Transcript: July 1, 2020 - Canada Day

Interview with Nurse Luba, Parliament Building Ottawa, On Canada

.

.

.

Excerpts of Interview

Mark: I am here in front of the House of Commons, Parliament building, Ottawa, a lot of great signs here, a lot of people who oppose the lockdown, oppose the fake science, oppose fear mongering and division, a lot of people here support the truth and the real science. I have with me a Canadian nurse. Could I ask your name please?

Nurse: Luba

Mark Taliano: Could you explain to me your experiences as a nurse in this country?

Nurse Luba: Yes, have worked [as a nurse] in Russia, Ukraine, Israel, Canada. You know what's going on, from the beginning when we didn't have data, we saw the awful scare video from China, we didn't know what was going on, we were very scared, scared to get Covid, get sick, but up to now we have other data, we have statistics, recovery rate, of actually people who got sick, its 99% more than 99% more of the people who dying actually, being diagnosed, be positive with Covid, they have a lot of degenerative diseases.

Mark: They have co-morbidity?

Nurse Luba: Yes exactly

Mark: If I could interrupt for a second, I read CDC and FDA both said, both admitted in writing, but this of course was buried, no doubt, the PCR test are not meant for diagnostic purposes, can you comment on that, are these good tests or no?

Nurse Luba: Yes, yes exactly. I heard about this, I saw interview, and you know what I now heard and saw interview with famous guy, Dr Buttar.

Mark: Yes Dr. Buttar

Nurse Luba: people who were vaccinated for flu shot before, that they can probably will be positive.

Mark – yes

Nurse Luba: like positive, it's not like you sick and can be positive, many, many people you don't need to say all new cases, new cases coming and Buttar did tv.

Mark: – Can I ask the question, why do you think, we know, you and I know that these PCR and a lot of people know and the CDC admits it and so does the FDA that PCR tests are not suited for diagnostic purposes, why do you think government and media are stressing new cases, new cases, new cases what do you think is the agenda behind that?

Nurse Luba: You know, it's because of lots of money, money going to every patient who is positive coming from actually, I don't know Bill Gates I think, from all his people who are under, on top of him. Bill Gates, you know Bill Gates said, you can see lying, there is so much population now and we can deal with this, something like that, with vaccine, vaccine will help, so vaccine guys, a lot so much toxins inside.
