"Turbo cancer" is a non-medical term that has arisen to describe very aggressive and rapidly progressive cancers following Pfizer or Moderna COVID-19 mRNA vaccination and suppression of the immune system.

I have written 15 substacks about turbo cancers so far:

- turbo cancers in Canadian doctors ([click here](#))
- turbo cancer leukemias ([click here](#)) and children ([click here](#)) and ([click here](#))
- turbo cancer lymphoma ([click here](#))
- turbo brain cancer glioblastomas ([click here](#)) and ([click here](#))
- turbo cervical cancer ([click here](#))
- turbo testicular cancer in athletes ([click here](#))
- turbo cancer of appendix ([click here](#))
- turbo sarcomas ([click here](#))
- turbo colon cancers ([click here](#))
- turbo gastric cancers ([click here](#))
- turbo lung cancers ([click here](#))
- turbo breast cancer ([click here](#))

And today's focus is on turbo gallbladder cancers.

Parma, OH – 61 yo Michael Jones was a United Airlines flight attendant who died on June 3,

2023 from turbo gallbladder cancer he battled for 3 months.

 **Marc Snyder** is 😞 feeling devastated.
June 4 at 2:56 PM · 🌐

❤️ It's hard to find the words or strength to announce that my best friend for over 35 years passed away at 12:05 AM today, at his home, surrounded by myself and his Family. Just a few short months ago Michael complained of stomach and side pain which led him to have his gallbladder removed in March. **Doctors found a rare and very aggressive cancer which took him from us fast and far too soon.** There are no words so describe the loss and void he leaves in our hearts. ❤️

There are reports of turbo gallbladder cancers in VAERS

[CASE 01 \(VAERS 1391766\)](#) - 58 year old Minnesota woman had 1st Pfizer jab on April 7, 2021, 2nd Pfizer jab on May 12, 2021 and was hospitalized for gallbladder cancer on May 17, 2021

[CASE 02 \(VAERS 2101898\)](#) - 55 year old Washington woman had 1st Moderna dose on Jan. 6, 2021. About 11.5 months later, on Dec. 14, 2021, she was diagnosed with gallbladder cancer after having epigastric pain in Aug. 2021

[CASE 03 \(VAERS 2192102\)](#) - 72 year old Kentucky woman had two Pfizer doses, 2nd on Feb. 10, 2021. Six months later on Aug. 27, 2021 she died with metastatic gallbladder cancer

[CASE 04 \(VAERS 2540649\)](#) - 60 year Michigan woman had 2 doses of Pfizer, last dose April

7, 2021. 560 days later she died of metastatic gallbladder cancer and metastatic colon cancer on Nov. 4, 2022

[CASE 05 \(VAERS 2053415\)](#) – 82 year old woman had Pfizer jab in early 2021. In July 2021, she was diagnosed with “hepatic infiltration of gallbladder cancer” (metastatic)

[CASE 06 \(VAERS 2539820\)](#) – 80 year old woman had 5 Pfizer jabs, with the 5th booster shot on Nov. 27, 2022. She was hospitalized two days later and diagnosed with “gallbladder cancer with infiltrations into the duodenum”

Thousands have reported gallbladder problems following COVID-19 vaccination in the WHO Vigiaccess reporting system ([click here](#))

- gallstones – 755 cases
- gallbladder inflammation (cholecystitis) – 428 cases
- gallbladder pain (biliary colic) – 350 cases
- cholestasis (reduced bile flow) – 278 cases
- gallbladder disorder – 261 cases
- cholangitis (acute inflammation of biliary duct system) – 125 cases

Gallbladder problems (non-cancer)

There are over 800 of these in VAERS so I will only select a few:

[CASE 07 \(VAERS 918839\)](#) – 32 yo woman (Washington) had 1st Moderna jab and 8 days later had to have her gallbladder removed and had a life threatening sepsis.

[CASE 08 \(VAERS 932801\)](#) – 32 yo man (Illinois) had 1st Pfizer jab and 2 days later was hospitalized for epigastric pain and needed gallbladder surgery

[CASE 09 \(VAERS 962678\)](#) – 33 yo woman (Texas), 26wk5d pregnant, had 1st Moderna jab on Jan. 12, 2021. Within 12 hours, she developed gallbladder pain, required surgery next day which showed gangrenous cholecystitis and hydrops of gallbladder, with negative cultures. Hospitalized for 3 days. Baby survived.

[CASE 10 \(VAERS 966379\)](#) – 51 yo woman (Texas) had 1st Moderna dose and next day she was rushed to the hospital for emergency surgery, had to have her gallbladder removed which was 13cm big.

[CASE 11 \(VAERS 997546\)](#) – 72 yo man (Florida) had 1st Moderna vaccine on Jan. 2, 2021. Next day he had severe pain and was hospitalized. He had gallbladder surgically removed on Jan. 28 and he died next day on Jan. 29, 2021.

[CASE 12 \(VAERS 1001005\)](#) – 42 yo woman (North Dakota) had 1st Moderna mRNA vaccine. 5 days later she was hospitalized for abdominal pain, nausea and vomiting and had to have gallbladder surgically removed.

[CASE 13 \(VAERS 1030300\)](#) – 37 yo woman (Florida) had 1st Pfizer mRNA vaccine, the next day she had “extreme nausea”, a gallbladder attack and had to have emergency gallbladder removal 2 days after Pfizer jab.

[CASE 14 \(VAERS 1077228\)](#) – 53 yo woman (Massachusetts) had 2nd Moderna jab on Feb.

25, 2021 and had acute abdominal pain for 6 hours. 4 days later she had “worst abdominal pain ever”, rushed to ER, had inflamed gallbladder that had to be surgically removed.

Twitter reports of Gallbladder problems

AtwaterGuy @TheMilosh · Mar 6

My Pfizer vax gifted me a necrotic gallbladder (no stones), a ride in an ambulance, several injections of Fentanyl and a wonderful 1 week stay at the luxurious Grand Hospital.

Who knows what surprises await my future.

Molly Minar @MollyMinar · Apr 11, 2021

One of my sisters had corona in January and was quite ill. has other health issues so got the vax. Right after 2nd Pfizer vax her gallbladder shut down almost overnight and she had to have emergency surgery. Not sure if it was vax or corona

No shot here! You couldn't pay me

PfuckOff @pfuckOff_ · Nov 11, 2022

Replying to @PatriotSkyrific

I would take a wild guess and say is vaccine injuries, all my vaccinated friends have had to go visit the ER few times, I recently found out another friend has to go for surgery because she has lesions and some strange growths in the gallbladder, health 34 y/o before pfizer

Pamela McLaughlin @pamela439 · Apr 23, 2021

@CDCgov my father in law had to have gallbladder surgery 3 weeks after his 2nd Pfizer vaccine shot! His kidneys started to fail a week later! He's been in the hospital ever since! Now diagnosed with sundowner dementia!! Is this because of the vaccine?

DEE @happyfinko · Dec 9, 2021

Replying to @Ciarn13764620 @garden_nome1 and @Caoimhinn55

2 close friends, one has leg pain and a tumor on her brain after 2 shots- Moderna, the other had her gallbladder removed took 2 surgeries and now has full blown shingles, 2 shots- Pfizer, they both say dr said its just a coinsendense.

GeoJeff @GeoThreeAsIn123 · Oct 7, 2022

Do you have more info in this? My MIL has Stage IV gallbladder cancer that “came out of nowhere” and according to the oncologist, more aggressive than most cancer they see. She took AstraZeneca twice and then Pfizer twice. Also, it's small cell carcinoma, typically found n lungs.

I had two doses of Pfizer. Got really sick, and now have Dysautonomia, my GI failed, because of it, and I had a cyst show up in my gallbladder, requiring surgery. My son got both doses and ended up in the ER with an "unknown" cardiac event. The vax is NOT safe

72F Moderna 2/15; emergency gallbladder surgery 2/17

45F Moderna 2/26; gallbladder surgery 3/29

48M Pfizer 3/11; gallbladder problems 3/13

58F Jannsen 4/3; heart attack, gallbladder issues 4/7

and so many other such temporal "coincidences"

Shannon Moore @shaymoore13 · Oct 13, 2021

Oh my this makes me sick! My daughter is also a nursing student & she was forced. The Moderna vax inflamed her gallbladder & is having surgery tomorrow. She is 24. Her best friend has myocarditis from Pfizer. I am so angry! This is not right! Praying for your student!

Kelsey Horton @kelseyhorton · Apr 25, 2021

...

Replying to @NickLaparra

My first Pfizer dose, I had fever, chills, and nausea about 12 hours after. However, idk if it was vaccine related or the spontaneous gallbladder attack that lead to an emergency removal. That ER trip was interesting. The second dose I was just tired.

TheSaltyOne @TonyTheSaltyOne · Feb 26

As a person who got digestive issues off Pfizer shot 2 then got Covid anyway and have been sick for over a year lost 115 lbs even had my gallbladder destroyed now removed and still sleep in a recliner eat mush and have seen specialty COVID Dr had a million test

He's right

A dear friend just had their gallbladder removed and had had the J&J plus Moderna. Praying for you.

Congressional Tackle Football Match @Dead_Data · Apr 7, 2021

...

Got my first moderna shot on Friday, went into the ER with extreme stomach pain on Saturday night and had my gallbladder removed by Sunday lmao

My Take...

Gallbladder problems following Pfizer or Moderna COVID-19 mRNA vaccination are quite common.

They usually present within one day of mRNA vaccination, with severe abdominal pain, nausea, or vomiting. Some of these gallbladder attacks go away on their own, but many of them require emergency surgical removal.

Gallbladder attacks may not seem dangerous, but a few cases have resulted in sepsis and even death.

Most people who have to have their gallbladder removed after mRNA vaccination, end up having injuries and health problems in other organ systems (it's a sign of a bad vaccine batch, perhaps?).

Turbo gallbladder cancer does appear to exist and is very aggressive, however, the only good news at this time is that it still seems to be quite rare.

Numerous studies show that Lipid Nanoparticles accumulate in the liver and end up in the hepatobiliary system including the gallbladder ([click here](#)) ([click here](#)) ([click here](#))

I have several questions:

1. Are lipid nanoparticles (LNPs), which are known to be very inflammatory, themselves causing severe gallbladder inflammation in such a short time, that many patients need emergency surgery right away to have these inflamed gallbladders removed?
2. Do post COVID-19 vaccine inflamed gallbladders which have been surgically removed, show any spike protein expression within the gallbladder walls?
3. Do turbo gallbladder cancers have spike protein expression within the tumor cells?

As always, none of these answers are forthcoming any time soon.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
