Region: [Europe](#)

Theme: [Media Disinformation](#), [Science and Medicine](#)

Is this article ‘fake news?’ No, because the statement in the title that reads “we have a lot of evidence that it’s a fake story all over the world” is an [actual quote](#) from a representative of the group discussed in the article.

Whether or not what the quote says is true, on the other hand, is up for you to decide or according to multiple governments, is up for the [World Health Organization \(WHO\)](#) to decide.

Is the title misleading or inaccurate? No, again, it’s a direct quote and represents the opinion of multiple health professionals.

Are these health professionals implying that COVID-19 is a fake virus? No, they are simply implying that it’s not as dangerous as it’s being made out to be, and I summarize some of that information below that has them coming to that conclusion.

These doctors and scientists are being heavily censored across all social media platforms, and those who write about them are experiencing the same.

Many of the claims these doctors make have been ‘debunked’ by mainstream media, federal health regulatory agencies and ‘fact-checkers’ that are patrolling the internet. Any information that does not come from the (WHO) is not considered reliable, truthful or accurate, and that would include the information presented in this article and information shared by these experts in the field. People are being encouraged to visit the WHO’s website for real and accurate information about COVID-19 instead of listening to doctors and scientists who oppose the narrative of these health authorities.

What Happened: [More than 500](#) German doctors & scientists have signed on as representatives of an organization called [“Außerparlamentarischer Corona Untersuchungsausschuss.”](#)

Außerparlamentarischer Corona Untersuchungsausschuss stands for the “Corona Extra-Parliamentary Inquiry Committee which was established to investigate all things that pertain to the new coronavirus such as the severity of the virus, and whether or not the actions taken by governments around the world, and in this case the German government, are justified and not causing more harm than good.

As the Corona-Extra-Parliamentary Inquiry Committee, we will investigate why these restrictive measures were imposed upon us in our country as part of COVID-19, why people are suffering now and whether there is proportionality

of the measures to this disease caused by the SARS-COV-2 virus. We have serious doubts that these measures are proportionate. This needs to be examined, and since the parliaments – neither the opposition parties nor the ruling parties – have not convened a committee and it is not even planned, it is high time that we took this into our own hands. We will invite and hear experts here in the Corona speaker group. These are experts from all areas of life: Medicine, social affairs, law, economics and many more. ([source](#))

You can access the full english transcripts on the [organization's website](#) here.

This group has been giving multiple conferences in Germany, in one of the most recent, Dr. Heiko Schöning, one of the organizations leaders, stated [that](#)

“We have a lot of evidence that it (the new coronavirus) is a fake story all over the world.”

To put it in context, he wasn't referring to the virus being fake, but simply that it's no more dangerous than the seasonal flu (or just as dangerous) and that there is no justification for the measures being taken to combat it.

I also think it's important to mention that a [report](#) published in the British Medical Journal has suggested that quarantine measures in the United Kingdom as a result of the new coronavirus may have already killed more UK seniors than the coronavirus has during the peak of the virus.

Below is a press conference held by representatives of the group that took place last month, you can find more important information below that. (Unfortunately, the video has been removed by Youtube)

Why This Is Important: It can be confusing for many people to see so many doctors and many of the world's most renowned scientists and infectious disease experts oppose so much information that is coming from the WHO and global governments.

Many scientists and doctors in North America are also expressing the same sentiments. For example, The Physicians For Informed Consent (PIC) recently published a report titled “Physicians for Informed Consent (PIC) Compares COVID-19 to Previous Seasonal and Pandemic Flu Periods.” According to them, the infection/fatality rate of COVID-19 is 0.26%. You can read more about that and access their resources and reasoning [here](#).

John P. A. Ioannidis, a professor of medicine and epidemiology at Stanford University has said that the infection fatality rate “is close to 0 percent” for people under the age of 45 years old. You can read more about that [here](#). He and several other academics from the Stanford School of Medicine suggest that COVID-19 has a similar infection fatality rate as seasonal influenza, and published their reasoning in a study last month. You can find that study and read more about that story [here](#).

Michael Levitt, a Biophysicist and a professor of structural biology at Stanford University criticized the WHO as well as Facebook for censoring different information and informed perspectives regarding the Coronavirus and has claimed that, with regards to lockdown measures, that “the level of stupidity going on here is amazing.” You can read more about this [here](#).

Dr. Sucharit Bhakdi, a specialist in microbiology and one of the most cited research scientists in German history is also part of Corona Extra-Parliamentary Inquiry Committee mentioned above and has also expressed the same thing, multiple times early on in the pandemic all the way up to today.

Implementation of the current draconian measures that are so extremely restrict fundamental rights can only be justified if there is reason to fear that a truly, exceptionally dangerous virus is threatening us. Do any scientifically sound data exist to support this contention for COVID-19? I assert that the answer is simply, no. – Bhakdi. You can read more about him [here](#).

Below are some interesting statistics from Canada. ([source](#))

The Takeaway

We have to ask ourselves, why are so many experts in the field being completely censored. Why is there so much information being shared that completely contradicts the narrative of our federal health regulatory agencies and organizations like the WHO?

Why are these experts being heavily censored, and why are alternative media platforms being censored, punished and demonetized for sharing such information?

Is there a battle for our perception happening right now? Is our consciousness being manipulated? Why is there so much conflicting information if everything is crystal clear? [Why are alternative treatments that have shown tremendous amounts of success](#) being completely ignored and ridiculed? What's going on here, and how much power do governments have when they are able to silence the voice of so many people? Should we not be examining information openly, transparently, and together?
