Today, the dangers of military escalation are beyond description.

What is now happening in Ukraine has serious geopolitical implications. It could lead us into a World War III scenario.

It is important that a peace process be initiated with a view to preventing escalation.

Global Research condemns Russia’s invasion of Ukraine.

A Bilateral Peace Agreement is required.

The official US embassy website recently [REMOVED all evidence of bio-labs in Ukraine](#). These bio-labs are funded and jointly operated by the US Department of Defense (DOD).

The laboratory documents were public knowledge up until February 25, 2022. These documents include important construction, financing and permit details for bioweapon laboratories in Ukraine. But now the US government is scrubbing these documents from the internet and becoming less transparent with this critical information.

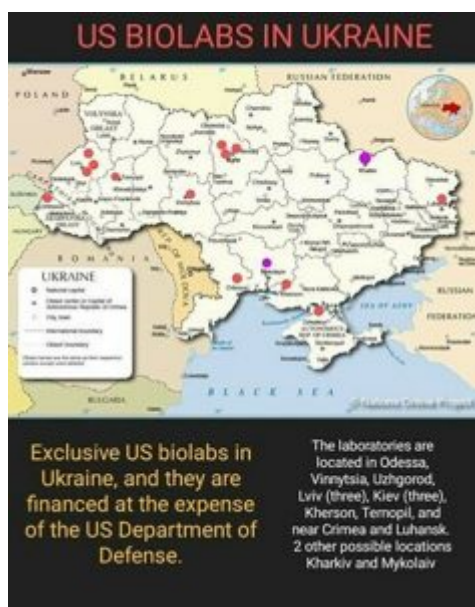

This comes at a time when the world population is waking up to the reality of gain-of-function bioweapons research, lab leaks and predatory vaccine and diagnostics development. These bio-labs generate pathogens of pandemic potential that exploit human immune systems and are the foundation for which medical fraud, malpractice, vaccine-induced death and genocide originates.

Could the existence of these bioweapons’ labs have something to do with Russia’s “special military mission?” For years, [Russia has accused the US of developing bioweapons](#) near its borders. Are the Russians currently gathering evidence from these labs? What is the current

status of these facilities?

The U.S. erected a vast network of bio-labs in Ukraine and is scrubbing details from the net

The US DOD funded at least 15 different bio-labs in Ukraine. These are not Chinese or Russian bio-labs. At least eight of these are bioweapons labs are operated exclusively by the US. These laboratories “consolidate and secure pathogens and toxins of security concern” to conduct “enhanced bio-security, bio-safety, and bio-surveillance measures” through “international research partnerships.” Each facility costs the US taxpayers anywhere from \$1.8 to over \$3 million. The DOD facilitated the permit process to allow Ukrainian scientists to work with pathogens of pandemic potential.

The US DOD works directly with Ukraine’s Ministry of Health, State Service of Ukraine for Food Safety and Consumer Protection, the National Academy of Agrarian Sciences and the Ministry of Defense. This network of bio-labs includes facilities in Odessa, Vinnytsia, Uzhgorod, Lviv, Kiev, Kherson, Ternopil, Crimea, Luhansk and two suspect facilities in Kharkiv and Mykolaiv.

In recent years, many of these labs have reached Bio-safety Level 2 status, allowing scientists to experiment with viruses and bacteria. Over the past two years, these laboratories, in cooperation with the Ukrainian Ministry of Defense, erected four more mobile laboratories to conduct epidemiological surveillance of the Ukrainian people. These laboratories are part of a multi-national working group that creates disease surveillance networks that “strengthen global health security.”

Up until February 25, 2022, the existence and details of these bioweapons labs were public knowledge. The US embassy had previously disclosed the locations and details of these laboratories in a series of PDF files online. On February 26, 2022, the official embassy website shut down the links to all 15 bioweapon laboratories. All the documents associated with these labs have been removed from the internet. If you click on any of the links, the PDF files are no longer available. Thankfully, these files [have been archived and can still be accessed](#). What is the US embassy trying to hide?
