Dr. Bhakdi explains clearly, based on new scientific evidence, why he believes:

- Your immune system is your best defence against SARS-CoV-2, and indeed all coronaviruses.
- If you have been infected, even if you experienced no symptoms at all, you are immune to all variants.
- We have already reached herd immunity.
- There is no scientific reason to vaccinate against SARS-CoV-2. There is simply no benefit and the rollout must be stopped.
