

The WEF's "Solution" to Revamping the Global Economy: Artificial Intelligence (AI) Will Decide What Industries to Liquidate to "Stop Economic Growth"

Enjoy Your Universal Income, Stop Working, and Shut Up

A brand new video from the World Economic Forum's [agenda article](#)! The agenda is to stop growth and decide what industries to shut down.

Some very juicy quotes from the video (with timestamps)

4.23: Some economists think the solution is to reengineer our economies completely. They make the case that what we should really be doing is weaning ourselves from the addiction to growth and shifting to a post-growth economy (later defined as liquidation of various industries — I.C)

Instead of growing, WEF wants us to focus on what we "really need" (according to WEF)

4:46 things like renewable energy, healthcare, and public transportation. To do that, economists think that rich countries should do something like guarantee living wages.

They are talking about unearned "universal basic income" because the next cut shows a sad-looking lonely person spending a day not working. It promises that people will not be needing jobs to "earn their living or get healthcare":

What is the goal? To scale down production of *things deemed less necessary!* (sic)

WEF asks if we could “do away with entire industries”, showing an anxious, sweaty man worried about his industry being shut down:

How would we decide what is unnecessary, asks the voice prompter. How would we resolve our disagreements? How to make these decisions?

The answer is, says WEF, is that *we need to enlist help from AI systems*, in order to answer the questions such as *which industries to do away with*.

WEF loves AI!

The WEF deciding what industries to do away with, using WEF-sponsored AI, may sound insane and stupid like a half-baked, paranoid conspiracy theory of a delusional hillbilly.

But I did not come up with any of it! I just retold the WEF article and the WEF video. I am not sure if they are serious or are just trolling us, but in the past, they were dead serious about their agenda.

What do you think?

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

ISBN: 978-0-9879389-3-0, Year: 2022, PDF Ebook, Pages: 164, 15 Chapters

Price: \$11.50
