On April 6th and 7th, [The New York Times](#) published articles addressing back-to-back leaks of more than 100 top secret Pentagon intelligence documents and photos suddenly appearing on Twitter, Telegram and other social media sites, including Russian. Right away I am suspicious of anything coming out of The New York Times, along with the Washington Post the biggest, overrated CIA-controlled propaganda newspaper that hires and pays money to robotic non-journalists to lie for the evil Deep State cabal. So, with The Times the source revealing this alleged plot breaching US national security, it’s already suspect.

These supposed highly sensitive classified documents revealed current alleged US plans and strategies to bolster Ukraine’s war effort against Russia as well as US interests in the Middle East, Africa and growing conflict in Pacific Asia with China. US intelligence officials admit that the leaked information is damaging to the five I-nations – US, UK, Canada, Australia and New Zealand. The report maintains that some of the disclosed material is so sensitive that it cannot be shared with foreign allies. One analyst expressed concern that this back-to-back major breach is “the tip of the iceberg,” with more to come.

According to *The Times*, one of the intel slides revealed “an alarming assessment of Ukraine’s faltering air defense capabilities.” The reveal could even alter current plans regarding Kiev’s long-hyped plan of a spring counteroffensive, or whether there will even be one.

On Monday April 10th, *The [Washington Post](#)*, the NYT’s sister propaganda whore, chimed in to cast serious doubt that the US even believes Ukraine has enough army and ammo capable of pulling off a spring counteroffensive. In addition to troop sizes, the classified materials also disclose arms-delivery schedules, logistical war data and each side’s death tolls with supposedly inflated Ukraine fatality totals and deflated numbers regarding Russian losses. Essentially, it shows that the US/NATO has been running Kiev’s entire military

operation in its proxy war against Putin way before his Special Military Operation in February 2022 right up to this moment.

Though documents showed up on Russian social media, the leaker(s) behind the alleged security breach are speculated to be potential allied saboteurs coming from within the Kiev military. It's only a matter of time before UFA insiders turn against the Zelensky regime that's simply following orders to use them as West's cannon fodder, providing more than enough motivation to expedite the inevitable Russian victory that would humanely spare further carnage reaching the last Ukrainian soldier still standing.

As a relevant, related aside, according to Seymour Hersh, America's foremost investigative journalist who recently exposed the US terrorist act of war blowing up the Nord Stream pipeline recently wrote on Substack on April 12th that

"Zelensky and his entourage embezzled at least [\\$400 million](#) from US funds meant for diesel procurement last year," per RT. The over \$100 billion US taxpaid dollars committed to this bottomless pit of Ukraine is being criminally misspent and wasted with full intent on plunging humanity into a nuclear world war. You can't get any more diabolical and evil than that.

Both Ukraine and Russia have accused one other of releasing the documents as a [disinformation](#) campaign leading up to their highly anticipated spring offensives. Meanwhile, the CIA and Pentagon scramble to find out who's responsible. An emerging consensus in DC is that it originated as an [American](#) source photographing top secret material prior to releasing them online. So, in this latest "who done it" melodrama, everybody's still busily playing guessing games to point the finger. The secret documents also apparently embarrass the US caught spying on allies like Israel, with claims the Mossad is behind the unrest against the Netanyahu regime, while South Korea's reluctant to replenish US artillery shells' nearly depleted stockpile because Seoul doesn't want them ending up in Ukraine. Another document shows growing collaboration and US concern over [United Arab Emirates'](#) ties with Moscow, including Russia's intelligence agency FSB.

The US government is currently ["in crisis mode"](#) as allies' inquiries press the Biden regime for answers, while the DC idiots are bumbling trying to figure out how classified Pentagon documents got leaked over a month ago initially to [gaming](#) website chatrooms. Both the Defense Department and Justice Department are investigating. Meanwhile, a number of [allied nations](#) have since come forth – Israel, UK, South Korea, Bulgaria as well as Ukraine, are all now pushing back, claiming that the documents are false, providing plausible deniability.

Speaking of denial, Secretary of Defense [Lloyd Austin III](#) is on the hotseat attempting to explain how his leaked top-secret DoD documents as far back as January this year began appearing on the internet and why it took so long till April to finally realize the leak. Austin said he [never knew](#) they were online until April 6th, which if he's honest, a rare moment I might add, means that for at least two months they were afloat without the big boss even aware.

What kind of national security defense is that? It took this fool over two months before standing before the media stammering away feebly trying to explain why, what, where, whom and how to explain to a waiting world. We should all know by now of Lloyd Austin's

incompetence, but his long track record shows a pervasive pattern of premeditated acts of evil with his mandated death jab against his own armed forces that he's directly in charge of, and that his job performance thus far in charge of US national defense has also been atrocious with the still wide open unsecured southern border, and his doubling and tripling down on defending Ukraine as a lost cause from the get-go never posing any threat to US national security but only Russia's because of his actions.

As his assistant squad leader his freshman year at West Point, I can see how the little robot grew into the big robot rewarded by his boss Obama by allowing ISIS terrorists to spread on the loose throughout the Middle East and how the four-star general rode the diversity over meritocracy wave right to the top of the predatory food chain. After all, Lloyd Austin is willing to say or do whatever his masters order him to do. A month ago I exposed his treasonous record and shoddy character in a [jameshfetzer.org](https://www.jameshfetzer.org/article) [article](#). Pathetic Austin response to the big question:

Well, they were somewhere in the web, and where exactly and who had access at that point we don't know. We simply don't know at this point. I will tell you that we take this very seriously and we will continue to investigate and turn over every rock until we find the source of this and the extent of it.

How 'bout doing us all a big favor Mr. Secretary and crawl under the nearest rock where you belong. A question he isn't yet having to answer but will is why Lloyd Austin has been secretly deploying NATO troops to kill Russian soldiers in Ukraine for over a year.

Evidence of US/UK/Polish/NATO boots on the ground in Ukraine have repeatedly surfaced over this last year which I covered, so it should not come as such a big surprise to learn that the Pentagon leak includes one classified document showing further proof that near [100 NATO forces](#) were captured in a photograph taken in Ukraine on March 1st, 2022, of which half were British per multiple media reports out as of Tuesday April 11th. So, this should end the false notion that all along Ukraine has merely been a US/NATO "proxy" war because it factually has not. Clearly, it's always been the West fighting against Russia war.

Why? Because the Deep State's cabal criminality has been exposed and is going down. The planetary bloodline controllers know their power and control are shrinking in Ukraine and they've grown mighty desperate as of late. That's precisely why they've gone frantic, crazily trying to establish their one world enslavement fantasy sooner than later. But with critical mass being reached worldwide, they will fail but first it appears they'll put us through hell on earth.

Yet another bone of contention over the now infamous leaked Pentagon documents resulted on Wednesday April 12th after Rothschild owned [Reuters](#) posted an article "exclusive" insisting that Serbia is committed to sending lethal aid to Ukraine or has already done so. As the only European nation refusing to apply sanctions against Moscow over Russia's Special Military Operation, Serbian Defense Minister [Milos Vucevic](#) called it is a lie, adding:

We have already denied these lies more than ten times, and will do it again. Serbia has not sold, nor will it sell weapons to either the Ukrainian or Russian side, or to countries surrounding this conflict.

Apparently, the small European nation of Serbia, determined to retain cordial relations with

Russia while maintaining a strict policy of neutrality during the Ukraine conflict is not easy with so much browbeating pressures coming from the West to join the “hate Russia” club. More words from the [defense minister](#):

It is obvious that someone’s goal is to destabilize our country and drag it into a conflict we are not participating in. We are consistently following our established policy [of non-involvement].

This US secret document scandal invites US adversary China to weigh in on the matter through China’s foreign ministry spokesman [Wang Wenbin](#):

We noted that many media outlets have pointed out that these leaked US military documents clearly show the deep involvement of the US in the Ukraine crisis. They also show once again that the US has long used its tech edge to conduct indiscriminate secret theft, surveillance and eavesdropping on countries in the world, including its allies.

The US government is reeling from this latest public relations disaster. This top secret document trove blatantly exposing the US Deep State’s ultra-reckless strategies is the most damaging US leak in recent US history, at least since *WikiLeaks* in 2010 released 400,000 documents and videos exposing America’s Iraq and Afghanistan War crimes, compliments of then Army Private Bradley Manning, released from detention in March 2020 as trans [Chelsea Manning](#), and *WikiLeaks* founder [Julian Assange](#), who is still languishing in the British Belmarsh dungeon. The West always hypocritically boasts its false sell of so-called “democratic freedom” while America’s Free Press ain’t so free anymore, because it expired years ago. Prior to the 2010 leak, the biggest one before that was 1971’s Pentagon Papers after military analyst [Daniel Ellsberg](#) released the truth about the Vietnam War lies, effectively marking a key turning point in the mounting public opposition against that unjustified bloody war.

Just as the Deep State let *The New York Times* break the embarrassing leak story, the Deep State turns to *The Washington Post* to get the scoop revealing through an anonymous teenage witness informant’s description of who this leaker likely is. On Wednesday evening April 12th, *WaPo* reports that the leaker is a man in his 20s who works on “a US military post” and shared top secret documents on [the chat app Discord](#). The alleged leaker who on the web goes by the moniker “OG” shared his novel findings with his fellow young gamer friends. One of his teenage online friends with parental consent apparently contacted the *Washington Post* to divulge information he knew about the alleged leaker. But right away the anomaly of timing shows up at the article outset:

A young, charismatic gun enthusiast who shared highly classified documents with a group of far-flung acquaintances searching for companionship amid the isolation of the pandemic.

Though all earlier media has reported the documents shared on the internet cover events from January to March this year, incongruency arises in sharing documents with “acquaintances searching for companionship amid the isolation of the pandemic.” The pandemic’s been over for more than a year. Then the article goes on to state:

United by their mutual love of guns, military gear and God, the group of roughly two dozen — mostly men and boys — formed an invitation-only clubhouse in 2020 on

Discord.

The teenager reveals that his idol is in his early to mid-20s. Fawning over OG's exploits, the informant describes OG as:

He's fit. He's strong. He's armed. He's trained. Just about everything you can expect out of some sort of crazy movie... He yells a series of racial and antisemitic slurs into the camera, then fires several rounds at a target.

With mass shooting false flags occurring every few days now in America, and the Deep State agenda calling for stricter gun control/confiscation, leave it to the *WaPo* rag to depict the guilty culprit leaker as a Bible thumping, gun loving white supremacist extremist, busily grooming his young extremist gun cult, fitting to the T the exact psychological profile that the Biden regime claims is America's most serious, dangerous threat - domestic terrorist extremists just like OG. How timely and convenient this political propaganda piece becomes when the FBI Director [Christopher Wray](#) just got caught colluding with church parishes to spy on the "extremist" threat that Christians pose at the same time that a [Christian school](#) in Nashville gets shot up. We the People know all too well that every US citizen's most dangerous criminal threat right now in America is our own treasonous fascist totalitarian government, proven guilty of committing democide against its fellow American citizens with mandated COVID kill shots. Biden's highly unpopular illegit regime has been flagrant in its politically weaponizing criminalization of dissent as America's #1 threat, epitomized by the pending passage of the draconian [RESTRICT ACT](#) and the arming of 87,000 newly recruited IRS agents targeting middle class dissenters who are determined to restore our constitutional rights. This is the real takeaway story from this Mockingbird CIA controlled *Washington Post* hit piece.

Perhaps the biggest takeaway from all the recently exposed public domain secret documents is that they all reflect the fact that the US soberly knows Ukraine's defeat is inevitable.

US neocons can no longer pretend a Kiev triumph is in the cards, especially coming from the two biggest liars in print - *WaPo* and *The Times*, previously always projecting how weak Russia and Putin are and how stalwartly robust the little underdog-that-could Ukraine is.

Reality is finally sinking in, with even the world's two biggest fake newspaper giants now admitting it. It's time for the DC neocons, before they push humanity off Armageddon cliff, to face reality that the American Empire and its sole superpower hegemonic status both militarily and economically, are now finally history, kaput, end of story. Resisting it only makes for heavier karmic debt, turning the world bully into the world pariah, shunned and humiliated by an increasing majority of nations on this planet that have long awaited the out-of-control warring nation to fall.
