Guest is Prof. Dr. Ulrike Kämmerer, a human biologist and immunologist. Among her relevant books are:

- “The Ketogenic Diet for Cancer. The best foods for tumor diseases” (2016, with Christina Schlatterer, Gerd Knoll. Neuauflage: 2019)
- “Cancer Cells Love Sugar – Patients Need Fat.” (2020, with Christina Schlatterer)

This session talks about Dr. Kammerer’s contribution to an approach of preventive and also curative health maintenance through nutrition: the ketogenic diet.

By means of this nutrition-induced metabolic change (energy production via ketones instead of glucose), certain autoimmune diseases, such as those triggered by the mRNA injections, but also cancer diseases, can be brought under control.
