[July 2023](#) - Brisbane, Australia - Emma Perkins was 12 weeks pregnant when she was diagnosed with Stage 3 breast cancer in July 2022, which was likely terminal. She had 11 rounds of chemo while pregnant and her son was born Feb. 2023 healthy.

There are many stories being published about women getting late Stage breast cancer during pregnancy but why? Here are 20 cases.

[Oct. 19, 2023](#) – Savannah, GA – 35 year old Lateia Parker was diagnosed with Triple negative breast cancer (worst prognosis) while pregnant with her daughter Jynesis).

[Oct. 2, 2023](#) – Naperville, IL – Alex Thompson was diagnosed with Breast cancer during pregnancy, which became Stage 4 and metastasized.

Alex, Jeff & Smith Thompson

Gwen Danca is organizing this fundraiser on behalf of Jeffery Thompson.

Hi, my name is Gwen Danca, Jeff's sister. I am fundraising to help Alex and Jeff along with their newborn son Smith Rae. We were all anxious for Smith's arrival but didn't expect to meet him so soon. **Sadly, Alex's breast cancer metastasized during her pregnancy. They were unable to treat her as aggressively as needed while she was carrying him. Luckily, they were able to get him to the 28-week mark and beautiful Smith was born August 25, 2023,** 2.7lbs, 18 Inches long. It was a miracle, and we all felt so relieved when they both made it through. We are so thankful to you all for all your prayers and well wishes, they are working! One month later, Smith gained almost a pound, he is 3.6lbs now! He is in the NICU and is getting great care. The doctors and nurses caring for him are amazing. Alex is receiving treatment for her cancer and is currently working to regain muscle movement after being immobile for a month. I know the medical costs for both their treatments will be extensive,

[Sep. 30, 2023](#) – Raleigh, NC – Suzanne Macauley Vargas was diagnosed with Stage 3B inflammatory breast cancer while pregnant.

Pregnant Superhero, Suzanne Vargas Fights

Hi, my name is Brittany and I am fundraising for Suzanne Macauley Vargas, a pregnant superhero fighting stage 3b inflammatory breast cancer.

Suzanne is a superhero. She's smart and kind. She's funny and beautiful. She's married to Dorian and she's a Spanish teacher for the Wake County Public School System. Suzanne is the kind of teacher that would do anything for her students & co-workers, she's the kind of wife who would do anything for her husband, and she's the kind of person that would do anything for her friends & family.

In January 2023 Suzanne and her husband were excited to announce their first pregnancy and eagerly planning for their future. They were ecstatic to learn they were having a baby girl and saved to buy their first home. **However, tragedy struck when the couple learned Suzanne was diagnosed with stage 3b inflammatory breast cancer. Being pregnant is hard and having cancer is horrible but to endure both, at the same time, is unimaginable.**

Little Falls, MN

In 2019, at age 32, Dani was diagnosed with aggressive triple-negative breast cancer. She completed 16 rounds of aggressive chemo, followed by a double mastectomy at the Mayo Clinic and then chemo pills for another 6 months. Surgery was successful and the surgeons were able to get clear margins. We were told that Dani was cancer-free. Because of the aggressive treatment plan, we were told we couldn't have any more children.

In 2021 a miracle happened. After years of trying to have more children and then later after the cancer treatment, the Mayo doctors told us we couldn't have children, Dani became pregnant. Lisa was born on May 20th, 2022, a very healthy and happy baby girl who is now 10 months old.

During the pregnancy in 2022, Dani began experiencing a small dry patch of skin on her breast. This dry patch would come and go every couple of weeks. After several months, Dani reached out to her local oncologist to seek advice. Her local oncologist said it did not sound concerning and suggested trying moisturizer. When the moisturizer didn't work, Dani went to the oncologist who again said it doesn't look concerning and that it "didn't look like it needed to be biopsied." At that point, her oncologist referred her to a dermatologist to find an ointment to hopefully help. After trying the ointment for 6 weeks, the dermatologist decided to do a biopsy to make sure they weren't missing anything. Unfortunately, the biopsy came back as cancer.

We decided to go back down to the Mayo Clinic for a 2nd opinion and upon further scans, they found that there is a mass embedded into Dani's chest wall. This was heartbreaking news. The Mayo doctors hadn't seen this happen before and weren't sure how to proceed at first. After meeting to discuss Dani's case, her Mayo doctors decided on a treatment plan that includes 12 weekly rounds of chemo infusions, followed by specialized radiation for 5 weeks at the Mayo to avoid damage to her heart as much as possible, and lastly a very aggressive surgery to remove a section of her chest wall, including the pectoral muscle and 4-inch sections from two ribs. The reconstruction will be an extremely difficult and long process.

[Sep. 19, 2023](#) – Denton, TX – Amanda Anderson-Barberis was diagnosed with Stage 4 breast cancer while pregnant with her 3rd child, and died when he was 9 months old.

Amanda Anderson-Barberis

Alicia Schmieg is organizing this fundraiser on behalf of Mark Barberis.

Hi, my name is Alicia and is hoping to help raise money to help my older brother pay for the cremation of his beautiful young wife. They have 3 children; Jenson(5), Journey(2) and Christian(9 months). Amanda was such a strong and loving mother and partner. **While pregnant with Christian they discovered she had stage 4 breast cancer** and though she fought hard through her illness while raising 3 small kids she always had a smile on her face. She never complained and lived life to the fullest. She will be coming off life support today 9/19/2023 and any help will be greatly appreciated.

[July 25, 2023](#) - Minneapolis, MN - Lindsey Mercil noticed a lump while pregnant, she had a miscarriage and was diagnosed with Stage 3 Triple Negative Breast cancer (worst prognosis). She has just finished 16 rounds of chemo.

Lindsey (Carlson) Mercil's Cancer Support

Kaylie Peterson is organizing this fundraiser on behalf of Lindsey Carlson.

Lindsey's Story:

In early November of 2022, Lindsey and Kurtis were very excited to find out that Lindsey was pregnant, and they were ready to start their family. Unfortunately, Lindsey found out weeks later that she had a miscarriage. During this time, Lindsey had noticed a lump on her breast. She informed her doctor multiple times of this lump, but it was chalked up to a swollen lymph node, likely from her pregnancy. Lindsey knew that something else was wrong and, being an advocate for herself pushed for further testing and answers.

Following an ultrasound, MRI, and biopsy, Lindsey's worst fears were confirmed. She was officially diagnosed with stage III triple-negative ductal carcinoma, on February 6, 2023.

Lindsey started her first round of chemotherapy at the University of Minnesota Masonic Center just days later as time was of the essence. The plan for Lindsey so far is to have 16 rounds of chemotherapy, followed by a double mastectomy, axillary lymph node dissection,

[June 26, 2023](#) - Sunderland, UK - 39 year old Kelly Ross was diagnosed with grade 3 breast cancer in Oct. 2022 while 28 weeks pregnant with her son Rudy. She completed chemo in May 2023.

Kelly Ross, 39, from Sunderland is taking part in a new research project that will help women to make healthy lifestyle choices after breast cancer treatment.

A Sunderland mum is proud to be part of study to improve women's wellbeing after breast cancer

Kelly Ross, 39, from Sunderland is taking part in a new research project that will help women to make healthy lifestyle choices after breast cancer treatment.

Funded by research and support charity Breast Cancer Now, researchers at Newcastle University will develop a programme that aims to improve women's access to nutrition and physical activity support once their breast cancer treatment is completed.

Kelly was diagnosed with grade three oestrogen receptor positive (ER-positive) breast cancer in October 2022, while 28 weeks pregnant with her son Rudy, now six months.

To ensure that Kelly could start chemotherapy as soon as possible, clinicians suggested she should be admitted to hospital so the birth could be induced at 38 weeks.

Kelly completed her chemotherapy in May 2023 and has been keen to rebuild her strength through exercising.

[June 25, 2023](#) - Rutledge, GA - Karen Vincent had health problems during pregnancy, her baby was delivered at 26 weeks by C-section and she was found to have Stage 4 breast cancer with metastases to bones, liver and brain.

Help Pregnant Mom with Stage 4 Breast Cancer

Vincent Family is organizing this fundraiser on behalf of Karen Vincent.

Meet our cousins, Raymond and Karen Vincent, proud parents of 6 beautiful children. On April 22, after a month of declining health and 26 weeks pregnant, Karen was admitted to the emergency room. What we thought was preeclampsia turned out to be something far more serious.

First, the happy news: Doctors performed an emergency C-section when Karen's condition became unstable, and we are overjoyed to tell you that Alexander Constantine Vincent was born healthy, despite being three months premature. He'll have to stay in the NICU a few more months, which presents its own challenges, but he's healthy and growing and we're so grateful.

However, after surgery, doctors performed CT scans to find the underlying cause of Karen's condition and rapidly deteriorating health.

The scans revealed that Karen had Stage 4 metastatic breast cancer that had spread to her bones, liver, and brain. We were absolutely devastated by this news.

June 25th, 2023 by Karen Vincent, Beneficiary

Dear Friends and family,

While still in the hospital after giving birth to our three month premature son via C-section, my wife Karen was diagnosed with stage 4 breast cancer. After more tests, we learned the cancer had spread to her lymph nodes, metastasizing in her liver which caused her liver to enlarge and the cancer to spread to her brain. The cancer has also spread to her bones causing bone loss in her spine and hips which greatly hampers her mobility. By the grace of God, Karen remains in good spirits and is responding well to treatment!

[May 26, 2023](#) – Gainesville, FL – 28 year old Sami Pickens was diagnosed with Stage 1 breast cancer in 2019. She was cancer free for 2 years, however, when she was pregnant in 2022, she was found to have breast cancer recurrence metastatic to lungs liver and bones. She died on May 26, 2023.

Remembering Sami

Mandi Crews is organizing this fundraiser on behalf of Justin Pickens.

Hi, my name is Mandi and I am the sister of Sami Pickens. Surrounded by loving family and dedicated friends, Sami received her angel wings at Haven Hospice, Gainesville, FL on Friday, May 26, 2023. Sami had that infectious smile and ability to draw people to her no matter the situation. She brightened every room with her presence. If you knew Sami, you

At the age of 28, Sami was driving home from work when she got the phone call that the biopsy came back as invasive ductal breast cancer. Shortly after the diagnosis, she underwent a double mastectomy for her Stage 1 cancer because of her BRCA 1 gene mutation. Her team decided that was a very aggressive approach and she would be good to go. Not even a year later (286 days to be exact) she was diagnosed with a local recurrence again at stage 1. She underwent a partial mastectomy, chemo and radiation. She had an amazing 2 years getting back into her new normal and trying not to let every ache, pain and checkup get the best of her. Life after a cancer diagnosis is no joke. Things got scary again fast after she got pregnant with her miracle baby, Lyla, (a pregnancy the Dr's said couldn't happen due to hormone blockers and chemo Sami had been on since her first diagnosis in 2019). She was admitted to the ICU with a collapsed lung, quickly learning that her cancer was back at age 31. This time it had metastasized to her lungs, liver, and bone. She underwent more chemo this time with the cocktail that most call the "Red Devil", but I told my sister we will call it "Jesus wine" because the devil has no place in your story!

[May 23, 2023](#) - Lawton, OK - Rocki Novotny was diagnosed with Stage 3 breast cancer the size of a lime and metastatic lymph nodes throughout her body in May 2022. She suspects she had developed cancer while pregnant with her baby whom she delivered in Nov. 2021.

Help Rocki Recover from Cancer

Angela Collins Jaspon is organizing this fundraiser on behalf of Rocki Novotny.

Rocki was Diagnosed with Stage 3 metastatic breast cancer in May 2022 and has been battling the disease for over 18 months.

On April 1st, 2021, while pregnant with her baby boy, Jaxsen, she was very sick and ended up throwing up 45 times over the next few days. Over the next 8 months, she continued to be told all her symptoms were part of being pregnant. Fast forwarding to November 9th, 2021 Rocki delivered her baby boy 6 weeks early. Rocki had been counting down the days until she would deliver and finally not be sick anymore. But nothing changed. She threw up often and began avoiding eating because of the heartburn, most days she didn't have the energy to get out of bed. But she always did. - on **May 17th, 2022 Rocki was diagnosed with Metastatic stage three breast cancer, the tumor was the size of a lime and cancer cells were growing in her lymph nodes throughout her body.**

Fast forward to today..she has been through Chemo but wasn't strong enough to have the necessary surgery until last week. During her surgery to remove one tumor, they discovered many more and had to remove 13 in total.

Ellie Sayles is organizing this fundraiser on behalf of Tammy Baldwin.

Just hours apart on August 16th, 2022, Tammy found out she was pregnant with her fifth child and had breast cancer. They were excited about the thought of another baby, but fear quickly swept in learning about her breast cancer. Their world was turned upside down, as you could imagine. After several tests, ultrasounds, and Dr. appointments, a safe plan was in place to treat her during pregnancy. Unfortunately, at nine weeks, she had a heartbreaking missed miscarriage which required a D & C. Ryan and Tammy love their children dearly, and this was so hard to endure, in addition to her breast cancer diagnosis.

Treatment plans have now changed for her aggressive breast cancer. She had her first chemo treatment on Tuesday, October 4th. She will complete five more treatments every three weeks until the middle of January 2023. Then she will have a double mastectomy with expanders placed the same day, followed by 34 weeks of additional treatment, including radiation, and reconstruction. She'll also be doing 5-10 years of hormone blockers., including a total hysterectomy as soon as her oncologist approves the surgery after the breast cancer treatment. She will have to face 4+ surgeries in the coming months.

Tammy & Ryan have been married for 21 years and have four wonderful children. Ryan works outside of the home, while Tammy is a stay-at-home, homeschool mom.

[Apr. 4, 2023](#) - Cowiche, WA - 31 year old Danielle Baughman was diagnosed with breast cancer while 29 weeks pregnant on Dec. 27, 2021. She was cancer free as of June 2022 but she had a seizure and was found to have a brain metastasis (Stage 4) in March 2023.

Danielle and her continued cancer battle

Samantha McDonald is organizing this fundraiser on behalf of Justin Baughman.

Hello, my name is Samantha McDonald, and I have started this fundraiser for Danielle Baughman.

On December 27, 2021, her 31st birthday and while 29 weeks pregnant with their second baby boy, Danielle was diagnosed with breast cancer. Her doctors felt that it was necessary to start her on chemo treatments before she delivered the baby. Although this was a scary and trying time, Danielle had three chemo treatments while pregnant. She was induced and delivered a healthy baby boy on February 24, 2022. Shortly after his arrival, her cancer treatments were more often and stronger. With admirable strength and courage, she took her chemo treatments.

On June 28, 2022, she received the results of her most recent PET Scan. With the goodness of God and the power of prayer, Danielle was told her scan had no evidence of disease. No more cancer!!

Sadly, on March 2, 2023, Danielle had a seizure. Following scans at the hospital, she was notified that her cancer had returned and was now in her brain. She has already started radiation treatments that will be followed by more chemotherapy.

April 4th, 2023 by Samantha McDonald, Organizer

Update provided by Amanda:

Thank you. We received fairly good news yesterday that there is no sign of cancer anywhere else in the body, which indicates the treatments she has been doing since remission last time is still working. She started a new to the market chemo yesterday that has shown promise on the brain. Her oncologist additionally told her there is also another

[Mar. 5, 2023](#) - Clermont, FL - Kimberly Luitweiler felt a lump on her breast while pregnant and close to delivery and was diagnosed with an aggressive breast cancer shortly after delivery.

Kim's fight against breast cancer

Danielle Miller is organizing this fundraiser on behalf of Kimberly Luitweiler.
Created March 5th, 2023

With permission from Kim and Chris, I have started this fundraiser on behalf of my brother and sister-in-law as they face their biggest battle yet. On February 14th, 2023, Kim received the devastating diagnosis that she has breast cancer - just two short months after welcoming their newest addition to their family. She has been diagnosed with invasive ductal carcinoma, ER+ PR+ HER2+. **While her cancer is aggressive, we are so grateful for the recent advances in medicine that allow doctors to know the right treatment** that will target this specific cancer. Due to her cancer being triple positive, Kim has already undergone extensive testing and procedures immediately after her diagnosis. She has begun chemotherapy with multiple treatments and surgeries in the future. Any donations for their family will be used to cover costs incurred from Kim's treatment and to keep life as normal as possible for their young children, Brooklyn (8 years old) and Jace (2 months old). Kim has been so brave as she faces this battle - below is her story in her own words:

Two and a half weeks before Jace was born Chris and I were relaxing on the couch late one Saturday night and to this day I have no idea what made me feel my left breast. I wasn't having pain or anything, I just put my arm up and did my own little self-check. I felt a tiny lump... I was a little concerned but also knew that pregnancy causes many changes in the body. I had a regular pregnancy checkup scheduled a few days later and mentioned it to my gynecologist. **They did a breast exam and then had me schedule an ultrasound. The ultrasound came back with suspicious findings and I was referred for a biopsy. In the midst of all of this, I gave birth and just tried my best to enjoy being a mom to a newborn again** and enjoying our new family of 4. It was honestly the happiest I had ever been. Fast forward to weeks later after having another ultrasound, a mammogram and a biopsy (my 1 lump was now 3). I had a follow-up with a surgical oncologist on Valentine's Day to go over my results, and that's when I received my diagnosis. In the following weeks up until now I've had many different appointments and tests (and still have more upcoming tests scheduled). I got set up with my oncologist who has been great. Due to my cancer being triple positive and aggressive, she wanted me to start chemo treatment right away. So this past Monday (2 months to the day I went in for my induction to have Jace) I started chemo. Then on Wednesday, I went in for surgery to have a port placed for future treatments. So much has been happening and this is all honestly my worst nightmare come true. Some things I know so far: I will lose all of my hair soon, I will have a double mastectomy and a possible hysterectomy (waiting on my genetic test results). I'm still processing it all but I am choosing to stay as positive as I possibly can. I am 38 and mammograms aren't recommended until 40. My advice is to be proactive and

My Take...

Cancer during pregnancy is rare and before COVID-19 mRNA vaccines approximately 1:1000 pregnancies were complicated by maternal cancer.

Of these, breast cancer is most common, corresponding to between 1:3000 to 1:10000 pregnancies, according to a [2022 Dutch study by Boere et al.](#)

COVID-19 mRNA Vaccines are causing Turbo Cancers in young people and breast cancer is in the top 3 most common cancers caused by Pfizer or Moderna mRNA.

Since 2021, there are far more Stage 3 and Stage 4 Breast cancers being diagnosed in pregnant women. They are present in GoFund me in 2020 and prior but in much smaller numbers.

The key question I ask is:

1. Are these Stage 3 and 4 Breast cancers in pregnancy just a reflection of skyrocketing Turbo Cancers in COVID-19 mRNA vaccinated reproductive age women, or
2. Does pregnancy itself increase the risk of Turbo Cancer manifesting in a COVID-19 mRNA Vaccinated woman? (In other words, would the same woman still have gotten Stage 3 or 4 breast cancer, at the same point in time, if she hadn't gotten pregnant?)

I don't know the answer.

Furthermore, Triple Negative breast cancer (the worst prognosis), seems to be the most common subtype of Turbo Breast Cancer (whether in pregnancy or not).

Oncologists should be studying these questions, unfortunately selling mRNA vaccines for Pfizer & Moderna shareholders pays much better, and keeps their licenses, academic promotions, and grant funding safe and sound.

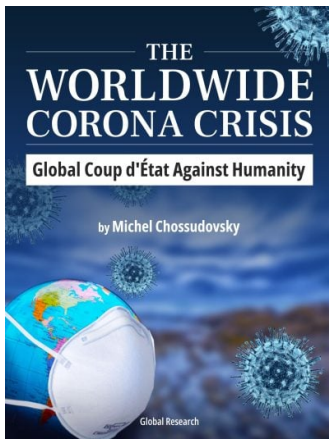

FINAL THOUGHT: This is not just happening with breast cancer, and I will address other Stage 4 Turbo cancers in pregnancy in future substack articles.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. –Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
