Theme: [Science and Medicine](#)

The history of the suppression of medical science in America is a long one, filled with true accounts of pioneering doctors and clinicians being threatened, intimidated and even assassinated in order to bury emerging cures and keep the “sick care” industry in control. (The American Medical Association, for example, has been [found guilty by the U.S. federal courts of a conspiracy](#) to destroy the chiropractic industry, by the way.)

Over the last few days, we’ve learned that before being found shot in the chest and floating in the river, pioneering medical researcher Dr. Bradstreet was working with a little-known molecule that occurs naturally in the human body. Called, “GcMAF”, this molecule has the potential to be a universal cancer cure for many people. It has also been shown to reverse signs of autism in the vast majority of patients receiving the treatment.

While GcMAF is perfectly legal as a treatment in dozens of advanced nations around the world, the U.S. Food and Drug Administration has outlawed it, calling it an “unapproved drug.” It is with this designation — an effort to suppress the forward progress of medical science — that the U.S. government conducted a raid on Dr. Bradstreet’s clinic, specifically seeking to confiscate GcMAF in order to shut down his research and halt his treatment of patients. Meanwhile, Big Pharma gets [special permission to unleash untested, experimental drugs on the public as long as those drugs earn sufficient profits](#).

In this article, I summarize the videos, articles and documents covering GcMAF and the mysterious death of Dr. Bradstreet. An exhaustive investigation needs to be pursued on this matter, possibly involving private investigators. The timing and manner of Dr. Bradstreet’s death seems highly suspicious, especially in light of the many other holistic doctors who have recently been found dead under mysterious circumstances. ([Dr. Nicholas Gonzalez died just days ago...](#))

Suppress a promising cancer treatment breakthrough

Is there a motive for the alleged murder of pioneering cancer researchers working on a possible universal cancer cure? Of course there is... it’s the most common motive in the world: MONEY.

A universal cancer cure would destroy the profitability of the highly lucrative cancer industry and collapse the American Cancer Society, hospitals, oncology clinics and pharmaceutical companies that depend on chemotherapy revenues to stay profitable. Key to their profitability is the inescapable fact that [conventional cancer treatments simply don’t work](#)

[most of the time](#), creating a reliable profit stream of repeat business from patients who are never cured (by design).

Would the cancer industry murder doctors to protect its profits? Of course it would. The industry kills patients as a routine part of its business operations! For example, [an oncologist named Farid Fata was recently sentenced to 56 years in prison for falsely diagnosing patients with cancer](#) so that he could sell them chemotherapy treatments they didn't need. See the article [Cancer doctors 'fess up to making false diagnoses just to make more money](#).

INVESTIGATION: Here's what we know so far

Multiple hat tips to all the outstanding citizen journalists, video creators and bloggers who have created the items cited below:

[U.S. govt. search warrant document served against Dr. Jeffrey Bradstreet to confiscate GcMAF from his research facility](#).

[Video that connects the dots between Dr. Bradstreet, GcMAF, cancer cures and the suppression of medical science by the U.S. government](#).

[Video detailing the Dr. Bradstreet search warrant, served June 30](#), during which the U.S. government seized GcMAF from Dr. Bradstreet's research clinic:

[EzekielDiet.com story](#) that covers the apparent series of murders of holistic doctors, many of whom are working on advanced treatment protocols that render high-profit sectors of conventional medicine OBSOLETE:

Yet another doctor was just found murdered inside his home here on the East Coast of Florida. This makes six doctors to be found dead in the last month just from this region of the country alone. Four out of the six were found dead here in Florida. We lost the holistic Dr. Teresa Sievers, MD, who was found murdered in her Florida home just weeks ago. We've also lost the alternative Dr. Jeff Bradstreet, MD, who was found in a river with a gunshot to his chest. He'd recently moved to Georgia from Florida. We've also lost the Osteopath. Dr. Riley, who was found in Georgia at her home; just a few hours from the Florida border. She was found with a gunshot wound to her head.

Now we've lost Dr. Schwartz MD, who was found murdered in his home, on Sunday, July 19th, 2015. This was four weeks to the day after the death of the first physician: (Dr. Bradstreet MD) who I broke the story on a month ago. His family is still seeking answers as to what happened to him and they're some of the kindest people I know. The latest MD, Dr. Schwartz, in the picture above, lived just north of the fit, healthy, holistic Dr. Hedendal; who was the second doctor to be found dead this past Father's Day, in Boca Raton. This was the same day that Dr. Holt died at the age of 33. Both were fathers; and again, both men died here in Florida on June 21st, 2015.

[SCIENCE.NaturalNews.com entry describing the extraordinary benefits of GcMAF in a published study:](#)

Stepwise incubation of purified Gc protein with immobilized beta-galactosidase and sialidase generated probably the most potent macrophage activating factor (termed GcMAF) ever discovered, which produces no adverse effect in humans...

After about 16-22 administrations (approximately 3.5-5 months) of GcMAF, these patients had insignificantly low serum enzyme levels equivalent to healthy control enzyme levels, ranging from 0.38 to 0.63 nmole/min/mg protein, indicating eradication of the tumors. This therapeutic procedure resulted in no recurrence for more than 4 years.

In other words, the administration of GcMAF eradicated tumors and left patients cancer-free for 4+ years with no additional treatment!

Both U.S. and UK governments desperately seizing all supply, shutting down clinics, even as millions die from cancer every decade...

[UK govt. admission that GcMAF was on track to being commercialized as a pioneering cancer treatment](#), so they had to confiscate it!

GcMAF (Globulin component Macrophage Activating Factor), a blood product, claims to treat a range of conditions including cancer, HIV and autism...

More than 10,000 vials were seized at this site and production of this unlicensed medicine has now ceased. These products were sold through various European websites and UK patients may have bought it from one of these websites. We are working with colleagues in other countries to alert them to the potential risks. Our investigations are ongoing and we have received no reports to date of side effects caused by this product.

That same page lists some of the websites where GcMAF had been available for purchase:
