It's the 13th December 2021.

In my video dated 11th December I detailed some of the health problems which face the gullible folk who have succumbed to the lies and misinformation shared so widely and enthusiastically by governments, the medical establishment and the mainstream media.

In that video, entitled '[Here's why most of the jabbed will die early](#)' I mentioned my fear that the jabbed might suffer brain damage as a result of the covid-19 jab.

[Click here to watch the video.](#)

That fear was real, as I will show in this video.

It has been established that there is much that no one yet knows about the covid-19 jabs and the eagerness of the Medicines and healthcare products regulatory agency in the UK to licence a product about which information appeared to be lacking has never been adequately explained. We do know however that, as I was the first to reveal, the MHRA received a huge sum of money from the Bill and Melinda Gates Foundation – which has financial links with jab producers such as Pfizer.

As far as the effect on the brain is concerned the big question is, can the lipid nanoparticles carry the mRNA jab across the blood brain barrier?

The blood brain barrier is a semi permeable barrier of cells which prevent some substances in the blood from crossing into the protective fluid around the central nervous system.

It is vital to know if this happens because if it does then all bets are off as to what might happen to the brain.

And after all, liquid nanoparticles are already used to deliver other drugs across the blood brain barrier.

If the LNPs carry the mRNA jab into the brain then the neurons, the brain cells, might be marked as foreign by the body's immune system. And as more booster jabs are given the problem will get worse.

The worry is that brain cells might be targeted and killed by cytotoxic T cells.

It has now been established that mRNA has been found in all human tissues except the kidney. It has been found in heart, lung, liver, testicles – and brain. A Japanese study, for example, showed that the vaccine does end up in the brain.

Also worrying is the fact that researchers have called for studies to investigate any relationship between jabs and acute CNS demyelination.

How much damage will this do?

How long will it take before brain damage can be identified?

I don't have the foggiest idea.

And nor does anyone else.

In a normal experiment with a new drug, doctors would be looking and checking all the possible problems before releasing the drug for widespread use.

But the covid-19 jabs are being rolled out to billions without any one having the faintest idea what will happen.

If you have been jabbed, the first certainty seems to be that the mRNA vaccine will enter your brain.

The second certainty is that the more covid jabs you have, the more dangerous this will be.

How many of your brain cells will die is something only time will tell. And children, of course, will be more vulnerable because they are more vulnerable anyway and because they are likely to live longer.

Some experts, advisors and regulators will tell you that the risks are small. But how can they know that? And what is small? They told us that the blood clotting problems were small.

In my view, having one of these jabs is the equivalent of taking a huge dose of LSD and waiting to see what happens. And hoping that you're not going to end up like Peter Green for example.

And, remember, the covid-19 jabs don't stop you getting covid-19 and they don't stop you passing it on. According to the NHS's own guidelines in the UK you can still get or spread covid-19 even if you have had three jabs.

The choice about whether or not to be jabbed should be yours.

But governments want to make these jabs compulsory.

You can find links to more information on my websites www.vernoncoleman.com and www.vernoncoleman.org

If this jab were being given for a lethal disease with a 50% mortality rate then the risks might be worth taking. It's not and they're not.

Thank you for watching an old man in a chair. And thanks to Brand New Tube and to Muhammad Butt. Please subscribe to my channel on Brand New Tube and spread my videos about on other platforms such as Rumble, Brighteon, Odysee and Bitchute. My thanks to everyone who does this. Put this video on Twitter and Facebook too. If you get your wrist slapped regard it as a war injury. Please do translations too. All the papers and so on that I refer to can easily be found on the internet. If I give you all the links I'll never do anything else. We do put up transcripts of the videos on both websites and when possible we add important links.

For the record, this channel has not been monetised – none of my videos ever has been. There are no ads, no sponsors and no requests for funds on videos or websites.

Don't forget to watch my friend Dr Colin Barron's amazing videos which are always fantastic and often incredibly funny. And visit his website www.colinbarron.co.uk.

Read www.theLightpaper.co.uk for all the news considered too truthful to print by the mainstream media. An amazing 200,000 copies are distributed. That's a bigger circulation than The Guardian. Make sure you get hold of a copy of '[We are the 99%](#)' recorded by Darren and the Daz Band which is the anthem for the Resistance Movement. It's vital it's the Christmas Number One. There is a link to it on both my websites. And visit and astandinthepark.org which will give advice on how and where to stand in a park.

Please visit my own websites www.vernoncoleman.org and www.vernoncoleman.com. www.vernoncoleman.com is more old fashioned but contains hundreds of articles on animal issues, politics and much else in addition to health. You can find free books on both sites and brand new stuff is added every weekday. There are hundreds of original articles to read and, of course, the feature detailing vaccine damage is updated every week. New articles

are added most days.

Vernon Coleman's Wednesday Review will, God willing, appear here every Wednesday at 7pm. If it doesn't then either something has happened to me or the video has been suppressed as has so much of my work these days.

We all need to pray for the truth to be shared by the many, not just the few. Whatever your religion you need to pray because the people running this fraud respect only lies but, in the way that vampires fear sunlight, they fear the truth – it is your government's greatest enemy and our only weapon. Finally, although it may feel like it at times, please remember that you are not alone. More and more people are waking up and once they are awake they don't go back to sleep. – which means our numbers are growing daily.

If we are going to win this war then we have to fight hard and with determination and passion and the truth. Remember, this is primarily a propaganda and media war.

Distrust the government, avoid mass media and fight the lies.

Thank you for watching an old man in a chair.
