a call from her physician that every parent dreads. She needed to be driven to the emergency room immediately as a tumor was found in her scans the day prior. After further investigation from neurosurgeons at Sarasota Memorial Hospital and Shands Hospital in Gainesville, it had been confirmed that Ciara has been living with a 3.5 cm tumor growing in the middle of her brain stem in the 4th ventricle. Due to the location of the tumor, doctors ruled the situation to be inoperable. The exact type of treatment cannot be planned as the type of tumor was not discernible unless a brain biopsy is performed. A brain biopsy was then performed and the pathology report noted that the tumor is Diffuse intrinsic pontine gliomas (DIPGs). The result was a devastating result as the prognosis is a 6-9 month life span. Radiation has been the proposed solution. 6-8 weeks of radiation, Monday through Friday. Another option is to participate

[July 1, 2023](#) - UK - 18 year old Bradley Stout Miller was diagnosed with Hodgkin Lymphoma after he began rapidly losing weight without explanation.

Teenager thought he was just tired before he being diagnosed with rare cancer

Former carer Bradley Stout Miller, from St Helens, was diagnosed with Hodgkin Lymphoma after he began rapidly losing weight without explanation

By James McNeill & Sean McPolin

10:54, 1 Jul 2023 | UPDATED 10:56, 1 Jul 2023

BOOKMARK 

A teenager who couldn't get out of bed thought he was just tired from work - but actually had cancer.

Bradley Stout Miller, 18, found out he had **Hodgkin Lymphoma** in September after his mum forced him to see a GP when he was wasn't able to get up.

The former carer began losing weight at an "alarming rate" and was described as a happy teenager with a full social life.

[June 28, 2023](#) - Boca Raton, FL - Jamie Sabeeney is a Lynn University senior, studying Early Childhood Education and will begin graduate school in May 2023. She was just diagnosed with Hodgkin Lymphoma.

Support for Lynn University student, Jamie!

👥 Team fundraiser

Lauren Campbell and 2 others are organizing this fundraiser on behalf of Jamie Sabeeney.

Hi everyone! My name is Lauren Campbell and I work in the Office of Admission at Lynn University. We recently learned that one of our Student Admission Ambassadors, Campus Visit Experience interns, and Lynn University senior, Jamie Sabeeney, has been diagnosed with Hodgkin's Lymphoma. Jamie is studying Early Childhood Education and will begin graduate school in May 2023. For those that know Jamie, she is the kindest, most positive team member and friend! She has the biggest heart and is always excited to come to work, represent Lynn, and make an impact on prospective students. With a big support system behind her, we are confident we will help Jamie beat cancer.

[June 15, 2023](#) – Mount Shasta, CA – 22 year old US Navy Sailor Maxwell Haban, is currently serving as a Nuclear Mechanic. He was diagnosed with metastatic cancer (not specified, lump on his chest).

All for Max cancer support

Elizabeth Darrah is organizing this fundraiser on behalf of Teri Haban.

Saving our Sailor For Max My name is Teri Haban. My husband Milan and I received some very devastating news about our 22-year-old son Maxwell Haban. Maxwell is currently serving in the U.S. Navy as Nuclear Mechanic. Max had noticed a lump on his chest two weeks ago and decided to get checked out with the Navy Doctor on his base. The doctor sent Max in for a CT and Sonogram, and the results were unbelievable. Max has cancer with metastasis. As I write this, he is preparing for an MRI and Biopsy. Max has always wanted to be part of the military. Maxwell joined the Navy on his 19th birthday, in 2020. He went through bootcamp and Nuclear Training and Power Schools.

He went through bootcamp and Nuclear Training and Power Schools. He became Captain his Senior year. That same year, his team won their division and brought a pennant home. My husband, Milan, suffered a massive heart attack in January 2022. By some miracle, he survived this. His doctors were able to save him, but his heart is still very weak. Milan hasn't been able to work since this life changing event. He is getting stronger every day, but he is still not where he would need to be. We are a family of 6. We have just one income. Max has three siblings, two are in school and working part-time, and the other is working. Our kids still live at home. As we consider our current financial situation, time off from work, and limited income; we have come to the realization that we needed to reach out to our community and ask for support. Milan and I are asking for your donations to help us to provide support and care to Max as he

[June 14, 2023](#) - Metairie, LA - 20 year old Bryan Ibanez is a student at Missouri State

University, in Sep.2, 2022 he was diagnosed with Stage 2 testicular cancer which turned to Stage 4 with lung metastases by May 1, 2023.

Bryan's Fight Against Testicular Cancer

Leslie Ibanez is organizing this fundraiser.

Dear Reader, I'm Leslie Ibáñez and this fundraiser is to support who I refer to as my sweet baby brother. Bryan Ibáñez is the goofball of our family and has always been a positive light for himself and others. His loving soul and genuine spirit is one my entire family cherishes.

Bryan spent his high school years working at a local nursing home as a dedicated CNA. This time spent giving to others in a healthcare atmosphere sparked his interest and desire to become a nurse. In 2020, after graduating high school, Bryan enrolled in Missouri State University to pursue his nursing degree. Shortly after starting his college career, Bryan began experiencing discomfort in everyday tasks. Having a busy and active lifestyle of a college freshman, Bryan thought he could work through his pain and assumed it was nothing serious.

Unfortunately, Bryans pain did not cease and escalated to a point where he finally chose to visit a doctor. Upon discovery of a tumor, Bryan was diagnosed with Stage II Testicular Cancer on September 2nd, 2022 at only 20 years old. With a Stage II Diagnosis, Bryans tumor had been manifesting for what doctors predicated well over a year. In attempt to avoid metastasis, immediate surgery called a radical orchiectomy was required and conducted shortly after diagnosis. Following surgery and testing, Lymphovascular Invasion (LVI) was still present in his body. Although removal surgery was completed, Bryan's cancer cells were still present in his tests leaving his body susceptible to a potential reoccurrence. However, with a treatment plan set into place Bryan & his doctors were left confident for an encouraging recovery even with the LVI still apparent in his blood stream.

Bryan's initial surgery was not fully covered by insurance, and he was forced to pay over 8k in medical bills out of pocket. As a college student living on server's wages, paying his own bills and supporting himself, he was forced to abandon school to make ends meet. Bryan is still trying to pay off those bills to this day.

Following his strict treatment plan, Bryan visited the doctor as needed and within the parameters of his abilities. Blood tests over the next few months resulted in promising outcomes, but unfortunately his 1st biannual CT scan did not reflect such positivity.

On May 1st, 2023, CT Scan results concluded that Bryan's cancer had metastasized.

Alarmingly—not one, but two tumors had developed; this time in his lungs. His doctors recommended immediate chemotherapy treatment. Bryan's chemotherapy treatment has

[June 10, 2023](#) – Lancaster, PA – 21 year old Savannah Byers is in her senior year of College. She was diagnosed with Hodgkin's lymphoma.

Let's help Savannah Kick Cancers Butt

Mandy Byers is organizing this fundraiser on behalf of Savannah Byers.

Hi my name is Mandy, but my most important title is Aunt Mandy. We found out last week that my beautiful, smart, funny and amazing niece has Hodgkin's Lymphoma. She just turned 21 and is going into her senior year of college. She's been on the Deans list every year and is the head captain of her college volleyball. She lives in Lancaster PA but goes to college in Pittsburgh PA (about a 5 hour drive one way). She'll need to come home twice a month for chemotherapy. She needs a safe, reliable car to get her from the doctors to school.

[June 10, 2023](#) – Fort Lauderdale, FL – 22 year old Rohan Noel is in his final year in Florida State University when he was diagnosed with Classical Hodgkin Lymphoma. Had to withdraw from school.

Help Rohan Cancer treatment

Shauna Campbell is organizing this fundraiser.

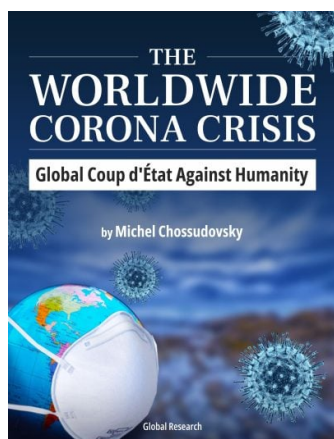

Hey my name is Shauna and I'm fundraising for Rohan Noel to assist with cost of chemotherapy, possible radiation therapy, and other medications. Rohan was finishing his final year as a student at FLORIDA STATE UNIVERSITY with 1 semester remaining and Graduation date set for 8/5/23 with a bright future ahead. Rohan had no choice but to withdraw from school to face his battle with CANCER causing all his hopes and dreams to come to a pause to deal with this disease. After multiple doctors appointments and numerous testing and scans beginning 2/7/23; on May 12, Rohan was diagnosed with Classic Hodgkins Lymphoma (a form of blood cancer). Through it all Rohan remains positive , upbeat and determined to fight this disease. Any donation will be greatly appreciated and will be a blessing to Rohan. Thank you in advance and may

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
