Oct. 14, 2023 – Spokane, WA 29 year old Quindrey Trevon Davis-Murphy, Spokane Jazz Orchestra, was diagnosed with leukemia & died of a brain bleed 4 days later (Diagnosis to death: 4 days).

Nov. 12, 2023 – Cambridge, MH – Jenny Mortensen was diagnosed with leukemia on Oct. 14, 2023 but died less than a month later due to internal bleeding and blood clots which caused strokes.

Donate in memory of Jennifer Mortensen

My name is Jeremy Fischer. I just lost my partner and the love of my life, Jenny Mortensen on November 12th, 2023. We were together for 15 years and had two beautiful daughters together (Shiloh and Avarie ages 6 and 7.)

Jen was diagnosed with leukemia on October 14th of 2023. She fought for her life but died due to internal bleeding and blood clots which caused strokes and extremely low blood pressure while being intubated.

I now have the burden of paying for inevitable extra expenses, and all of my bills to pay alone.

I feel left with no other choice but to reach out to others to ask for help in any way possible. If you are unable to help, please share this with others who may be able to. Anything you can donate would be greatly appreciated. Thank you for your thoughts and prayers during this very hard time.

Jeremy Fischer

Sep. 23, 2023 - Brazil - 43 year old journalist Wallescka de Andrade Lyra was diagnosed with Leukemia in the morning, intubated & died the same day on Sep. 23, 2023 (Diagnosis to death: hours) (Credit: Tulloch1978).

Alagoas journalist Walescka Lyra dies at 43

Professional colleagues reported that Walescka was diagnosed with leukemia; she left two daughters

Ana Clara Pontes and Marcos Rodrigues
09/24/2023 11:32 AM - Updated 24/09/2023 11:33 AM

Alagoas journalist Walescka de Andrade Lyra died at the age of 43, that Saturday (23), at Santa Casa de Misericórdia de Maceió. According to professional colleagues, on the morning of the same day, she was diagnosed with leukemia and was intubated, but she could not resist.

Walescka graduated in journalism from the Federal University of Alagoas (Ufal) and was part of the staff of producers Staff and VTK. The journalist left two daughters.

On social networks, the Union of Journalists of Alagoas lamented the loss of the journalist (*check the note at the end of the text*). In the publication, colleagues also offered solidarity to family and friends: "Gent, what a sadness. God comfort the family" wrote one.

The burial will take place at 16h, this Sunday (24), in Memorial Parque Maceio, in the Benedito Bentes neighborhood.

Check out the union's note in full:

The Union of Journalists of Alagoas mourns with great sadness the death of journalist Walescka de Andrade Lyra, at the age of 43.

Aug. 21, 2023 - Halifax, NS, Canada - 8 year old Abigail Elizabeth May Parker was diagnosed with Acute Myeloid Leukemia on July 21, 2023 and died suddenly one month later on Aug. 21, 2023 (suspected case - unusually rapid course).

Abigail Elizabeth May Parker – 8, Truro. Our hearts are broken to announce that Abigail passed away peacefully, surrounded by the love of her family, on Monday afternoon, August 21, 2023, at IWK Health Centre, Halifax. Abigail was diagnosed with Acute Myeloid Leukemia on July 21, 2023, and passed suddenly from complications just one month after her diagnosis. Born in Halifax, she was a daughter of Bradley Parker and Alexandra Poole, Truro.

Abigail was a student at Truro Elementary School and would have been going into grade three in September. She enjoyed attending Mount Pleasant After School Group, visits at her grandparents, and spending time with her cousin, Evelyn; they loved March breaks together, birthday parties and extended weekend sleepovers. She was an avid video game player, YouTube enthusiast, (having made her own YouTube video), and an exceptional swimmer. Our smart and funny Abby loved making crafts, and we always looked forward to seeing her next creation.

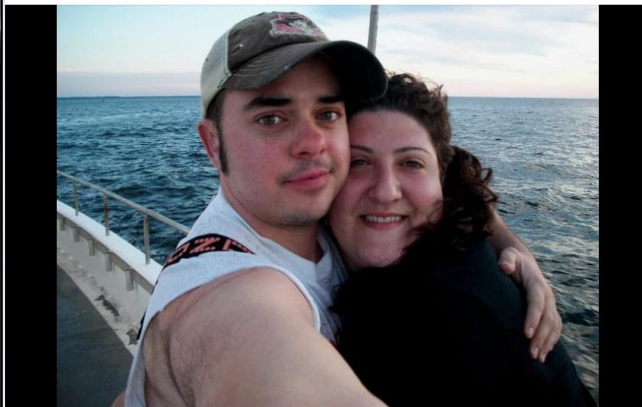

June 13, 2023 – Remsenburg, NY – 40 year old Lauren Jill (LJ) Delman Hanechak died suddenly on June 13, 2023. “Passed away unexpectedly from Acute Myeloid Leukemia (AML) only 4 days after she had been diagnosed.”

Chris Mielen is with LJ Delman Hanechak.

June 18 at 12:17 PM · 🌐

As many of you may already know I lost my friend [LJ Delman Hanechak](#) this past Tuesday night. Her passing was sudden and only days after she learned she had leukemia. She is survived by her beloved 10 year old child, Keely. Keely also lost her father just a few years ago. I'm posting a link in the comments below to a gofundme for Keely. The funds raised will go towards covering her immediate needs and towards securing her future financial stability. Please donate if you can a...

October 28, 2021 · 🌐

So...the Keels has tested positive for covid and is on a 10 day quarantine. Current CDC guidelines blow my mind! Because I am fully vaxxed I'm not required to test or even quarantine unless I develop symptoms! I tested anyway and came up negative. She is incredibly bummed about missing Halloween so I was thinking, if anyone local is doing boo bags, please consider including Keely! DM for our new address if you don't already know where we are.

Girl Orphaned After Mother's Sudden Death: 'Just So Heartbreaking'

Keely, 10, is now an orphan after her mother died of leukemia 4 days after being diagnosed; her dad died 3 years ago. Here's how to help.

WESTHAMPTON BEACH, NY — The Westhampton Beach community was rocked by an unthinkable loss recently that left a little girl, 10, an orphan.

A GoFundMe, "[Help Keely With Her Immediate Needs and Future](#)," was created by Alice Eisenberg.

"On Tuesday, June 13, our community was shaken by the sudden loss of Lauren Jill (LJ) Delman Hanechak, who passed away unexpectedly from acute myeloid leukemia (AML) only four days after she had been diagnosed," Eisenberg wrote.

LJ's husband, Rob, died only three years ago in March 2020.

"Keely, their beloved 10-year-old daughter, is now suddenly left without her parents," she said. "LJ had named me, Alice, as Keely's legal guardian if she were to die — and I will make sure that Keely is always cared for and knows how much she is loved."

Find out what's happening in Westhampton-Hampton Bays with free, real-time updates from Patch.

Eisenberg said she is dedicated to ensuring that Keely is safe and cared for in her community on Long Island right now, where she is committed to finishing the school year and going to her summer camps as planned.

"We are all heartbroken for Keely and want to ensure that she has the support she needs during this difficult time," Eisenberg wrote. "LJ was a single mom without a safety net who worked hard to make ends meet."

The goal of the GoFundMe, she said, is to raise money to help Keely with her immediate needs, legal fees, and provide for her future financial stability. Funds will also be used to cover LJ's memorial and celebration of life.

May 3, 2023 - Solon, OH - 11 year old Cole Zelwin was diagnosed with Acute Myeloid

Leukemia and 48 hours later died on May 3, 2023.

Updated: Aug 8, 2023 / 07:17 AM EDT

SOLON, Ohio (WJW) — Courtney Zelwin, of Solon, said she thought bruises that appeared on her son, Cole's, body in May of this year were from him playing soccer.

"He said 'mom, I don't want to die' and I said 'Cole, you're not gonna die, we're going to get you fixed, you're going to a great hospital!'"

[| More than \\$322,000 in missing money found at Ohio State Fair >](#)

They brought him to the hospital after he started feeling sick. He would never return home.

"They did a complete blood count and said get him to the hospital. We went to the hospital that Monday and he passed away that Wednesday," said Zelwin.

[Home](#) | [About](#) | [Donate](#) | [Events](#) | [Share a memory of Cole](#) | [Contact](#)

On May 3, 2023, we lost our 11-year-old son Cole to Acute Myeloid Leukemia just 48 hours after the initial diagnosis. Cole was an amazing child who had a love for music, arts and being kind to others. Cole was a passionate musician, playing electric guitar and singing vocals as part of bands through our local School of Rock. Cole was a selfless, kind, caring and smart individual. He never hesitated to help anyone around him. It brought him joy to make others around him happy. He was wise beyond his years and could talk to any adult just as easily as one of his peers. To honor Cole's memory and his love for helping others, we have started a foundation. We are raising money to find a cure for Leukemia through research and to also help other families who have been affected by Pediatric AML. We hope no other family has to go through what we are going through.

[April 13, 2023](#) – Philadelphia, PA – 16 year old Kyle Limper died within 24 hours of leukemia diagnosis on April 13, 2023. “Before April 13th, he was a completely healthy and happy young man with no sign of illness,” his obituary states. “It just came and took him in the same day.”

In Loving Memory
Kyle W. Limper
2007 - 2023

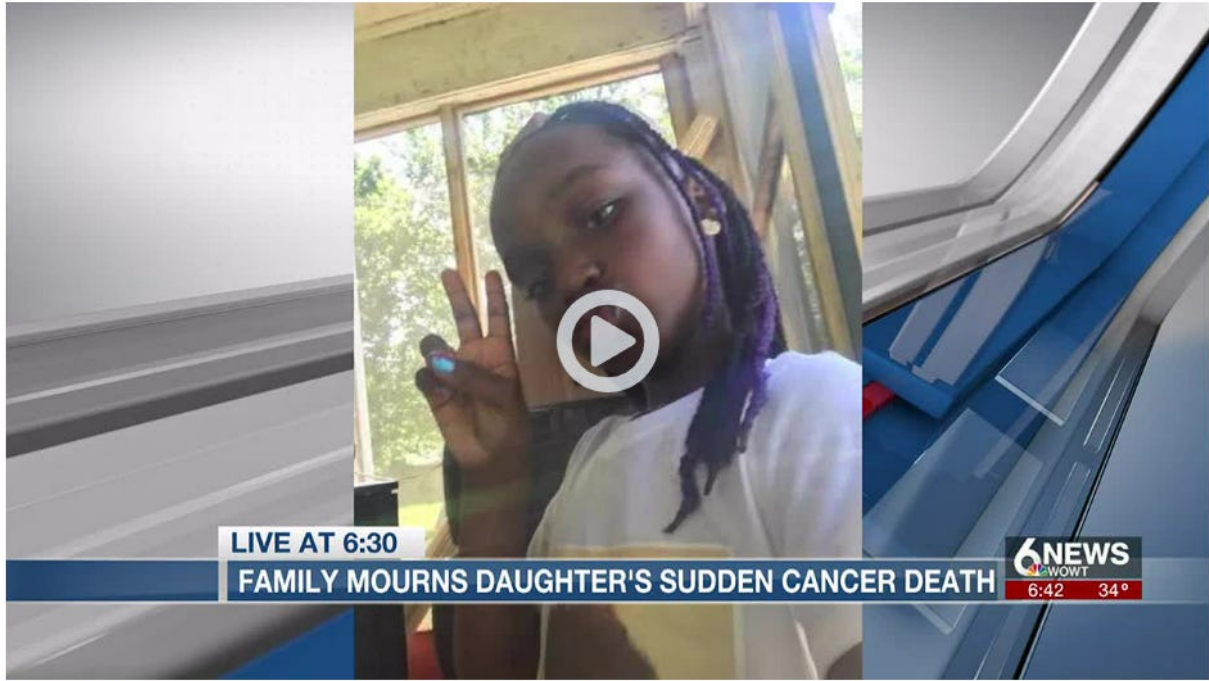

His father, Ken Limper, initially brought his son to urgent care for back pain after Kyle played basketball before taking him to Jefferson Hospital.

“They told me in a couple of days, if he doesn’t get better, to bring him back. Well, in a couple of days he couldn’t even stand up,” the grieving dad said. “He couldn’t even get out of bed and I had to help him up and stand him up, then he fell right back down on the bed.”

Limper was eventually rushed to St. Christopher’s Hospital for Children, where doctors said the multi-sport athlete’s organs were shutting down from leukemia. Within 24 hours after he arrived at the hospital, he died. ([click here](#))

Feb. 16, 2023 – Omaha, NE – Kavieriona White, 11 year old girl died two days after leukemia diagnosis.

Family loses 11-year-old daughter to acute-onset leukemia

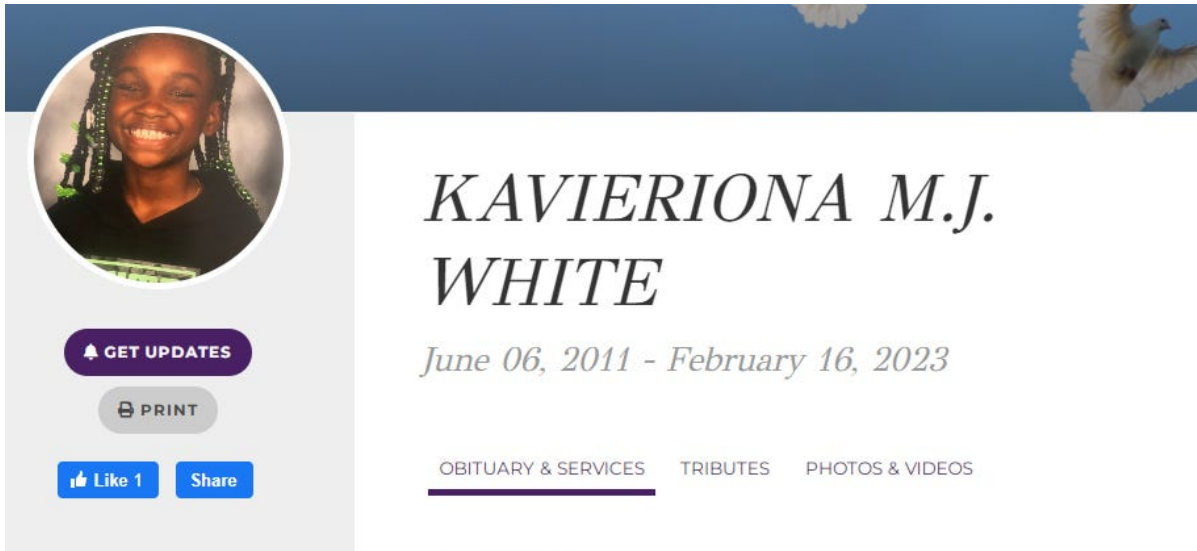

An Omaha father is mourning the sudden loss of his 11-year-old daughter. Doctors say it was leukemia.

11 year old Kavieriona died suddenly after being diagnosed with Leukemia just a few days prior ([click here](#)).

It started when she was sent home from school with a fever. A few days later she was found unresponsive, rushed to hospital where she was diagnosed with leukemia and she died two days later.

"The blood disease was leukemia. The doctor informed me it was treatable and curable but the main problem was the brain bleeds."

The image shows a digital obituary page for Kavieriona M.J. White. On the left, there is a circular profile picture of a young girl with braids, smiling. Below the photo are three buttons: a purple 'GET UPDATES' button with a bell icon, a grey 'PRINT' button with a printer icon, and two blue buttons labeled 'Like 1' and 'Share'. The background of the page features a blue sky with white clouds and a white dove in flight. The main text area on the right contains the name 'KAVIERIONA M.J. WHITE' in a large, bold, serif font, followed by the dates 'June 06, 2011 - February 16, 2023' in a smaller, italicized serif font. Below the dates are three links: 'OBITUARY & SERVICES' (underlined), 'TRIBUTES', and 'PHOTOS & VIDEOS'. The section 'OBITUARY' is also underlined. The obituary text describes Kavieriona Marie Jennifer White, born on June 6th, 2011, to Antonio Kavier White and Sheletha Jennifer Rouse in Omaha, NE. It mentions she was a loving, vivacious, and talented little lady who could have become a popular household name. The text is partially cut off at the bottom.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. –Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
