Shankara Chetty could be called a second Zelenko. He is a medical doctor, a general practitioner in South Africa who has treated more than 7000 Covid patients successfully, without the need for extra oxygen or hospitalization. Through meticulous observation he was able to discern the nature of Covid-19 as a two-phase illness with a respiratory and an allergic phase, and to develop a treatment protocol which he describes in the first part of the interview.

In the second part he is talking about how he sees the pandemic, long Covid, the virus and its variants, the whack scenes, and the development of a new medicine, to treat the negative effects from the spike proteins.

I offer here a one-hour essentials edit of Chetty’s 1hr 50min testimony before the German Corona Inquiry Committee (session 82, Dec 10th, 2021). Get the full interview from [their official channel](#).
