Many of these quotes are from: [Vaccine Truth](#) to which we remain indebted.

*

*

“No vaccine manufacturer shall be liable...for damages arising from a vaccine-related injury or death.” – President Ronald Reagan, signing the National Childhood Vaccine Injury Act (NCVIA) of 1986, absolving even the most greedy, most corrupt pharmaceutical corporation from all medico-legal liability when people die, are injured or are disabled from their vaccines

“...the NIH (National Institutes of Health) is incapable of conducting conflict-free research...it is clear that the system managing our vaccine program is corrupt beyond repair and needs a complete overhaul.” – Lori Mellwain, National Autism Association

“The media hacks (on ABC, NBC, CBS, CNBC, CNN, PBS, NPR, etc) who push the pro-vaccine propaganda and hide the truth (about the dangers of Big Pharma and Big Medicine’s over-vaccination and over-drugging agendas) are complicit in crimes against humanity...The entire vaccine machine is built on lies of omission and fraudulent science. Billions of dollars are quietly paid out by the National Vaccine Injury Compensation Program (NVICP) to vaccine-injured people, but the overwhelming majority of vaccine injuries are never reported (by physicians who profit from the agenda).” — William Christenson

“The CDC (and the NIAID, NIH, NIMH, AMA, AAP, AAFP, ABC, NBC, CBS, CNBC, CNN, PBS, NPR, etc, etc) takes funding from (the pharmaceutical) industry... It is outrageous that (the pharmaceutical) industry is apparently allowed to punish the CDC if the agency conducts research that has potential to cut into profits.” — Jerome R. Hoffman, MD – UCLA Professor

"Fewer than 1% of vaccine adverse events are reported. The CDC's entire vaccination propaganda campaign rests on their claim that side effects from vaccination are exceedingly rare, but according to the blatantly pro-over-vaccination, Big Pharma-funded CDC, in 2016 alone, VAERS received 59,117 vaccine adverse event reports. Among those reports were 432 vaccine-related deaths, 1,091 permanent vaccine-related disabilities, 4,132 vaccine-related hospitalizations, and 10,274 vaccine-related emergency room visits. What if these numbers actually represent less than 1% of the total as this report asserts? You multiply those numbers by 100." – William Christenson

"For American kids born in 1986, only 12.8% had chronic diseases. That number has grown to 54% among the vaccine generation (those born after 1986) in lockstep with the CDC's and AAP's expanding vaccine schedule." — Robert F. Kennedy, Jr – [Children's Health Defense](#)

"Safety testing, which typically requires months and years for other medical products, often lasts only a few days with vaccines – not nearly long enough to spot cancers or chronic conditions like autoimmune diseases (e.g. juvenile diabetes, rheumatoid arthritis, multiple sclerosis), allergic illnesses (e.g. food allergies, allergic rhinitis, eczema, asthma), or neurological and neurodevelopmental injuries (e.g. ADD, ADHD, narcolepsy, epilepsy, seizure disorders, and autism). Vaccine manufacturer's product inserts that accompany every vial of mandated vaccines include warnings about these and over 400 other injuries including many serious immune, neurological, and chronic illnesses for which FDA suspects that vaccines may be the cause." – Robert F. Kennedy, Jr

"Many of these (childhood) illnesses became epidemic in American children after 1986, coterminous with the exploding vaccine schedule. For American kids born in 1986, only 12.8% had chronic diseases. That number has grown to 54% among the vaccine generation (those born after 1986) in lockstep with the expanding schedule." – Robert F. Kennedy, Jr

"The children who comprise this vaccine-injured generation are now aging out of schools that needed to build quiet rooms and autism wings, install wobble chairs, hire security guards and hike special ed spending to 25% to accommodate them. They are landing on the social safety net which they threaten to sink. As Democratic lawmakers all around the nation vote to mandate more vaccines and call for the censorship of experts (including parents of vaccine-injured or killed children) that are expressing concerns about vaccine safety, Democratic Presidential candidates argue about how to fix America's dysfunctional and unaffordable health care system without addressing the reality of the vaccine-related chronic disease and autoimmune disorder epidemic. The good news for Big Pharma, of course, is that many of these vaccine-injured children have lifelong dependencies on unaffordable blockbuster drugs like insulin, Adderall, anti-psychotic drugs, Epi-Pens, asthma inhalers, and diabetes, arthritis, and anti-seizure meds made by the same companies that made the vaccines." – Robert F. Kennedy, Jr

"An overwhelming majority of the FDA officials directly charged with licensing vaccines, and the CDC officials who effectively mandate them for children, have personal financial entanglements with vaccine manufacturers. These 'public servants' are often shareholders in, grant recipients from, and/or paid consultants to vaccine manufacturers, and, occasionally, even patent holders of the very vaccines they vote to approve. Those conflicts of interest motivate them to recommend ever more vaccines with minimal support from

evidence-based science” – Robert F. Kennedy, Jr.

“The FDA receives 45% of its annual budget from the pharmaceutical industry. The World Health Organization (WHO) gets roughly half its budget from private sources, including Pharma and its allied foundations. And the CDC, frankly, is a vaccine company; it owns 56 vaccine patents and buys and distributes \$4.6 billion in vaccines annually through the Vaccines for Children program, which is over 40% of its total budget.” — Robert F. Kennedy, Jr

“The HHS (US Health and Human Services partners with vaccine makers to develop, approve, recommend, and pass mandates for new products and then shares profits from vaccine sales. HHS employees can personally collect up to \$150,000 annually in royalties for products they work on. For example, key HHS officials collect money on every sale of Merck’s controversial HPV vaccine Gardasil, which also yields tens of millions annually for the agency in patent royalties.” — Robert F. Kennedy, Jr

“In 1986, Congress—awash in Pharma money (the pharmaceutical industry is number one for both political campaign contributions and lobbying spending on elected legislators over the past 20 years) enacted a law granting vaccine makers blanket immunity from liability for injuries caused by vaccines. The subsequent gold rush by pharmaceutical companies boosted the number of recommended inoculations from twelve shots of five vaccines in 1986 to 54 shots of 13 vaccines today. A billion-dollar sideline grew into the \$50 billion vaccine industry behemoth.” — Robert F. Kennedy, Jr

“Since vaccines are liability-free – and effectively compulsory to a captive market of 76 million children – there is meager market incentive for companies to make them safe. The public must rely on the moral scruples of Merck, GlaxoSmithKline, Sanofi, and Pfizer. But these companies have a long history of operating recklessly and dishonestly, even with (the many drug) products for which they can be sued for injuries. The four companies that make virtually all of the recommended vaccines are all convicted felons. Collectively they have paid over \$35 billion since 2009 for defrauding regulators, lying to and bribing government officials and physicians, falsifying science, and leaving a trail of (incurable chronic illnesses) injuries and deaths from products they knew to be dangerous and still sold under pretense of safety and efficacy.” – Robert F. Kennedy, Jr

“To physicians who know vaccines are causing harm and not reporting the adverse reactions, I say “shame on you”. Physicians who believe vaccines are completely safe and the worst that happens is a sore arm or slight fever, I say “do your research”. Speak with parents who, hours after their child received a vaccine, saw their child die or become comatose. If vaccines were not causing extensive harm, the pharmaceutical companies would never have to ask the government to pay for the damages that vaccines have caused and will continue to cause. Few parents begin hesitant about vaccines, but something happened that changed their minds about vaccines. A healthy child who suddenly starts seizing, becomes speechless, paralyzed, slips into a coma or dies(of SIDS) is validation to change minds about vaccines. ... when a child (sickens or) dies hours after his well-baby check-up, this is not a coincidence.” — Sylvia H. Williams

“Parents of children who have been damaged by vaccines, have no reason to lie. Their lives and the lives of their children have been changed forever. Why does the CDC purchase (and promote) \$4 billion in vaccines yearly? Research and scientists performing safety and efficacy vaccine studies should have no interest in the pharmaceutical industry or

government agencies. Why have the number of Autism cases increased at the same time the vaccine schedule has increased? Why do vaccines contain neurotoxins such as mercury, aluminum, and other ingredients such as formaldehyde and animal DNA? ... Why has there never been a study of vaccinated versus unvaccinated children? Ethically, this study can be performed with the number of unvaccinated children in the United States and those who are fully vaccinated. A doctor's FIRST commitment in his practice is ... to "first do no harm". — Sylvia H. Williams

"...even the ideal influenza vaccine, matched perfectly to circulating strains of wild influenza and capable of stopping all influenza viruses, can only deal with a small part of the 'flu' problem because most 'flu' appears to have nothing to do with influenza. Every year, hundreds of thousands of respiratory specimens are tested across the US. Of those tested, on average 16% are found to be influenza positive." – Dr Peter Doshi (from a British Medical Journal review article, "Influenza: marketing vaccines by marketing disease" 2013 (BMJ 2013; 346:f3037))

"...It's no wonder so many people feel that 'flu shots' don't work: for most flus, they can't work because most diagnosed cases of the flu aren't the flu... The CDC says that 30,000 – 60,000 people die from the flu every year in the US. But actually, it's closer to 20 people (because "pneumonia of all causes" are inexplicably included in the "influenza" category). However, we can't admit that, because if we did, we'd be exposing our gigantic PsyOp. The whole campaign to scare people into getting a flu shot (or a Coronavirus shot – Ed) would have about the same effect as warning people to carry iron umbrellas, in case toasters fall out of upper-story windows...and, by the way, we'd all be put in prison for fraud." – Jon Rappoport, investigative reporter

"Aluminum and mercury (in their well-child vaccines) are often simultaneously administered to infants...However, there is absolutely no data, including animal data, about the potential for synergy, additivity, or antagonism, all of which can occur in binary metal mixtures that relate and allow us to draw any conclusions from the simultaneous exposure to these two salts in vaccines." — Walt Ornstein (testifying at the Global Vaccine Safety Summit 2019)

"Alzheimer's Disease is a human form of chronic aluminum neurotoxicity." – JR Walton, PhD – University of New South Wales, Sydney, Australia

"in relationship to aluminum (in vaccines), being a nephrologist for a long time, is the potential for aluminum and central nervous system toxicity was well established by dialysis data. To think there isn't some possible problem here is unreal." — Dr. Weil (Pediatrician ..testifying at the CDC's infamous Simpsonwood conference – 2000)

"...The increased incidence of neurobehavioral problems in (fully-vaccinated) children in the past few decades is probably real...I work in the school system where my effort is entirely in special education and I have to say that the number of kids getting help in special education is growing nationally and state by state at a rate we have not seen before. So there is some kind of an increase. We can argue about what it is due to...But there are certainly more kids with ADD and there are more kids with speech and language disorders than there have been in the past." – Dr Weil

"As we add adjuvants (to vaccines, like aluminum), the primary concern, is (delayed) systemic adverse events rather than local adverse events. ... The major health concerns

which we are seeing are long-term (adverse) effects.” — Martin Howell Friede, Coordinator, Initiative for Vaccine Research, WHO (testifying at the WHO Global Vaccine Safety Summit)

“Hepatitis B vaccination has been performed in the national immunization programmes within the last 30 years and is mandatory for newborns and children, especially in developing countries. ... hepatitis B vaccination may lead to many demyelinating diseases, such as multiple sclerosis, Guillain-Barré syndrome, and acute transverse myelitis. Postvaccination ADEM_(Acute Disseminated Encephalomyelitis). ADEM has been associated with several vaccines such as rabies, diphtheria-tetanus-polio, smallpox, measles, mumps, rubella, Japanese B encephalitis, pertussis, influenza, hepatitis B_.... One crucial theory was the “molecular mimicry” hypothesis, which was described as an autoimmune reaction caused by a host receiving an antigen that has amino acid homology with amino acid chains in organs of the host’s body ... the hypothesis of “molecular mimicry” may be the key pathogenic factors leading to ADEM.” See [this](#).

Editor’s Note: (It is worth pointing out at this point that molecular mimicry is generally accepted as a mechanism by which vaccines can trigger serious, often permanent and impossible to cure, autoimmune diseases in vaccinated individuals. One good example is juvenile, insulin-dependent diabetes mellitus in vaccinated children, in which the tissue in the child’s insulin-producing pancreatic, insulin-secreting Beta cells is attacked and damaged/destroyed by the antibodies that were produced when an aluminum-containing, vaccine was injected into a child’s then-needle-damaged muscle/vascular/collagen/platelet tissue which then developed unintended antibodies against tissue other than that which was included in the vaccine.)

“Inactivated vaccines like DPT contain the neurotoxin aluminum!! This vaccine adjuvant is causing huge problems in the developed world, especially in vaccines such as Gardasil, which has the highest levels of aluminum of any vaccine. But research into its toxic effects is being suppressed. Professor Chris Exley, who is the World Expert on aluminum toxicity in living organisms. He has found ... the link between aluminum adjuvants and autism, MS (multiple sclerosis), CFS (chronic fatigue syndrome), Alzheimer’s dementia and other chronic conditions. Exley’s research funding has dried up. ‘They’ don’t want you to know that aluminum is harmful and has never been tested for safety.” – Angio Svizzera

“Our very great concern is that children worldwide are being exposed to un-recognised toxic chemicals that are silently eroding intelligence, disrupting behaviours, truncating future achievements, and damaging societies, perhaps most seriously in developing countries.” – Philippe Grandjean, MD, MPH

“Circulating immune complexes can result from either 1) normal responses to infection, 2) tissue injury or 3) artificial responses to vaccination. The fact that vaccines are designed to hyper-stimulate antibody production (thus producing much higher antibody levels than what occurs following natural infection), suggests that vaccination may carry a much higher risk for immune vasculopathies (and other autoimmune disorders).” – [Dr Lucija Tomljenovic](#)

“Vaccine-induced cerebral vasculitis is a serious disease which typically results in fatal outcomes when undiagnosed and left untreated. The fact that many of the symptoms reported to vaccine safety surveillance databases following HPV vaccination are indicative of cerebral vasculitis, but are unrecognized as such (i.e., intense persistent migraines, syncope, seizures, tremors and tingling, myalgia, locomotor abnormalities, psychotic symptoms and cognitive deficits), is a serious concern.” – Dr Tomljenovic

"HPV vaccines (including Merck's Gardasil and GSK's Cervarix) pose an inherent risk for triggering potentially fatal autoimmune vasculopathies and are therefore inherently unsafe for some individuals. Exactly which individuals might be more prone to developing a serious adverse drug reaction (ADR) following HPV vaccination is currently unknown. It is also unknown whether HPV vaccination can actually prevent cervical cancer cases since the current optimistic extrapolations have not been validated." – Dr Tomljenovic

"The only safe vaccine is one that is never used." — Dr James A. Shannon, NIH (National Institutes of Health)

"No batch of vaccines can be proven safe before it is given to children (in mass vaccination programs in pediatric clinics)." – Dr Leonard Scheele, Surgeon General of the United States, addressing an AMA convention in 1955

"The evidence for indicting immunizations for SIDS (Sudden Infant Death Syndrome) is ... compelling. However, the(pro-vaccine) keepers of the keys to medical-research funds are not interested in searching this very important lead to the cause of an ongoing, and possibly preventable, tragedy. Anything that implies that immunizations are not the greatest medical advance in the history of public health is ignored or ridiculed. Can you imagine the economic and political import of discovering that immunizations are killing thousands of babies?" — Dr William C. Douglass, MD (Honored twice as America's 'Doctor of the Year')

"Only after realising that routine immunisations were dangerous did I achieve a substantial drop in infant death rates. The worst vaccine of all is the whooping cough vaccineit is responsible for a lot of deaths and for a lot of infants suffering irreversible brain damage. In susceptible infants, it knocks their immune systems about, leading to irreparable brain damage, or severe attacks or even deaths from diseases like pneumonia or gastro-enteritis and so on." — Dr Kalokerinos

"Sudden Infant Death Syndrome (SIDS) has been reported following the administration of DPT. The significance is unclear. 85% of SIDS cases occur in the period 1 through 6 months of age, with the peak incidence at age 2 to 4 months." (Quote directly from the accompanying insert to Connaught Labs DPT vaccine.) — Jane Orient, MD, executive director of the Association of American Physicians and Surgeons (AAPS)

"Official data shows that large scale vaccination has failed to obtain any significant improvement of the diseases against which they were supposed to provide protection." — Dr Sabin, developer of Polio vaccine

"The greatest threat of childhood diseases lies in the dangerous and ineffectual efforts made to prevent them through mass immunization...There is no convincing scientific evidence that mass inoculations can be credited with eliminating any childhood disease." — Dr Robert Mendelsohn, MD

"It is pathetic and incredulous to say we ever vanquished smallpox with vaccines, when only 10% of the world's population was ever vaccinated." — Dr Glen Dettman

"The great doctors of the world know the medical theory of immunization and contagious diseases is as false as false can be. But they dare not speak out; and, as long as the practice makes money for those who sponsor it and people can be persuaded to believe in it, there will be no change...The decline in infectious diseases in developed countries had nothing to

do with vaccinations, but with the decline in (unhealthy water and food) poverty and malnutrition.” — Gerhard Buchwald, MD

“I was working in one of the oldest lung illness treatment centres in Germany, and just by chance, I looked at the files of those people who had fallen ill during the first German epidemic of smallpox (in 1947) ... We had always been told that the smallpox vaccinations would protect against smallpox. And now I could verify, thanks to the files and papers, that all of those who had fallen ill had been vaccinated. This was very upsetting for me.” — Gerhard Buchwald, MD

“There is a great deal of evidence to prove that immunization of children does more harm than good.” – Dr J. Anthony Morris (formerly Chief Vaccine Control Officer at the US FDA)

“There is insufficient evidence to support routine vaccination of healthy persons of any age.” — Paul Frame, MD, Journal of Family Practice

“I think that no person would permit anybody to get close to them with an inoculation if they would really know how they are made, what they carry, the lies told about them and what the real percent of danger is of contracting such a disease which is minimal.” — Dr Eva Snead

“There has been a frightening increase in cases of autism that has not been explained. There are a number of anecdotal reports from parents that symptoms of autism have appeared close to the time of the (MMR) vaccine.” — Jane Orient, MD

“I once believed in Jenner; I once believed in Pasteur. I once believed in vaccination. I once believed in vivisection. But I changed my views as the result of hard thinking.” — Dr Hadwen

“If you want the truth on vaccination you must go to those who are not (benefitting financially from it). If doctors shot at the moon every time it was full as a preventive of measles and got a shilling for it, they would bring statistics to prove it was a most efficient practice, and that the population would be decimated if it were stopped.” — Dr Allinson

“The greatest threat of childhood diseases lies in the dangerous and ineffectual efforts made to prevent them through mass immunization...There is no convincing scientific evidence that mass inoculations can be credited with eliminating any childhood disease.” — Dr Robert Mendelsohn, MD

“Live virus inoculations can actually cause a recently-vaccinated patient to shed the infectious vaccine viruses. The viral shedding is known to last for months in some cases. Therefore, the recently vaccinated individual can actually be contagious to close contacts. Post-vaccination contagion has been proven to occur following measles, mumps, chicken pox, oral polio and the new shingles vaccines. There are no commonly available tests to determine which recently vaccinated patients are shedding live vaccine viruses. Therefore, recently vaccinated persons are obviously far more likely to be contagious than are the asymptomatic, non-vaccinated children that are so irrationally feared, banned from attending public schools and often forced to be vaccinated against their wills.” — Gary G. Kohls, MD

48 Highly Vaccinology-literate Doctors, Uncontaminated by Big Pharma Money – and Therefore Banned by ALL Big Pharma-controlled Mainstream Media Outlets – Who Can Explain Clearly Why No Vaccine is EITHER Safe or Effective Long-Term

Dr Gary G. Kohls lives in the USA and writes articles that deal with the dangers of fascism, corporatism, totalitarianism, militarism, racism, malnutrition, and Big Pharma's over-drugging and over-vaccinating agendas. In addition, his columns deal with cultural movements that threaten democracy, war, civility, health, freedom, the future of the children and the sustainability and livability of the planet.

His Duty to Warn columns have been re-published around the world for the last decade. Dr Kohls frequently writes about Big Vaccine's over-vaccination agendas and Big Medicine's over-screening, over-diagnosing and over-treating agendas.

He is a Research Associate of the Centre for Research on Globalization.

Many of Dr Kohls' columns have been archived at a number of websites, including:
