In a rare moment of truth of CNN Wednesday, Anthony Fauci admitted that there is no scientific reason why people who have had the COVID vaccine are still having their freedoms restricted.

CNN host John Berman asked Fauci “What’s the science behind not saying it’s safe for people who have been vaccinated – received two doses, to travel?”

“When you don’t have the data and you don’t have the actual evidence, you’ve got to make a judgment call,” Fauci replied, declaring that Americans will just have to trust the CDC:

Fauci, asked “what’s the science” for denying vaccinated Americans a return to travel, can’t explain.

As we [reported this week](#), CNN announced that the CDC is graciously allowing vaccinated Americans some ‘limited freedoms’, prompting a huge backlash on social media where people pointed out that the health body doesn’t grant anyone their God given freedoms.

The CDC does not give or take my freedom.

So, there is no science and the CDC is making a judgement call about how ‘free’ Americans

can be. Hmmm.

"We need data, and science. First we will see what vaccinated people do in their house, then where they travel, go to a store or a haircut."

Sounds like a centrally planned economy of a socialist state.

USA IS DEAD.

This kind of attitude actually hurts the fight against vaccine hesitancy....

The Infallible Fauci is a fraud and should be ignored at this point. Go live your lives instead of praying at the alter of overpaid government stooges who are drunk on power they never intend to give away. <https://t.co/rA9oKOrmEb>

The guy is a fraud. Maybe he wasn't when it started, but he is now.

Personally I don't have the data or actual evidence Fauci is a good person so I guess I'll just make a judgment call that he's an evil piece of human garbage
☹️

I'm gonna make a judgment call for my kids' spring break next week and fly to South Carolina to see their vaccinated grandparents. There won't be a mask in sight all week.

When you [the scientist] don't have the data and you [the scientist] don't have the actual evidence, then you [not-the-scientist, now-the-politician] has to make a judgement call.

FTFH
