Janey Thompson, daughter of WBT radio host Bo Thompson, dies after complications from blood clot

She was a sophomore at Wake Forest University and was a biophysics major.

[Janey Thompson](#), daughter of WBT radio host Bo Thompson, dies after complications from blood clot

By [Spencer Chrisman](#)

Published: Apr. 10, 2024 at 2:03 PM MDT

CHARLOTTE, N.C. (WBTV) – Janey Thompson, the daughter of WBT Morning Show Radio Host Bo Thompson, has passed away after suffering complications from a blood clot, according to the radio station.

Janey died on Tuesday, April 9. She was a sophomore at Wake Forest University and was a biophysics major.

While at Wake Forest, she was a member of the National Society of Physics Students, Sigma Pi Sigma, and Delta Delta Delta sorority.

She was a 2022 graduate of Myers Park High School where she played varsity basketball and softball.

The radio station released the following statement regarding the passing of Janey:

The WBT and Radio One family is deeply saddened by the tragic passing of Bo Thompson's daughter, Janey. There are no words to provide adequate comfort under these circumstances, but we are committed to supporting Bo and his family in any way possible during this difficult time. We know that the WBT Community of listeners joins us in prayers for the Thompson family.

Update on COVID-19 vaccine guidelines

April 20, 2023

The Campus Health Committee has announced a change in Wake Forest's vaccination requirements: Effective May 12, 2023, Wake Forest will strongly recommend that all faculty, staff and students remain up to date with COVID-19 vaccines, including variant-updated boosters. **The University will no longer require proof of COVID-19 vaccination status.** This change aligns with the expiration of the federal Public Health Emergency for COVID-19 on May 11, 2023. [Read the full announcement from the committee here.](#)

Categories: [University Announcement](#)

My Take...

18 year old Janey Thompson was a fit, high level athlete who played varsity basketball and softball. In the fall of 2022, she was accepted to Wake Forest University (biophysics major) and was required to produce proof of COVID-19 Vaccination Status to attend University.

The COVID-19 Vaccine Mandate was dropped as of May 12, 2023.

Janey, a high level athlete, died less than a year after the mandate was dropped, from a blood clot that "traveled from her leg to her heart", blood clots being one of the more common side effects of COVID-19 Vaccines.

This is a high likelihood case of a 20 year old girl being murdered by an illegal COVID-19 Vaccine Mandate.

Case 02: 21 year old Bryce Stanfield, football player and health sciences student collapsed at Furman University in SC during a football workout on Feb. 7, was on life support & died on Feb. 9, 2024. Autopsy: pulmonary embolism

- Bryce had to abide by a COVID-19 Vaccine mandate to attend Furman University in the fall of 2022 and again in the fall of 2023

Bryce Stanfield: Cause of death released for football player from Acworth

By FOX 5 Atlanta Digital Team | Published February 26, 2024 12:12PM | Sports | FOX 5 Atlanta | ➔

Bryce Stanfield (Furman University)

COBB COUNTY, Ga. - The official cause of death has been released for the football player from Acworth who died after a medical emergency during a workout at Furman University in South Carolina.

21-year-old [Bryce Stanfield](#), a junior defensive lineman, died Feb. 9 after he collapsed at Paladin Stadium.

An autopsy revealed that Stanfield's cause of death was a **pulmonary embolism and it was not related to football**, according to [The Post and Courier in Greenville](#).

Stanfield, who was a health sciences major, reportedly had no signs of sickness or injury besides a strained back muscle before the workout, according to the school's head coach.

After he collapsed on Feb. 7, he was placed on life support at Greenville Memorial Hospital. He passed away on Feb. 9.

Stanfield attended Harrison High School in Kennesaw. He had 25 college offers before he chose Furman. He played in all 13 games of the Paladins' 2023 season that included a SoCon championship, eight consecutive victories, and FCS quarterfinal round playoff appearance.

South Carolina. 21 years old. Bryce Stanfield has died two days after collapsing at the football stadium due to a 'medical emergency' on 2/7/24. Furman University is one of two Universities in SC that required it for students.

Wofford College and Furman University are the only colleges in South Carolina mandating COVID-19 vaccinations for students enrolling for fall classes. For state-supported institutions, there is no such requirement despite the American College Health Association's recommendation that colleges implement COVID-19 vaccination directives for all on-campus students, barring those with medical exemptions.

In The State, Clinton Colmenares, Furman's director of news and media strategy, said, "We saw what was happening nationally and took into consideration the advice from the CDC and the state. We want to get back to normal operations and really the best way for us to do that is to require vaccinations." The State reported that students may request an exemption from the requirement for religious or medical reasons, or due to a "strong personal objection," Colmenares added.

The State reached out to other schools in South Carolina, both public and private. A subscription is required to view the full article.

Case 03 – University of Colorado Colorado Springs (UCCS) nursing student 21 year old Mia Brown had a medical emergency at the Recreation Center, collapsed and died suddenly on Feb. 12, 2024.

- Mia Brown had to abide by a COVID-19 Vaccine mandate to attend UCCS in the fall of 2022

Nursing student passed away on the UCCS campus Monday tied to a medical emergency

STATEMENT FROM UCCS CHANCELLOR

"UCCS senior Mia Brown...was a dedicated nursing student who was highly involved on campus, and she will be very missed. Memorial services are still pending, but more information will be available in the days to come."

Facebook Twitter Email Print

COLORADO SPRINGS, Colo. (KKTV) - A nursing student passed away on the campus of the University of Colorado Colorado Springs (UCCS) this week.

A message went out to the UCCS community from Chancellor Jennifer Sobanet on the passing of Mia Brown.

I am writing to share the sad news of a loss to our campus. UCCS senior Mia Brown died on Monday, February 12 following a medical emergency at the Recreation Center. She was a dedicated nursing student who was highly involved on campus, and she will be very missed. Memorial services are still pending, but more information will be available in the days to come."

A spokesperson for the college said many staff and students immediately provided first aid before paramedics arrived.

Tragically, Mia's life was cut short just before her 22nd birthday which would have been celebrated on Feb. 25.

The university's COVID-19 vaccine requirement for students, faculty, and staff **ended effective May 15, 2023**, but we continue to strongly recommend COVID-19 vaccinations for all in our campus community as a safe, effective tool for minimizing the effects of COVID-19.

Vaccine policy update, masking remains in place

November 29, 2022 1:00 PM

To the Western community,

Before we enter the busy exam season, we want to thank you for taking care of yourselves, each other, and our community. With your help, Western has minimized the impact of COVID-19 and offered a consistent, positive on-campus experience this term.

Western has committed to regularly reviewing our vaccination policy. Based on the latest consultation with our medical experts and local public health, **we are revoking our vaccination policy and will no longer require students, employees, and visitors to be vaccinated to come to campus.**

That said, public health guidance remains clear: vaccination continues to be the best defence against severe illness and hospitalization. We strongly encourage everyone to remain up to date

[April 12, 2024](#) – Most Canadian Universities continue deadly COVID-19 Vaccine Mandates:

<div>  Status of COVID19 "Vaccine" Mandates at Canadian Universities & Colleges Created by Students Against Mandates (S.A.M.) </div>			
University	Province	Mandates 2 Doses	Who does the mandate apply to?
University of British Columbia	BC	Yes	For some staff, faculty, and students in a "care location"
University of Northern BC	BC	Unclear	
Simon Fraser University	BC	Yes	For "students participating in health science programs"
University of Victoria	BC	Unclear	
University of Alberta	AB	No mandate	
University of Calgary	AB	No mandate	
University of Saskatchewan	SK	Yes	"For certain clinical learning activities.. Medical students may not be able to participate"
University of Regina	SK	No mandate	Vaccine is not required for Nursing
University of Manitoba	MB	Yes	2 doses for all Health care students.
McMaster University	ON	Yes	Vaccine records for Health Science students
University of Toronto	ON	Yes	(2 doses, MD Students year 1). * Medical Exemptions.
Western University	ON	Yes	(2 doses mandatory - booster recommended). Schulich Medical School.
Northern Ontario	ON	Yes	Mandates in clinical settings.
University of Ottawa	ON	Yes	Full Vaccination Proof Required For Health Sciences Students
Queen's University	ON	Yes	Health care, 2 doses - clinical teaching activities and clinical placements)
Université Laval	QC	Unclear.	
University of Montreal	QC	Yes	According to faculty of pharmacy policy.
McGill University	QC	No mandate	Recommended, not mandatory - as of 2023
Université de Sherbrooke	QC	Unclear	
Memorial University of NFL	NF	Yes	2 doses mandatory
Dalhousie University	NS	Yes	Only for Post graduate Medical education

More than 5000 US Colleges and Universities mandated COVID-19 Vaccines

[Click here to watch the video](#)

My Take...

I don't understand why parents didn't push back harder against University and College COVID-19 Vaccine mandates, all of which were illegal.

I have reported over 100 sudden deaths of University or College students. That means there are thousands such deaths.

Even 1 or 2 deaths at each of the 5000 Universities & Colleges that mandated the jabs, would mean thousands of needless deaths.

Certain Universities have had numerous sudden & unexplained student deaths since the jabs were mandated in the fall of 2021 (Cornell, Princeton, Penn State).

So far, not a single University or College leader has been prosecuted for the student deaths their mandates caused. That must change, because the injuries & deaths will continue for a very long time.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to build our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
