Post-9/11, Washington launched a drone war on Yemen as part of the “global war on terrorism” – largely killing defenseless civilians, supporting terrorists, not combatting them. The Bush/Cheney regime began what Obama and Trump escalated.

US-backed full-scale Saudi/UAE-led aggression on the country began in March 2015.

Operating covertly, US special forces aid the blockade and slaughter, along with CIA/Pentagon intelligence and logistical support, along with direct US involvement in conflict on the ground – responsible for the world’s severest humanitarian crisis.

The campaign against Houthi fighters aims to restore US-appointed puppet president Abd Rabbuh Mansur Hadi to power – no matter the human cost, regardless of millions of Yemenis suffering from malnutrition, famine, untreated diseases, and Saudi/UAE terror-bombing.

A UN-sponsored report by a so-called [Group of Regional And International Eminent Experts on Yemen](#) said

“the Government of Yemen and the coalition, including Saudi Arabia and the United Arab Emirates, and in the de facto authorities have committed acts that may, subject to determination by an independent and competent court, amount to international crimes.”

There’s no ambiguity about what’s going on and the culpable parties.

Airstrikes on civilian sites caused most casualties, targeting residential areas, markets, mosques, funerals, weddings, detention facilities, medical facilities, and other non-military related sites – flagrant war crimes under international law.

The so-called “Group of Experts (said they have) reasonable grounds to believe that individuals in the Government of Yemen and the coalition may (sic) have conducted attacks in violation of the principles of distinction, proportionality and precaution that may amount to war crimes.”

“There is little evidence of any attempt by parties to the conflict to minimize civilian casualties.”

Throughout years of full-scale war from March 19, 2015 through August 23, 2018, the UN Human Rights Office turned truth on its head, way-understating the casualty count – claiming 6,600 civilians killed, another 10,563 injured, while admitting the real figures are likely much higher.

An earlier UNICEF report said at least one Yemeni child under age-five dies every 10 minutes from starvation alone.

Annualized that's 52,560 deaths – plus countless numbers of older children and adults perishing from starvation, many more from untreated diseases, and other war related factors, along with deaths from Saudi/UAE terror-bombing.

Three-and-a-half years of US-orchestrated, Saudi/UAE-led naked aggression and blockade likely caused hundreds of thousands of casualties – many times more than the way understated UN figures, the casualty count increasing daily, a genocidal holocaust killing a sovereign nation, largely ignored by world leaders and major media.

There's no ambiguity about horrific ongoing war crimes, Washington, NATO, the Saudis and UAE largely responsible, even Israel to blame for supporting US-orchestrated aggression.

The so-called Group of Experts ignored US responsibility for orchestrating naked aggression on the region's poorest country.

Houthi fighters aren't free from culpability for illegal actions throughout the war. Yet their offenses are minor compared to US-sponsored aggression on the country, along with Saudi/UAE-led bombing and other high crimes, including illegal detentions, torture, and other abuses.

The so-called Group of Experts failed to lay blame where it mostly belongs. The scourge of US imperialism is what its endless wars of aggression are all about.
