NOW, HOW WOULD YOU INVESTIGATE?

Look at the facts of the WTC, specifically Tower 7, collapses:

- 1) Terrorists used explosives on WTC 1 in 1993.
- 2) Over 118 first responders reported hearing explosions before all 3 collapses, many said it sounded like the “bang-bang-bang” you hear during a demolition.
- 3) We have video, photographic and audio evidence of explosions after the impact and before collapse.
- 4) Live news was reporting multiple explosions, and the possibility terrorists also planted explosives.
- 5) Barry Jennings, the Emergency Coordinator for the NY Housing Authority reported explosions in Tower 7. He also reported being knocked down by explosions prior to the collapse of the tower.
- 6) Molten steel AND concrete were found at Ground Zero “remember, hydrocarbon fires do not burn hot enough to melt steel or concrete.” N.F.P.A. 921- 19.2.4 Exotic Accelerants states that molten steel and concrete could indicate the use of exotic accelerants, specifically Thermite.
- 7) WTC 7 was the first concrete and steel high rise to collapse during a fire that had not been struck by an aircraft. It was determined not to be significantly damaged by the falling debris, and diesel fuel tanks DID NOT contribute significantly to the fire (according to NIST final report 2008).

So, with all these indicators, would you test for exotic accelerants/explosive residue/Thermite? How could you confirm or rule out the possibility terrorists planted explosives in addition to the aircraft hits?

Why does N.I.S.T. REFUSE to this day to test for exotic accelerants in the most heinous crime in U.S. history? With the first high rise building collapses in history, why would N.I.S.T.

NOT test for accelerants? Especially, with so many indicators, one in which we have lost so many lives, so many Brothers, so many Freedoms, and our Economy. I have not found a single fire investigator who can give a reason other than they didn't want to find exotic accelerants or they were incompetent! Well, if it was incompetence, we can go back and still test. [These scientists have tested...read their results!!](#)

If you can't answer why, then please take the time to investigate. Browse our website, and please sign the petition. Our communities trust us. If we let them know this is not how professionals investigate, or how we treat our Brothers and Sisters who gave so much, they will listen. Also, please visit [www.FealGoodFoundation.com](http://www.FealGoodFoundation.com) and learn how to help our Brothers and Sisters in need.

Many of our Brothers and Sisters are sick and dying from their exposures at Ground Zero, our Country is crumbling. I am asking you to do something much more difficult than fighting a fire. I am asking you to be as professional as you would be on any emergency call. I am asking you to review the evidence surrounding 9-11. I am asking you to join us in demanding an investigation that follows National Standards, and passage of the 9/11 Health and Compensation Act to take care of the sick Ground Zero workers. I am asking you to stand with us to help SAVE OUR BROTHERS, SISTERS AND OUR COUNTRY!

Respectfully,

Erik Lawyer
