Western countries, including Canada, are using experimental mRNA injections in nursing homes, on the most vulnerable of people.

Nobody can give informed consent because the injections are experimental. How do we know that the injections are experimental? There are at least two on-going clinical trials:

One is,

[“A Study to Evaluate Efficacy, Safety, and Immunogenicity of mRNA-1273 Vaccine in Adults Aged 18 years and Older to Prevent COVID-19”](#) (1).

The estimated study completion date is October 27, 2022.

Another study is titled,

[“Study to describe the Safety, tolerability, Immunogenicity, and Efficacy of RNA Vaccine Candidates Against COVID-19 in Healthy Individuals”](#) (2).

The estimated study completion date is January 31, 2023.

We do have a narrow window to observe the immediate adverse impacts of the vaccines. So far, CDC data alone indicates that there have been 653 deaths and 12,044 other injuries following COVID vaccine injections (3). (Many countries are not included in this data.)

Nobody knows the medium and long term adverse vaccine-related events, so this precludes informed consent.

Since informed consent is impossible, and experimental vaccines are being administered to humans, Western governments are in violation of the Nuremberg Codes, established after the Second World War to prevent human experimentation and subsequent evils.

Nuremberg Code (1948)

1. The voluntary consent of the human subject is absolutely essential.
2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disability injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.
8. The experiment should be conducted only by scientifically qualified persons.
9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.
10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage , if he has probable cause to believe that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Everyone who has studied what is really happening in the Middle East (and beyond) knows that the “Nazis” never left. Now the “Nazis” (Western governments) are showing their true colors and killing their own people again.

It isn't just vulnerable people in Long term Care Homes either. Provincial (health) (sic) measures, [reports Dr. Stephen Malthouse](#), “have been shown to create 12:1 more deaths than the virus. (4)”

Western governments are deliberately causing human suffering and death on a global scale beneath “humanitarian” and now “public health” pretenses. These are Crimes Against Humanity.
