

Ukraine Sells Its Soul to the WEF'ers: Launches Program to Fully Digitize Citizenry in Partnership with Globalist World Economic Forum

The road to the New World Order runs through Ukraine

[New Year Donation Drive: Global Research Is Committed to the "Unspoken Truth"](#)

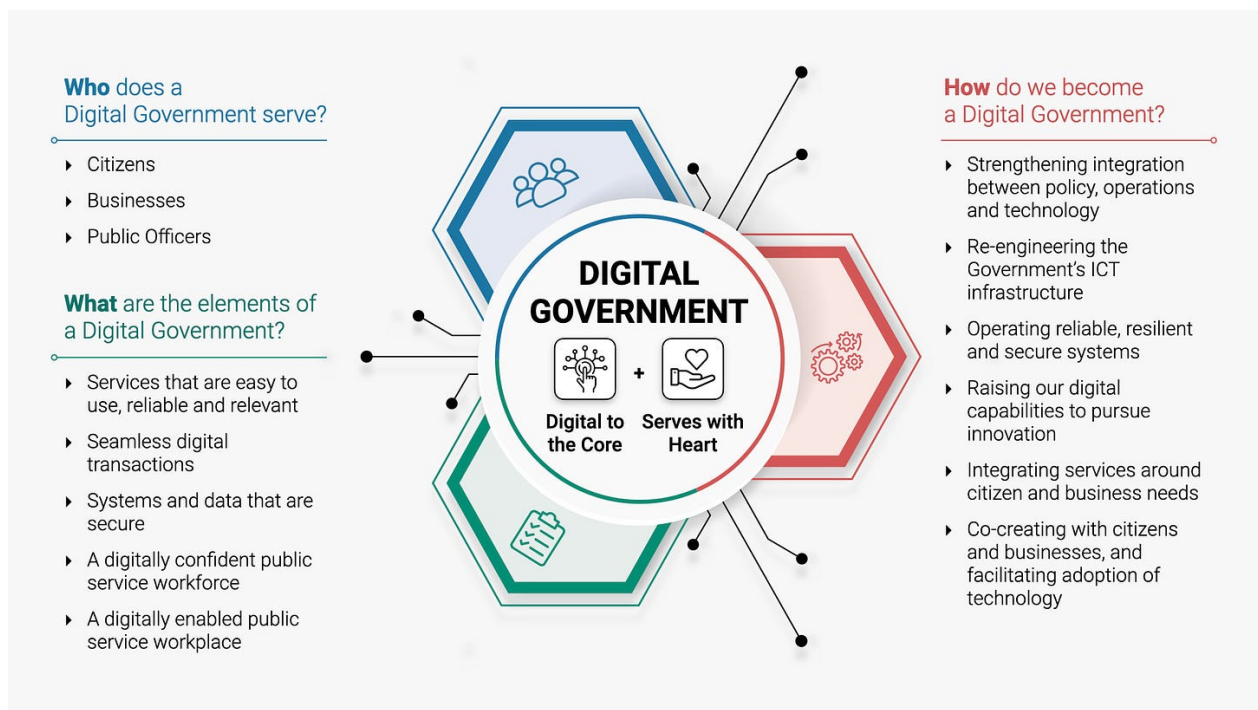

Ukraine may be at war but that isn't stopping it from playing a leading role in the digitization of the global economy.

The World Economic Forum and Ukraine's Ministry of Digital Transformation have announced their mutual interest in establishing a Centre for the Fourth Industrial Revolution (C4IR) in Ukraine, with a focus on government and corporate technologies.

As reported by [Smart Cities World](#), the letter of intent to establish the GovTech center in Kiev was signed by Børge Brende, president of the World Economic Forum and Mykhailo Fedorov, deputy prime minister for innovation, development of education, science and technology, and minister of digital transformation, Ukraine.

The so-called "GovTech" program is the WEF's plan for world government under a digital reset and it's already been launched in many countries. They admit this on their own website in an article titled: "[World Economic Forum Launches Global Government Technology Centre in Berlin](#)."

There are GovTech countries, cities and even [digital GovTech counties](#).

The announcement of Ukraine's participation in "GovTech" was made at the World Economic Forum's 2024 summit earlier this month in Davos, Switzerland, under the theme of "Rebuilding Trust."

Rule number one of any sane person who values individual freedom: Never trust a globalist. And a WEF'er globalist is the worst kind of globalist. Is it making more sense now why the WEF Western puppet leaders in Washington, London, Ottawa, Paris, Geneva and Berlin are so dead set on defending Ukraine against Russian "aggression?" The cumulative West led by Washington and London has invested in provoking this aggression since the early 2000's when George W. Bush began wooing Ukraine into the Western orbit of NATO.

The New World Order runs through Ukraine. It is one of the main nerve centers of globalism, sex trafficking, U.S.-controlled biolabs and money laundering for the rich and powerful. They can't lose it and they will send millions of their own people into the meat grinder to die defending it. As soon as they run what's left of the Ukrainians through that meat grinder, you will see them sending Americans, Brits, Germans and Frenchmen. Bank on it.

According to the *Smart Cities World* article cited above, in recent years,

"according to the WEF, Ukraine has evolved into a global GovTech powerhouse, becoming the first country with a digital ID system that can be used across the nation and the fourth in Europe to launch a biometric digital driving license."

Ukraine reports that in line with its goal to make 100 percent of public services available online, almost 20 million Ukrainians are already using the *Diia* application, which allows them to access key documents and government services.

The reason for establishing such a center in Kiev, the article says, would be "to provide a platform to develop government technologies by uniting scientists, businesses, technology companies, the public sector and the global communities of the forum. Its thematic focus will be the digital transformation of government, the development of e-government and widespread digital literacy."

Jeremy Jurgens, managing director of the World Economic Forum, said:

“We commend the inspirational work of the Ministry of Digital Transformation of Ukraine as [it] implements a strong digitalisation agenda under the most challenging circumstances. This does not only prove the resilience of Ukraine’s government and citizens but also the digital infrastructure of the country. The creation of a new center in Ukraine would undoubtedly help Ukraine develop new partnerships and strengthen its GovTech agenda.”

Make no mistake: the “GovTech” agenda is the same as the “Luciferian agenda” to create a high-tech oligarchy on a global scale.
