*Not only has covid testing become a US\$ 100 billion business, it is also potentially a “deadly business”. PCR and Quick Test swabs are sterilized with the carcinogen Ethylene Oxide.*

According to the [Government of Canada](#), as well as the “[What do They Know](#)” the PCR test swabs are sterilized by ethylene oxide which is described by the US Environmental Protection Agency (EPA) as a carcinogen. In other words, a potentially cancer-causing chemical toxin.

In essence, EPA says the following about the carcinogen Ethylene Oxide:

“EPA classified ethylene oxide as a human carcinogen in December 2016. Studies of workers show that their exposures to ethylene oxide are associated with an increased risk of cancers of the white blood cells (the infection-fighting cells of the immune system). Studies also showed an increased risk of breast cancer in females.”

“Evidence in humans indicates that long-term exposure to ethylene oxide increases the risk of cancers of the white blood cells, including non-Hodgkin lymphoma, myeloma, and lymphocytic leukemia. Studies also show that long-term exposure to ethylene oxide increases the risk of breast cancer in females.”

“EPA, as well as the International Agency for Research on Cancer and the National Toxicology Program, classifies ethylene oxide as carcinogenic to humans. Evidence in humans indicates that exposure to ethylene oxide by inhalation increases the risk of lymphohematopoietic cancers (including non-Hodgkin lymphoma, myeloma, and lymphocytic leukemia) and, for females, breast cancer.

EtO is mutagenic (i.e., it can change the DNA in a cell). Children may be more susceptible to the harmful effects of mutagenic substances.”

For the full EPA text, see [this](#).

## RT-PCR Testing, Testing

Governments, especially in Western countries are calling frantically for more and more

testing? – Testing-testing-testing. They put people into lockdowns – the so-called Third Wave lockdowns, aka, illegal and totally unjustified house-arrests – a complete lie, so they submit easier to the constant testing, and eventually vaccination, hoping the lockdowns will end sooner.

Is it a coincidence or negligence that school children, the most vulnerable for cancerous toxin Ethylene Oxide (see EPA, above) – are now tested regularly and repeatedly? – In Switzerland for example, the Government has given the Cantons (semi-autonomous Departments) the authority (or a tacit order?) to have school children tested at least once a month, even though they show no symptoms whatsoever? It is not only negligence – it is an outright crime.

See this horrifying video of children testing – how they hurt the children – and why does the swab stick have to go all the way up in the nose to a thin wall separating the sinuses from the brain cavity?

Honest medical doctors tell you – even in Switzerland – this is not necessary. A swab could be taken simply from the saliva in the mouth.

Knowing the Big Picture behind Covid – the **Great Reset**, or **Building Back Better** – in brief the UN Agenda 2030, [see this](#). This testing-testing-testing with a carcinogen-tainted swab is beyond just negligence. Is it possible (yet to be verified) that many of the health staff in the testing front-line do not know about the danger for their testing subjects.

Are those in senior decision-making government positions throughout the West aware of what they are doing? [The Canadian Government Advisory states the following:](#)

If the swab is sterilized using an ethylene oxide (EtO) method, you should demonstrate that EtO and ethylene chlorohydrin (ECH) residuals meet the tolerable contact limits (TCL) specified in ISO 10993-7. Commonly used swab materials, compatible sterilization methods and appropriate biological indicators are described below.

Anything goes. Quietly injecting with multiple-multiple tests with swab sticks contaminated, alias “sterilized”, with carcinogenic agents, deep into your nose, at the entrance of the brain cavity, is just one means of creating potential cancer cases, not to mention brain damage.

Such “secondary effects” may appear much later, years down the road, when nobody can trace them back to the covid-tests, the covid vaccines and whatever else nefarious and diabolical tools are used in the name of combating covid.

Should the matter pertaining to the *use of carcinogenic Ethylene Oxide be the object of an investigation. investigation?*

## The PCR Tests Are Useless

By now, every government knows – there is no way of ignoring it – that the PCR tests are useless. They do not allow detecting the existence of the SARS-Cov-2 virus. [The WHO has admitted that the test as applied since January 2020 is invalid.](#)

However, most of the 193 UN member governments – with a few exceptions – run over this evidence like a steamroller, hoping the masses will not notice.

They may do so probably as long as it takes to get the world population vaccinated — as Bill Gates wants it. Remember, when he said, the world won't be getting back to somewhat close to normal until the 7 billion world population is vaccinated.

Again, one wonders what ulterior agenda might be behind this ferocious, coercive and [human rights abusing effort of most world governments – involving the UN system as a whole.](#)

The entire vaccination hype – everybody is strongarmed or otherwise manipulated into being vaccinated against a virus that does not need a vaccine to cure it. As we know by now, there are plenty of inexpensive but effective viral medicines that work efficiently against covid. China had no vaccines to combat the covid outbreak. Yet, they did it in a record time.

Recently, the EU Commission ratified a Vaccination Passport, or Certificate, without which your “free” movements may be tremendously hampered.

It becomes increasingly clear that there is another agenda in action; a “different agenda” from that of protecting people's health.

What are injected, especially with these non-vaccines, called mRNA jabs – never tested before – are, among other bio-chemicals, women- and men-sterilizing and fertilization inhibiting agents, as well as special electromagnetic proteins converting your body into an EM field for eventual digitization, to make humans into “trans-humans”.

These modern Franksteins could then be remotely controlled and become a walking “Agenda ID2020” – so they will eventually carry all their health and other personal data in their bodies. Agenda ID2020 is a Bill Gates creation and has already been approved in several countries, including Germany.

We are not there yet. But that is the plan. Bear in mind, life is not linear, but dynamic.

The Great Reset, UN Agenda 2030, “Building Back Better”, and other slogans to ring in the Big Change, are all based on linear approaches. They may work for a while. But in the long-run, dynamics – the life-inherent defense system, will prevail. See also [“The Big Picture” article](#)

The danger of vaccination is multifaceted and, if carried out in the midst of what is called a pandemic, it can cause a global catastrophe a few years on, according to an interview with Dr. G. Vanden Bossche, a renowned virologist, who worked for many years for the pharma industry, notably vaccine manufacturers, including Pfizer, Moderna, the Bill and Melinda Gates Foundation, and GAVI – the *Vaccine Alliance*, in Geneva – physically located – by sheer coincidence – next door to WHO.

<https://www.youtube.com/watch?app=desktop&v=ZJZxiNxYLpc>

Premature death is written all over the place from all sorts of artificially imposed causes, as part of the huge criminal fraud of covid, the mass manipulation by the media driven by

government lies – lies indoctrinated by false media propaganda – by the 193 UN member governments. What a coincidence!

Think about it.

And especially ask your governments without hesitating with a loud voice that **TESTING BE IMMEDIATELY STOPPED.**
