

Your Kid's Vaccines May Actually be Making Them Sick...

By [Dr. Gary G. Kohls](#)

Thousands of children are silently being poisoned by deadly toxins in government-mandated vaccinations — many without showing any immediate symptoms...

Among the many vaccine-induced chronic illnesses are these disorders:

- 1) Autoimmune/inflammatory Syndrome Induced by Adjuvants (ASIA) – a recent syndrome that most American physicians are (perhaps willfully[?]) unfamiliar with;
- 2) autoimmune disorders;
- 3) autism spectrum disorders (ASD), including Asperger's and autism;
- 4) the so-called ADHD;
- 5) allergies;
- 6) dementia;
- 7) mental retardation;
- 8) speech delays;
- 9) learning disorders;
- 10) epilepsy;
- 11) chronic abdominal pain/diarrhea; etc, etc.

That list is actually a short one.

Periodically injecting cocktails of toxic substances such as mercury, aluminum, live viruses, formaldehyde, chicken egg albumin, squalene, glutamate, DNA fragments, etc, into the muscles of unaware, innocent babies and adults puts them all at risk of being diagnosed with vaccine-induced brain disorders including, much later in life, Alzheimer's disease. (The chronic use of neurotoxic prescription drugs [especially psychiatric drugs] is also a major risk factor for Alzheimer's especially when vaccines are also periodically injected.)

One of the major problems with infant vaccines is that they are mandated (!) to be given to infants and young children in cocktails of hyperimmunity- and/or autoimmunity-inducing and potentially brain-damaging vaccines and brain-damaging prescription drugs.

Injecting combination cocktails of toxic vaccine ingredients simultaneously has never been proven to be safe or effective long-term, even in the animal lab. That reality should anger every parent of a chronically ill, fully-vaccinated child who may have been made ill when their child was given 8 antigens all at once! And it should anger (and embarrass) every vaccine-administering physician that wasn't aware of those dangers.

Indeed, even the injection of such toxic substances in single doses has been proven to cause cellular damage and death in the animal labs, especially involving the brain. And yet America's over-vaccination agendas have been promoted since the mid-1980s by the Big Pharma cartels whose industry-paid and employed, indentured "scientists" invented all the highly-profitable vaccines and then sold them to the public and the medical profession.

The list of corporate actors includes several Big Pharma giants in collaboration with America's Centers for Disease Control and Prevention (CDC), America's Food and Drug Administration [FDA], Big Medicine, America's American Academy of Pediatrics (AAP), the American Medical Association (AMA), the American Academy of Family Practice (AAFP) etc.
