[July 12, 2023](#) – *UCSF Doctor Dr. Bob Wachter contracts COVID and collapses (6x COVID-19 Vaccinated).*

Amante
@DeVerdadera1

Dr. Bob Wachter [see photo below after COVID-induced syncope, fall, head injuries] said, "We've got to somehow reprogram our minds to think about this [risks and dangers of #COVID19] as a threat that is just not as profound as it was for a couple years."

"We're all wishing a speedy recovery to UCSF's cult-hit COVID sage Dr. Bob Wachter, who contracted the virus himself this week, then collapsed in the shower and suffered bleeding around the brain and a neck fracture."

We're all wishing a speedy recovery to UCSF's cult-hit COVID sage Dr. Bob Wachter, who contracted the virus himself this week, then collapsed in the shower and suffered bleeding around the brain and a neck fracture.

SFist has [often turned to](#) UCSF Department of Medicine Chair Dr. Bob Wachter for [advice on navigating COVID-19](#), and he's become [something of a local Twitter superstar](#) for his data-rich, highly approachable, lengthy Twitter threads on the matter. He also conducted a weekly "Grand Rounds" forum on the pandemic on YouTube, which just [aired its last episode](#) two weeks ago.

Yet Dr. Wachter himself had not yet contracted COVID-19 — though he tweeted through [his son getting the virus](#) and [when his wife had long COVID](#).

But Wachter did recently contract COVID-19, and started experiencing symptoms this past Sunday. And one of the consequences of those symptoms was pretty out of the ordinary, as the Chronicle reports Wachter collapsed in the shower and [suffered some brutal injuries](#).

If you're saying "Pics or GTFO," Wachter has the pics to prove it. Be warned, some of them

are graphic, and they are of course displayed in a [signature Bob Wachter tweetstorm](#).

Then I made a mistake – I took a shower. While the instinct to take a shower when you're sweaty and gross is understandable, stepping into hot water when you're dehydrated and flu-ish can cause your blood vessels to dilate, leading to a dangerous drop in blood pressure. (5/22)

**Bob Wachter**  · [@Bob_Wachter](#) · [Follow](#)

And that's what happened: I work up in a bloody pool on my bathroom floor. There was a dent in the lid of a trashcan, likely where my head had hit. I remembered nothing. As I managed to get up, it was clear that my face was going to need stitches, and more than a couple. (6/22)

First, yes, that is the bathroom trash can onto which Wachter fell, and left a significant dent in. The fall happened during or just after a shower — he doesn't remember — and this was after he woke up with serious sweats from the virus.

"I made a mistake – I took a shower," he said. "While the instinct to take a shower when you're sweaty and gross is understandable, stepping into hot water when you're dehydrated and flu-ish can cause your blood vessels to dilate, leading to a dangerous drop in blood pressure."

"And that's what happened: I [woke] up in a bloody pool on my bathroom floor," he added. "I had smashed the hell out of both my right forehead & the back of my scalp."

6) I'll add 45 minutes of clanging, tomb-like MRIs while wearing a mask & having gauze over ones eyes to my list of life experiences I'd love to never repeat. Luckily the MRIs showed no additional damage. (11/22)

Bob Wachter

@Bob_Wachter · [Follow](#)

7) The neurosurgeons stitched the back of my scalp, while an ENT-plastics chief resident did the intricate stitching of my forehead. Luckily, at my age a few scars don't bother me much, and I believe my wife likes me for reasons other than my previously seamless brow. (12/22)

Being Dr. Bob Wachter, he of course gets highly technical with the medical terminology. "Given the extent of injuries on both front & back of head, the ED docs ordered a head and cervical spine CT," he tweeted. "The head CT showed a small subdural hematoma, a little

rim of bleeding in the space around the brain. This bought me an overnight stay in the hospital for a repeat scan to ensure the bleeding wasn't enlarging; it also led to a week of an anti-seizure medication."

"More fun: the spine CT showed a small non-displaced cervical fracture (C3 for aficionados), which bought me a cervical spine collar and a few neurological exams to be sure I had no symptoms of spinal cord damage," he added. "With that kind of syncope and fall, I could easily have taken out an eye, been paralyzed from my spine injury, or died of a subdural bleed. I must have bruised my flank pretty good going down, since that's what hurts more than anything – no fun while I was coughing."

Remember the controversy over whether hospitalizations were “for Covid” or “with Covid”? (I co-wrote about it: [washingtonpost.com/outlook/2022/0...](https://www.washingtonpost.com/outlook/2022/0...)) While my case probably would have been deemed “with Covid” (admitted for syncope & head trauma), of course it all stemmed from Covid. (17/22)

[washingtonpost.com](https://www.washingtonpost.com)

Perspective | Is a patient hospitalized ‘with’ covid or ‘for’ covid? I...
Omicron is so contagious that people are testing positive in the hospital after being admitted for other reasons.

So, I've joined the 3/4 of Americans who aren't NoVids. I don't think it'll change my behavior – as long as the case rates remain low (they are now, tho wastewater is showing a little uptick; Figure), I'll continue being relatively careful, but no more than I've been. (18/22)

Covid-19 Wastewater Monitoring in the U.S.

This chart shows the SARS-CoV-2 virus concentration present in samples of wastewater taken from across the United States. The level of virus in wastewater is a leading indicator, meaning it precedes the change in clinical case counts or hospitalizations.

Data last updated July 10, 2023 from samples collected during the week of July 03, 2023. Most recent data are subject to change.

But Wachter says he is not alarmed enough to make any changes to his famously COVID-cautious behavior.

“As long as the case rates remain low (they are now, tho wastewater is showing a little uptick; Figure), I’ll continue being relatively careful, but no more than I’ve been,” he concluded on Twitter. “I will, however, be more careful about showering or taking a hot bath or hot tub when dehydrated. That’s one important takeaway from this mess.”

*

July 26, 2023:

Dr. Bob Wachter, UCSF Chair of Medicine is 6x Vaccinated. How do we know?

These are the COVID-19 Vaccines recommended in Canada, but the recommendations are almost identical in the US:

- 2 doses in [early 2021](#)
- 1st booster in [late 2021](#)
- 2nd booster in [April 2022](#)
- 3rd (Omicron bivalent booster) in [Oct. 2022](#)
- 4th (Omicron bivalent booster) in [Mar. 2023](#)
- 5th (XBB.1.5 monovalent booster) in [Sep. 2023](#)

If he had his 2nd bivalent in April 2023, that was his 6th COVID-19 Vaccine.

It makes sense that the UCSF Chair of Medicine would always be “UPTODATE” on his jabs.

2024:

Covid Risk and My Behavior, Winter 2023-24*

Cases Low and Stable** ✓

- Generally no masking (exception: caring for patients at work)
- Indoor dining OK
- Consider masking if near someone who appears ill (coughing, runny nose)

Cases Moderate and/or Rising** 😓

- Carry an N95
- Indoor dining OK but outdoor preferred
- Mask in any crowded indoor space when no need to talk (ie, theater, plane or bus, crowded market or store)

Bona Fide Surge (Cases Very High)** 🚫

- Carry an N95
- No indoor dining
- Mask in any crowded indoor space, regardless of need to talk (ie, wear mask at party, remove to eat/drink)

* I favor staying up to date with vaccine (particularly if over age 60 or co-morbidities)

** As judged by wastewater and hospitalization rates, mostly

Bob Wachter @Bob_Wachter

For folks in CA, we've seen a healthy [↑](#) in Covid hospitalizations & wastewater. Largely true across U.S. (See: [sfchronicle.com/bayarea/articl...](#))

Per my Winter algorithm below, I'm back to my yellow zone: Indoor dining OK; selected masking only. I'm glad, since cold & rainy here in SF.

Don Ford - The Per @ThePer · Jan 20 ...
Don't you have a trashcan to catch?

Lee Altanherd @Altanherd · Jan 20 ...

Bob Wachter @Bob_Wachter · Dec 18, 2023

How am I acting currently? Given a moderate uptick in Covid over the past two months, I'm back to masking in crowded and poorly ventilated places, particularly when I don't need to talk. When I do mask, I always use an N95; I see no reason to wear a less effective mask. (2/25)

Replying to @Bob_Wachter

So that's where I've landed today – in my moderate box, with a little extra caution due to seasonal viruses. This means I mask in theaters & crowded stores, but I'm ok maskless at indoor dining or parties – since that's how I've chosen to act when Covid risk is moderate. (23/25)

Dr. Bob's wife has "Long COVID" (April 2023):

[Click here to view the video](#)

Dec. 15, 2023 – Philippines, DOCTOR Rowena Burden, 58, dead of a HEART ATTACK on December 15, 2023. “6th COVID-19 Vaccination Done..2 primary series (2 Sinovac and 2 full-dose Moderna) [#heterologous](#) and 2 boosters (half-dose Moderna & full-dose [#Pfizer](#)”

CEBU, Philippines – Cebu physician Rowena Burden died at the age of 58 after a sudden cardiac arrest on Friday, December 15.

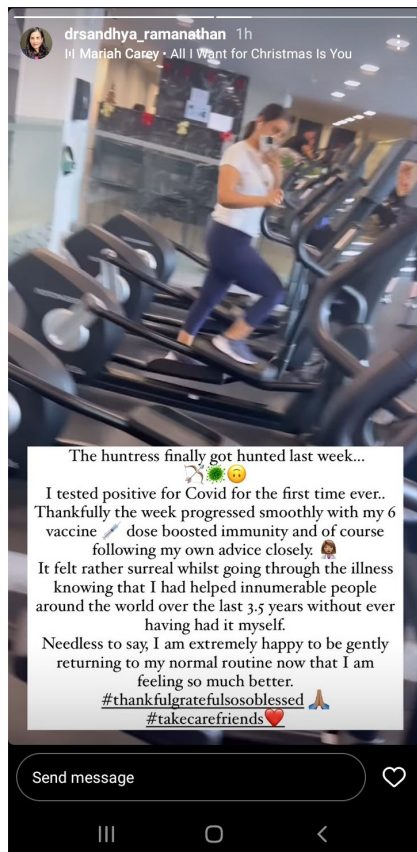

Kristian Burden, the physician's nephew, confirmed this in a chat message with Rappler on Friday morning.

“This morning, around 5 am, her assistant Mechelle, told us that *tita* (aunt) was suffering from back pain and that they were going to Chong Hua Hospital,” the nephew said.

Moments later, according to Kristian, the doctors declared Burden dead.

*

Dec. 2023 – New Zealand family doctor Dr. Sandhya Ramanathan had her 6th COVID-19 Vaccine. She got COVID after her booster but is thankful for the vaccine that did absolutely nothing for her.

My Take...

The idea that anyone would take 6 failed experimental COVID-19 mRNA Vaccines, let alone a doctor, seems utterly irrational.

It is unclear what caused UCSF Dr. Bob Wachter's collapse. He believes it was COVID. But it could also have been a COVID-19 mRNA Vaccine TIA (Transient ischemic attack) or a mini-stroke.

How common are post COVID-19 Vaccine strokes or collapses? WHO VigiAccess Database shows:

- 398,269 Dizziness
- 74,906 Syncope
- 34,623 Loss of consciousness
- 18,461 Cerebrovascular accidents
- 6,331 transient ischemic attack (mini-strokes)

Dizziness (398 269)
 Syncope (74 906)
 Loss of consciousness (34 623)
 Cerebrovascular accident (18 681)
 Transient ischaemic attack (6 418)
 Ischaemic stroke (5 500)

In 2022, COVID-19 Vaccine Induced strokes skyrocketed:

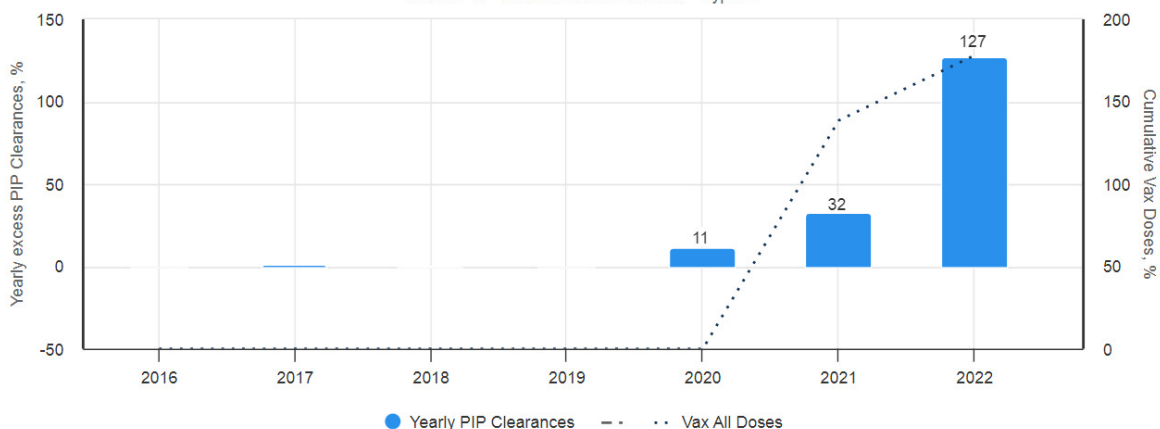

[UK Government Disability Data](#) shows a stunning rise of strokes causing disability in 2022 for all age groups of +127%.

Yearly PIP clearances (New Claims), from 2016 to 2023.

Choose the type of output for monthly PIP Clearances (New Claims):

Conclusion

I'm glad Dr. Bob made a full recovery from his fall. But it seems he hasn't even considered the possibility of injury from 6 COVID-19 Vaccines, especially considering that clotting is one of the more common side effects.

His wife, presumably 6x COVID-19 Vaccinated also, allegedly suffers from Long COVID (or

more likely COVID-19 Vaccine injury).

With his strict N95 masking regimen, I have to assume that he is a “true believer” and not that he is putting on a theatrical performance.

He had a very close call with that bad fall, he got COVID anyways, and his wife has been harmed as well, yet he persists with pushing the same failed pharma products that have almost certainly damaged his family.

It really does seem like many doctors are willing to quietly accept shortened lives, disability and even death, rather than admit they were wrong.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
