Oct. 21, 2023 – Clarksville, TN – 40 year old Rayne Williamson died after a 2 year battle with synovial sarcoma which was diagnosed in June 2021 when she was pregnant with twins.

- On March 31, 2021, Rayna did IVF with 2 embryo transplants and started having difficulty breathing
- In June 2021 she was told she was expecting twins, but also told she had a lung mass that was diagnosed a Synovial Sarcoma and was surgically removed
- In Oct. 2021 she was diagnosed with brain metastasis "the size of a racquetball" which was surgically removed Nov. 2, 2021.
- Nov. 29, 2021 she started 6 rounds of chemo
- Dec. 23, 2021 her twins were born
- May 11, 2022 she had lung surgery for a 2nd lung tumor.
- Sep. 6, 2022 she had another new lung mass, surgery Dec. 31, 2022.
- Oct. 30, 2022 she did a 3 week stay in Mexico at an alternative medicine clinic
- March 2023 she had more chemo, radiation ending in May 2023.
- Doctors at MD Anderson said she may have years still to live
- She died on Oct. 21, 2023

[Nov. 3, 2023](#) – Bremen, GA – 30 year old Hannah Hill was diagnosed with a massive sarcoma of the right lung. She has a 5 month old, who seems to be doing fine. She is currently responding to chemo after 1st type of chemo didn't work.

Hannahs Fight Against Cancer

Hannah Hill is organizing this fundraiser.

Hannah Hill

Bremen, GA

My name is Hannah and I am a wonderful wife to Dalton Hill and a mother to two amazing little humans; Archer (4 Years old) and Syllas (5 Months old).

I am making this GoFund me in hopes to alleviate some of the financial burdens from my family and that of my support team who have been so gracious. My Mother, Father, Sister, Grandmothers, Aunts, Cousins, and everyone in between are all rallying around me—because unfortunately on **March 13, 2023 I was diagnosed at the young age of 30, with what we first thought was breast cancer and a partially collapsed lung that holds a tumor. It turns out it's not breast cancer and is actually a soft cell cancer that has formed a massive sarcoma in my right lung.**

Nov. 2, 2023 – Asheville, NC – 21 year old Hannah Raines was diagnosed with relapse of Ewing sarcoma while 30 weeks pregnant, in August 2023.

Hi, my name is Abby Raines and I am starting a fundraiser for my sister Hannah who is 21 years old who just found out she had relapsed with Ewings sarcoma cancer for the third time and cancer overall for the fourth time. Not only did she relapse she was 30 weeks pregnant and had to have an emergency c-section and had a beautiful daughter kailani who also had a few issues with her lung where they had to stick a needle in her daughter of just two days old. Kailani is one of two children she has. She also has a son who is a year old and both children will be badly affected by her being away for treatments in Memphis Tennessee where she has been treated before for her cancer. The money we are raising will go towards her traveling expenses and her kids.

[Oct. 20, 2023](#) - New Martinsville, WV - Larissa is 10 weeks pregnant and she was diagnosed with recurrence of Stage 4 Ewing Sarcoma.

Help Larissa get a car to get to treatment

Sadie Proctor is organizing this fundraiser.

Sadie Proctor

Organizer

New Martinsville, WV

Hi everyone, I'm trying to help my boyfriends sister raise money to get a car and money for gas to go back and forth to treatment. Shes a single mom with a 4 year old daughter and She's 10 weeks pregnant and was just diagnosed on 10/20 with reoccurrence of stage 4 Ewing sarcoma. It's in her pelvic pressing her sciatic nerve causing her severe pain. The tumor is 6 inches pushing her bladder and uterus out of place and engulfing and artery. She has lots of appointment coming up in Morgantown for pain management, chemo, and surgery's. This is her second time fighting this and she doesn't have a car to make it to her appointments. Larissas mom has been taking her back and forth to her appointments, but she has a full time job and four kids at home and it's hard on her.

Created October 24th, 2023

[Oct. 19, 2023](#) - Sioux Falls, SD - Savannah Dickelman was diagnosed with cancerous tumor while 5 months pregnant in Nov. 2021, but received a diagnosis of leiomyosarcoma only in Jan. 2023.

Savannah & Her Family Fight Extremely Rare

Kristi Butler is organizing this fundraiser on behalf of Heath Dickelman.

Kristi Butler →

Organizer

Sioux Falls, SD

We are Rob and Kristi (friends of Savannah & Heath) and we are asking for help from our family, friends and communities to assist Savannah and Heath through the following journey they have been navigating, very bravely, over the past year and a half:

In November of 2021, Savannah noticed a mass in her side. Through initial doctoring, they discovered a miracle - Savannah was 5 months pregnant with their 3rd child. After more scans, the mass was still in the abdomen and at the time thought to be nothing more than a fibroid. The pregnancy was monitored, and they got a healthy baby boy, Axel on April 20th, 2022.

Post-delivery is when her life forever changed.

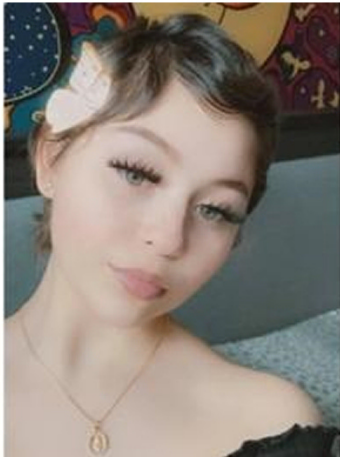

A biopsy of the mass, which would only be done after the baby was delivered, came back as a cancerous glomus tumor. A direct referral to Mayo Clinic in Rochester, MN soon became the next fight.

On January 10th, 2023, Savannah was diagnosed with Leiomyosarcoma (LMS), which is an extremely rare, soft tissue cancer that accounts for less than 1% of all adult cancers. Unfortunately, there is no cure for this rare cancer. However, Savannah continues to fight each and every day. She continues to care for and mother her and Heath's three beautiful children: Hadley (12), Eason (10) and Axel (15 mos.).

October 19th, 2023 by Kristi Butler, Organizer

We also had a chance to meet with the radiologist and got some mixed news. The initial radiation on the 3 spots in the brain did work and hit the center of the cell and it showed that the tumors were dying from within. Unfortunately, before the radiation took out the center of the cell, there were some cancer cells that escaped and spread to some different parts of the brain. We also found that there was a recurrence in the abdomen, a new spot in the leg and one in the lower back.

[Oct. 1, 2023](#) – Kansas City, MO – 17 year old Aria Mia Gonzalez had Ewing Sarcoma when she was 13 but she was in remission since. In May 2023, when she was 30 weeks pregnant, she was diagnosed with sarcoma cancer recurrence and died quickly on Oct. 1, 2023.

Ari Ella is organizing this fundraiser on behalf of Ada Camaraza.

In loving memory of Aria Mia Gonzalez, a beautiful free spirit who left the world at the tender age of 17. May her memory continue to inspire and uplift us as we

[Oct. 3, 2023](#) – Anna Taylor was diagnosed with Rhabdomyosarcoma of the right orbital socket during pregnancy. Her cancer is spreading rapidly and is deemed terminal. Recently it has metastasized to her lungs.

Please Help Save My Daughter In Law's Life

Team fundraiser

Alan Taylor and Stacie Taylor are organizing this fundraiser.

Alan Taylor

Organizer
Seabrook, TX

Hi, my name is Alan.

I am the father-in-law of a beautiful young woman. She is a loving wife, and a wonderful mother of 2 (ages 1 and 2). 1 year ago, Anna was pregnant with their 2nd child when she started having major headaches and losing vision in her right eye. The ER doctors were ignoring the symptoms and kept sending her home. Finally, after she woke up completely blind in her right eye, the ER doctors agreed to perform an MRI only to discover a tumor in her right sinus that was pressing on the right orbital socket. The tumor was crushing the optic nerve and surrounding the right artery to the brain. After several days of waiting for the doctors to do something my son, Aaron, checked his wife out of Houston Methodist and took her to Memorial Herman where the OB ER staff immediately jumped into action. They set Anna up for an emergency C-section and, after delivering their son at 36 weeks, performed a biopsy and partial removal of the tumor. The tumor turned out to be an aggressive form of adult Rhabdomyosarcoma

The surgeons now deemed the tumor as in-operable. The doctor has given Anna 12 to 24 months to live and they have stated the cancer is terminal and that she should be enrolled in

October 3rd, 2023 by Alan Taylor, Organizer

Update on my daughter in law, the cancer has metastasized and is now in her lungs. Annazette's doctor has stopped treatment until she can be seen by a pulmonologist. It's been hard for Annazette to take care of the kids by herself. She's just been too tired. The

[Sep. 16, 2023](#) - UK - 45 year old Sabrina had a complicated pregnancy and had to be delivered at 31 weeks because "blood flow to her baby was slowing down". She was diagnosed with Stage 4 Synovial Sarcoma of her lung.

Please help to get Sabrina her last wish

Sabrina is 45 with 4 beautiful children, Kenneth, Carrie, Dylan & Billie. Whilst pregnant with Billie she started to experience severe back pain & was back & fourth to the hospital, finally being diagnosed with pneumonia, a few weeks later at 30 weeks pregnant Sabrina was admitted to hospital in severe pain. She was very unwell at this stage & ended up being transferred to ICU being told on the day she turned 31 weeks pregnant "17.06.2023" that her wee baby was going to be born that they needed to deliver her as the blood flow to her baby was slowing down & Sabrina was very ill. Sabrina was then put into an induced coma, she had CT scans & the doctors said they are so glad they did not go into the lung in surgery as they knew there was something wrong. They transferred to the Royal Victoria Hospital to a lung specialist for them to have a further look into see what was going on at this stage they suspected cancer & also needed to drain the fluid from her lung, while her new baby stayed in Craigavon Area Hospital.

On the 29th of June they took Sabrina to theatre to put a drain into her lung & take the biopsy. A few days later she was moved back to Craigavon to be with her new baby so she could spend time with her whilst waiting on the results.

On the 5th of July Sabrina was diagnosed with Synovial Sarcoma on her lung with a possibility on her liver this is terminal & the outlook on time isn't great either. They have said it will be 1.5 years at a most but they don't think Sabrina will last that long.

Sabrinas lifelong dream was to take her 2 sons to Japan so here's my plea to raise some money to give her, her last wish & her boys some memories to treasure of their last few months with their mum. Even the smallest donation will be greatly appreciated.

Created July 27th, 2023

[Sep. 1, 2023](#) - Harlingen, TX - Aaliyah was diagnosed with recurrence of Osteosarcoma during 2nd pregnancy (initial diagnosis was 2 months postpartum after 1st pregnancy). She had her leg amputated "so she can finally live a normal life with her boys". Then baby Khaza was born and Aaliyah began suffering from neck and back pain - there are now several tumors in her neck and back. Stage 4.

Minnie Torres is organizing this fundraiser.

**I would just like to thank everyone who has donated to my daughter's expenses. I appreciate it so much. **

This is my Daughter Aaliyah...

<https://www.tiktok.com/t/ZT8YtnMhs/>

Our baby was having a baby... Its a boy... 22 years old...

However 2 months postpartum Aaliyah had severe pain, and swelling in her right leg and on 12/21/2021 she was diagnosed with Osteosarcoma (an extremely rare cancer that affects less than 1,000 people a year in the US and that originates in the bone forming cells.)

Aaliyah went through extensive chemotherapy and underwent surgery to remove the tumor and was SUCCESSFUL! As she began to finally live a semi normal life she got pregnant with

her second son and began to feel uneasy about her leg and when they went in for a followup she got devastating news that the cancer had come back. Since she was pregnant and in excruciating pain she made the decision to have her leg amputated so she can finally

live a normal life with her boys, then baby Khaza was born and we were overhwhelmed with joy, however Aaliyah then began suffering from neck and back pain. The pain was so severe she went to the hospital to see what was going on. The doctor then told her "i cant give you anything, you removed the cancer in your leg so (and i quote) POOF cancer is gone"!

Desperate to know why she was in so much pain she went back again and when her MRI results came in she got the heartbreaking news that she has serveral tumors in her neck and back.

[Aug. 22, 2023](#) - Canberra, Australia - 29 year old Rachel Dojcinowski was diagnosed with sarcoma in Jan.2023 a couple of months after giving birth to a preterm baby who has had very serious complications.

Help the Dojcinowski family !

Hi everyone,

My name is Rachael or you can call me Rach I'm 29 years old currently living in the capital of Australia (Canberra).

Unfortunately January 2023 our hearts sunk and I was diagnosed with stage 1 sarcoma and urgently needed surgery to remove it, I ended up needing 4 surgeries in total which doctors removed the sarcoma best to their abilities.

Even though I had the surgeries chemotherapy was still needed and after 5 cycles completed I was due for my last chemotherapy which I thought was the ease of this chapter

October 15th, 2023 by Rachael McGrath, Organizer

hi everyone,

Just giving a little quick update !

I have another surgery soon and it's a major surgery so I'm very nervous but know it's better to have the surgery and play safe then not too.

Some of you may not know but Archie my youngest was born preterm a year ago and with serious complications and he's had a lot of life changing appointments lately and I've just been trying to focus more on him he's doing okay but he has a long road still ahead of him but anything he's shown anyone he's a fighter !

[July 15, 2023](#) - Roseburg, OR - Samantha's baby was diagnosed with severe skeletal dysplasia and smooth brain. Baby was born and died on July 2, 2023. Samantha was then immediately diagnosed with Stage 4 Sarcoma of her thigh that has spread to her lungs.

Andrea Hansen is organizing this fundraiser.

Andrea Hansen

Roseburg, OR

On June 29th, 2023, Samantha and Anthony, while getting a routine ultrasound, received the news every expecting parents fear getting. The doctor doesn't like what they are seeing and there may be an issue with their growing baby boy. In the meantime Sam has been having some problems with a lump she found on her thigh. The doctors sent her up to OHSU for some further testing on both her and her baby. On June 30th their lives changed forever when they received the news that their baby boy was suffering from a severe case of skeletal dysplasia along with smooth brain. This meant he could not be carried to full term. Jaxson William James Brown was born then peacefully passed away on July 2nd, 2023 at 12:50pm. Two parents lost a son and two beautiful girls lost a brother.

As if this wasn't devastating enough they received the results from Sam's tests and it was determined she has Stage 4 Sarcoma in her thigh and it, unfortunately, has spread to her lungs. Family and friends are rallying around this family as best they can. As expected, they need help financially with expenses related to travel to and from OHSU where she will be meeting with her physicians and receiving treatment. Anything you can do to help this grieving family would be greatly appreciated. The last thing they should be worrying about is expenses.

[Dec. 5, 2022](#) - Colleen was diagnosed with Clear Cell Sarcoma of the knee during second trimester of pregnancy in early 2022. She delivered a baby in June 2022. She did not respond to therapy and died shortly after on Dec. 5, 2022.

Kiley Hilderbrandt is organizing this fundraiser on behalf of Justin Montague.

For those lucky enough to know Colleen knew a tenacious, witty, fun-loving woman and an incredible mother, sister, daughter, granddaughter, friend, and wife who touched every heart she encountered. But for those who didn't get the opportunity, I feel her story should be told.

Last January, while entering her second trimester of pregnancy, Colleen noticed that a spot in her knee that she had had since childhood started to become bothersome. Unfortunately, after imaging and biopsies we found out that it was a type of cancer called Clear Cell Sarcoma. With her family and friends' support she underwent surgery to remove the cancer and made the hard decision to not do radiation therapy as there was an increased risk to their unborn baby. Thankfully, in June she was able to deliver a healthy baby girl, Sophia. Shortly after that, the pain returned and the cancer had again reared its ugly head and this time it had spread to her lymph nodes. With her medical team's advice, she started immunotherapy to hopefully extend her life. However, after three rounds of treatment we learned that the therapy had not worked as we had hoped and the decision was made to bring her home to her friends and family with Hospice.

Colleen fought so incredibly hard and was unbelievably brave every step of the way. In the end she was at home surrounded by her family, the people she loved most, and was

Colleen Montague, age 30, of Murphysboro, formerly of Athens, IL, passed away at 6:20 PM on Monday, December 5, 2022 at home. She was born on April 12, 1992 in Wichita, Kansas to Patrick and Julie (Brecht) Mapes. She married Justin Montague on November 21, 2015 in Las Vegas, NV. Dec 5, 2022

May 3, 2022 - Alsip, IL - Stephanie Hermann was diagnosed with sarcoma in her toe while pregnant. She had it amputated. After the birth of her baby, the sarcoma returned

aggressive.

Help Stephanie kick cancers @\$\$

 **Team fundraiser**

Samantha Casillas and Christina Hermann are organizing this fundraiser on behalf of Stephanie Hermann.

Created May 3rd, 2022

Stephanie is one of my best friends and is currently going through a rough journey. During her pregnancy she found out that she had stage three sarcoma in her toe. They amputated her toe and continued to monitor until after her pregnancy. In January a few nodules popped up, but were too small to biopsy. Last week Stephanie rushed to the emergency room because her incision split open. The cancer is growing back and very aggressively causing her with a very painful open wound/infection.

She's currently at home resting with her beautiful baby boy, Hunter. She's unable to work currently due to the situation and the last thing I want her to worry about is how she's going to feed and diaper her baby. If you could donate, please do, seriously any amount would mean the world.

[March 2022](#) - Everett, WA - Jackie Nishimura was diagnosed with Alveolar soft part sarcoma while pregnant with her daughter.

Early this year she learned that she was pregnant and having a girl. The first granddaughter on my Brother-in-Law Chad's side. During the last few months of her pregnancy, she was feeling pain in her back and hip, but it was considered normal pregnancy pains. Then a few months ago she had started coughing up blood and having chronic coughs. Again they attributed it to her pregnancy and saying it was caused by her acid reflux and her bouts of vomiting after eating certain meals. So we soldiered on, that was till October 1st and she started having a hard time breathing. We rushed her to the hospital, and they did a chest x-ray and found a few nodules in her lungs, one of which is 2.5 centimeters in diameter and near her airway. This now requires her to use oxygen which they have set up at home. While examining her they also noticed she had a lump on her hip. Concerned for my sister and the baby, they delivered baby Jennavieve a month early.

They then performed a full-body CT Scan and that is where they discovered what looked like a tumor on her hip and a lesion on her spinal column. My sister had a few more test they wanted to run, and after the results from the biopsy of the lump came in on October 9th they delivered the news. They are concerned it is a Stage 4 Sarcoma and they sent her samples to the Mayo Clinic. We have a preliminary diagnosis from the Mayo Clinic. Jackie has Alveolar soft part sarcoma, a very rare type of cancer. Her oncologist wants to be as aggressive as they can be, she starts phase 1 of radiation on October 21. After radiation, she will begin targeted chemotherapy. Unfortunately, there is not a Sarcoma specialist in Hawaii, so her Doctors want to refer her to a specialist in Seattle. She has healthcare from her job, but it'll only cover 20% of the cost of Cancer Treatments. That's why we decided to reach out socially, and ask for assistance.

Baby Jennavive is doing fine and they have been home with us for a couple of weeks now.

My Take...

Pfizer & Moderna COVID-19 mRNA Vaccines cause aggressive cancers caused "Turbo Cancers".

The top 5 most common are: lymphoma, glioblastoma, breast, colon and lung.

However, sarcomas are in the top 10 Turbo Cancers that are skyrocketing since COVID-19 Vaccines rolled out.

The fact that there are 12 VAERS reports of Turbo Cancer Sarcomas after Pfizer or Moderna mRNA Vaccine in reproductive age women (including one after she had a baby) is insane!

Pregnant women are at higher risk of developing Turbo Cancers and no one knows why. No one is studying this and no one is protecting them.

[On October 25, 2023](#), I wrote an article on Turbo Breast Cancer in Pregnancy (20 cases). This is the second article in the series.

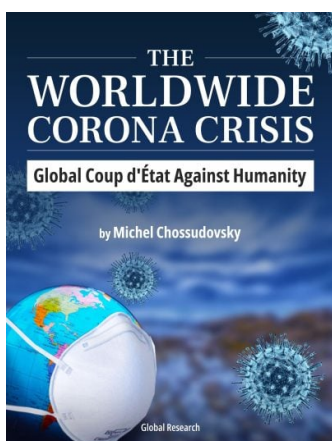

These articles on Turbo Cancer in Pregnancy, are “First in the World”.

I can write these articles because the largest organized crime ring in Canada that runs \$23 billion/year Alberta Health Services (headed by Trudeau loyalists Francois Belanger and Verna Yiu – current University of Alberta Vice President) failed to silence me, after offering me a \$400,000 bribe and a Non-Disclosure Agreement to sign, then threatening my family and my children and finally my Alberta medical license #023044, which I told them they can keep, along with their \$400k bribe.

Dr. William Makis is a Canadian physician with expertise in Radiology, Oncology and Immunology. Governor General's Medal, University of Toronto Scholar. Author of 100+ peer-reviewed medical publications.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
